I. INTRODUCTION/SUMMARY

The Four Lakes Task Force (FLTF), the Delegated Authority of Gladwin and Midland Counties, has administered the preparation of this lake level report. The FLTF is a Michigan non-profit corporation, whose board of directors is comprised of representatives of lake associations and other interested parties representing the respective interests of the property owners located on Sanford, Wixom, Smallwood and Secord Lakes. The objective of this report is the establishment of normal legal lake levels for Sanford Lake, Wixom Lake, Smallwood Lake and Secord Lake and the establishment of the Four Lakes Special Assessment District, in accordance with Part 307 of the Michigan Natural Resources and Environmental Protection Act (NREPA), Michigan Public Act 451 of the Public Acts of 1994, as amended, MCL 324.30701, et seq. (Part 307). Appendix A contains resolutions from both counties for the formation of the FLTF and the preparation of this legal lake level report. The FLTF hired Spicer Group Inc. and Clark Hill to provide professional engineering and legal services to prepare this report and assist with administration of the process for establishing the legal lake level.

Sanford Lake, Wixom Lake, Smallwood Lake and Secord Lake all presently exist and are heavily developed. Currently there are 6,555 parcels of private properties which front the lakes and 1,961 parcels of private properties that have dedicated easement access to the lakes. Maps showing the location of these parcels are provided in Appendix E.

Each lake is created by a dam. At this time, the dams and most of the lake bottom lands, to a flowage right contour, are privately owned. The flowage rights were originally obtained in the 1950's and 1960's by Wolverine Power Company. The flowage rights have since been transferred to current owners. As a general statement, although there are exceptions, the lake bottom property below the flowage right contour is privately owned either by the FLTF or Boyce Hydro. The flowage rights for Sandford Lake, for the most part, are currently held by the FLTF. The flowage rights for remaining lakes, for the most part, are currently held by Boyce Hydro.

Due to this private ownership of lake bottoms, the riparian rights of most of the property owners surrounding the lakes are limited. Thus, the lakes can be lowered or drained with minimal consideration to the interest of the property owners who have invested into the properties surrounding the lakes. The Counties of Midland and Gladwin have petitioned the Circuit Court to establish legal lake levels to protect the interests of the property owners who directly benefit from the existence of these lakes as well as the interests of the Counties.

The four dams and four lakes were constructed in 1924 to generate hydro-electric power. Through the years, lake levels and dams have been operated by several private owners, for the purpose of power generation. In recent decades, this operation has been conducted under the regulatory oversight and license of the Federal Energy Regulatory Commission (FERC). The FERC licenses regulate the water elevations of the lakes and the timing to achieve normal summer and winter water elevations. Copies of the FERC licenses are provided in Appendix D. Neither the State of Michigan nor the Counties of Midland and Gladwin currently have clear regulatory oversight of the lake levels or the operation and maintenance of the dams.

In September of 2018, FERC revoked the license for the Edenville Dam, which creates Wixom Lake. The FERC license was revoked because the dam was determined to be non-compliant

with FERC regulations. Upon this revocation, FERC relinquished its regulatory oversight to Michigan Department of Environmental Quality (MDEQ). Shortly after the revocation of the license, the dam owner drained Wixom Lake by approximately 8 feet, presumably due to the revocation of the FERC license. The FLTF is not aware of objections or violations from MDEQ or MDNR. Boyce Hydro and the FLTF have an agreement that water level will be restored for the summer of 2019, with the understanding that the MDEQ will permit this provided that a normal legal lake level is established and repairs to the Edenville Dam are implemented by 2024.

FERC licenses are still in place for the remaining three dams. These licenses are scheduled to expire in 2028. The Counties, along with many of the Lake Associations and property owners, are concerned about the long-term sustainability of the hydro-electric power generation, therefore, are pursuing preemptive action to avert the draining of the lakes and provide a mechanism for long-term sustainability that does not rely on power generation alone. The establishment of the legal lake levels will provide security to property owners and Counties that the dams can be repaired and operated in the absence of hydro-electric power generation.

The primary objectives of Midland and Gladwin Counties submitting the petition to the Circuit Court are to maintain levels into the future, ensure all dams become and remain compliant with state safety standards, acquire rights to operate and maintain the dams and lake bottoms, and establish a local authority that will be responsible to manage the dams.

The recommendation of this study is that the Circuit Court order State of Michigan normal legal lake levels and order the establishment of the Four Lakes Special Assessment District. The recommendation is that the Circuit Court order State of Michigan legal lake elevations that match the elevations in FERC licenses. In other words, the recommendation is no change to historically observed water elevations. The establishment of legal lake levels is in the best interest of property owners surrounding the lakes. In the event a FERC license is revoked, surrendered or expires, a Court-ordered lake level enables local government, under State law, to continue regulating the water levels and sustaining the lakes. The current situation at the Edenville Dam and Wixom Lake, where the FERC license was revoked in September 2018, is an example of what can happen in the absence of a legal lake level order.

The recommendation is also to establish the Four Lakes Special Assessment District. The Special Assessment District is recommended to provide a method of financing the acquisition, operation, maintenance, repairs and improvements to the dams to ensure that the dams meet State of Michigan dam safety standards, in accordance with Part 315 “Dam Safety” of NREPA, MCL 324.31501 et seq. (Part 315). Establishing a method of financing is a necessity for maintaining and sustaining the dams and lake levels into the future. The recommendation is establishment of a single special assessment district (the Four Lakes Special Assessment District) to include Sanford Lake, Wixom Lake, Smallwood Lake and Secord Lake. The recommendation is that the Four Lakes Special Assessment District include properties that front the lakes and properties with deeded and/or dedicated private easement access to that lake. This includes privately owned properties, Michigan Department of Natural Resources (MDNR) properties and county/local government properties.

A map of the recommended Four Lakes Special Assessment District along with a list of parcels included in the proposed special assessment boundary are included in Appendix E. This map and list of parcels has been developed using property tax information provided by local

government and plats provided by the State of Michigan. The intent is that properties that front the lakes or have some form of private easement access to the lakes be included in the Four Lakes Special Assessment District. The Four Lakes Special Assessment District will need to be updated periodically to match the intent.

Operating and managing the Four Lakes as one entity, the Four Lakes Special Assessment District, is cost effective, expedient and in the best interest of benefitting property owners and the Counties. The Four Lakes are a system, the best management practice of this system is to operate the dams with the oversight by one organization. The dams have historically been operated by one organization, which allows coordinating and optimizing the operation of the gates and the timing of water flow through the system. It also provides for efficiencies in connection with administration, operation, maintenance and repairs to the dams.

The ability to continue generating hydro-electric power in a manner beneficial to the Counties and the Four Lakes Special Assessment District is desired by the Counties, but, is not a requirement of the legal lake level order. Power generation may cease at any of time due to the market or the loss of FERC license. The legal lake level order ensures that the lakes can still be managed for the benefit of the lake front properties and properties with private lake access.

The Four Lakes Task Force, as the delegated authority of the Counties, desires to have hydro-electric power generation. The intent is that each dam has lake level assets and power assets. The lake assets will be acquired by the Counties, on behalf of the Four Lakes Special Assessment District, in accordance with Part 307. The power assets will be acquired independently of the Four Lakes Special Assessment District with the intent, in the long term, that proceeds from power generation will offset future costs of the Special Assessment District.

The Lake Level Assets include all components of the dams, excluding power assets, that are required to maintain normal lake levels. The lake level assets also include lake bottom lands. The Counties, on behalf of the Four Lakes Special Assessment District, will be responsible to administer repairs and improvements to the lake assets as necessary to comply with State of Michigan dam safety regulations, in accordance with Part 315. Should power generation exist at any of the dams, the Counties would be responsible to have lake level assets maintained to meet the FERC safety requirements that are similar in intent as the State requirements. The Counties will not be responsible for FERC requirements that exceed State requirements or that are specific to securing FERC licenses for power generation that would not otherwise be required by Part 315 and Part 307. The intent is that Special Assessment District funds are not to be invested into power generation or cannot be used for the operation of power assets, they are specific to lake level assets.

1. The Boyce Trust, current owner of the assets, and the FLTF have entered into a Letter of Agreement to execute a purchase contract to transfer all lake assets. The contract will be signed by June 2019, and a closing in January 2020, contingent upon a Circuit Court order to establish normal legal lake levels. The contract includes a phased transition that moves all deeds and titles into escrow and transfers all Lakes Assets ownership in full in 2022 and transfers complete ownership and operations to the FLTF by June 2024.

The Four Lakes Task Force may charge lease rates to power generation operators and may let contracts for operation of the normal lake levels to a hydro-power operator if this is deemed to

be beneficial to the Counties and the Four Lakes Special Assessment District. Proceeds from leases or contracts will offset future maintenance and operation costs to the Special Assessment District.

Boyce Hydro LLC, the owner of the dams, has provided the FLTF and the MDEQ with the Part 12D Safety Inspection Reports. These reports are required by FERC and outline findings and recommendations, descriptions of the dams, and review of potential failure modes for each dam. The Part 12D report is based on an engineering observation and judgement, it is not a detailed engineering plan or study. Detailed engineering analysis along with MDEQ/FERC permitting will be required prior to implementing many of the needed repairs.

The FLTF met and coordinated with the MDEQ Dam Safety staff and understand that many of the repairs and improvements outlined in the Part 12D safety inspection reports for FERC would also be required for State of Michigan, should the MDEQ inherit regulatory oversight of the dams. The preliminary conclusion is, it should be anticipated that modest improvements to spillway capacity at Wixom Lake and Secord Lake will be required and that repairs at all four dams will be required. In general, signs of instability or structural fatigue have not been observed but repairs and maintenance are needed. Detailed scoping, engineering, and permitting would be completed upon the legal lake level order by the Circuit Court. Preliminary budgets provided in this report in Appendix C have been developed based on the information provided the FLTF to date. These are estimates, subject to updates upon detailed engineering and execution of the implementation plan.

As part of the process, the FLTF has engaged and communicated with the public and local government officials for the purpose of collecting input regarding the establishment of normal legal lake levels and the Special Assessment District. This included establishing a Facebook page, website, a call number, engaging with members of the lake associations, conducting meeting with local officials and conducting 6 public informational meetings. For the public informational meetings, an invitation along with information set forth in an FAQ (i.e. “frequently asked questions”) were sent to owners of most properties that are identified as being within the tentative Special Assessment District. The estimated attendance of the public informational meetings was 2,000 people. A presentation that included background of the dams and lakes, and a summary of the lake level study was provided. The presentation included estimates of special assessments and an implementation schedule. The FLTF received substantial public input, including over 2,000 written questions. The FLTF has addressed many of the questions with the development of recommendations within this report and has taken considerations for the structure and future of the FLTF. A copy of the notice, FAQ and updated public informational meeting presentation are provided in Appendix B. Also, a summary of items addressing public input is also included in Appendix B.

Section 30703 of Part 307 indicates that a preliminary study be completed, and the study shall address the following:

- The feasibility of a project to establish and maintain a normal lake level
- The expediency of the normal level project
- Feasible and prudent alternative methods and design for controlling the normal level
- The estimated costs of construction and maintenance of the normal level project
- A method of financing initial costs

- The necessity of a Special Assessment District and the tentative boundaries
- Other information the County Board resolves is necessary

These items are addressed in more detail in the following sections of this report.

In summary, the lakes and dams already exist and no changes to current FERC regulated water elevations are being proposed. It is feasible to establish and maintain Part 307 normal legal lake levels and it is feasible to implement a project to repair and improve existing dams to meet Part 315 requirements. This will require the FLTF to acquire rights to operate and maintain the lake level assets, implement a project to make repairs and improvements, and operate/maintain dams into the future. The anticipated cost to acquire rights and implement repairs is approximately \$20 million, plus annual operational costs into foreseeable future. The State of Michigan is providing \$5 million in funding to assist with the implementation of repairs to the dams. A Special Assessment District is necessary to fund the remainder of costs, minus any additional grants or private funding that may be secured. The issuance of special assessment bonds to finance project will be necessary. The anticipated bond would be for 20 years and will require the full faith and credit of Midland and Gladwin Counties. The anticipated schedule for the needed repairs to the lake level assets will be completed by 2023.

II. DESCRIPTION OF FOUR DAMS AND LAKES

SANFORD DAM AND LAKE DESCRIPTION

The Sanford Dam is located on the Tittabawassee River approximately 11 miles upstream of the City of Midland, Michigan. The dam is situated adjacent to the Village of Sanford, which lies approximately 10 miles west of the City of Midland. It is the most downstream of the four dams owned by Boyce Hydro, LLC. The others, in upstream order from Sanford are Edenville, Smallwood, and Secord. All were built around 1924 for the purpose of hydro-power generation.

The Sanford Dam creates Sanford Lake which is approximately 1,525 acres in size and gross storage volume of 15,000 acre-feet, when the “normal” summer elevation of 630.8 feet water level elevation is achieved. Most of the shoreline of Sanford Lake is developed with residential properties. Based on the County of Midland records, there are 944 parcels of property that front the lake and 918 parcels that do not front the lake but have private easement access to the lake. The flowage right contour for Sanford Lake is 638.8.

The dam consists of four (4) major components including the left embankment, the powerhouse, the spillway, and the right embankment with fuse plug, which is intended to provide additional spillway capacity during a large flood event. The fuse plug material is designed to erode and wash out to protect the remainder of the dam. The left embankment is 160 feet long and is integral with a parking and mobilization area. The powerhouse is 71 feet long and includes four (4) turbine units. The spillway section is 149 feet long and includes six (6) Tainter gates, of which four (4) are 10 feet high by 22 feet wide, and two (2) are 10 feet high by 25 feet wide. The crest elevation of each gate is 622.3 feet. The right embankment is 1,200 feet long and includes a 190-foot wide fuse plug.

The original drawings of the dam are from 1924, prior to the use of the National Geodetic Vertical Datum of 1929 (NGVD29). The FERC license for the Sanford Dam references a

normal elevation of 625.0 NGVD29. It has been established that the 625.0 elevation is not on the NGVD29 datum, rather it references the original dam datum from 1924. The dam has been subsequently surveyed and determined that the NGVD29 datum is 5.8 feet above the datum referenced on the original construction drawings. The normal pool elevation of 630.8 NGVD29 is the has been used for several historical studies submitted to the FERC and FERC has confirmed that they recognize that the normal pool elevation being used by the licensee as 630.8 NGVD29.

Elevations presented throughout this report are referenced unless noted otherwise. It should be noted that a conversion to the North American Vertical Datum of 1988 (NAVD88) is provided in this report. NAVD88 is the modern and commonly used datum by most Counties, State and Federal Agencies. We recommend any Circuit Court Order reference the NGVD29 and the NAVD88 datums.

HAZARD POTENTIAL CLASSIFICATION

The Sanford Dam is classified as having a high-hazard potential due to the impact that a potential failure could have on downstream developments, potential for loss of life and potential for failure of downstream dams. The maximum height of the Sanford Dam is 36 feet. State of Michigan law requires this dam to have spillway capacity to convey the 200-year storm.

SUMMARY OF STANDARD OPERATING PROCEDURES

Reservoir/Lake Operation

The Sanford Dam was built to provide headwater level control for the purpose of hydro-electric power generation and received its original license from FERC in 1987. The FERC license is to operate the reservoir/lake between two sets of water levels. The summer water operation is within 0.3 above and 0.4 feet below of the normal pool elevation of 630.8 feet. The winter water operation is 627.8 feet. The winter drawdown may begin December 15 and must be completed by January 15. The lake is to be returned to summer operating level when surface water temperature reaches 39 degrees Fahrenheit. The minimum flow requirement through the dam is 210 cfs (cubic feet/second), except during walleye spawning season when it is 650 cfs. Section 407 of the FERC license references the water temperature and dissolved oxygen requirements.

Gate Operation

The FERC license requires that when water levels rise above the normal lake level and cannot be accommodated by increased hydro-electric power generate on, gate operations are required to control water level. Gate operations must be performed manually, meaning opening and closing gates. The gate uses a chain hoist on a trolley system. An operator is required to set the chain on the hoist drum and to be in attendance to push the start and stop buttons.

Because this dam is located downstream of the Secord Dam, the most northern station operated by Boyce Hydro, water flow from the Secord Dam affects water levels in all downstream lakes. When Secord Dam is operated to pass increasing flow, in a manner of a few minutes, all dams must be operated so increased flow is passed from dam to dam to maintain normal lake levels

in the system. In practice, gates are opened when the inflow is greater than normal capacity and water levels are expected to exceed the normal lake level range. There is a Federal Emergency Management Agency (FEMA) 100-year flood elevation and during large storm events, water level may exceed normal levels.

EDENVILLE DAM AND WIXOM LAKE DESCRIPTION

The Edenville Dam, built in 1924, is located on the Tittabawassee and Tobacco Rivers located near the town of Edenville, Michigan. The dam includes the Edenville spillway and powerhouse located on the Tittabawassee River and the Tobacco spillway located on the Tobacco River. The total earthen embankment length is approximately 6,200 feet. The Michigan State Highway 30 (M-30) causeway effectively divides the embankment with the east side of the embankment impounding water from the Tittabawassee River and the west side of the embankment impounding water from the Tobacco River. The M-30 bridge opening acts to connect the water impounded on both rivers. The combined impoundments create Wixom Lake.

Wixom Lake has a surface area of approximately 2,300 acres in size and gross storage volume of 40,000 acre-feet when the normal summer elevation of 675.8 feet is achieved. Most of the shoreline of Wixom Lake is developed with residential properties. Based on the Counties of Midland and Gladwin records, there are 2,875 parcels of property that front the lake and 828 parcels that do not front the lake but have private easement access to the lake. The flowage right contour for Wixom Lake is 678.8.

Tittabawassee River Section -The left embankment of the Tittabawassee River section extends from natural ground to the gated spillway and is approximately 625 feet long. The right embankment of the Tittabawassee River section extends 2,900 feet from the powerhouse to M-30. The minimum crest elevation of the Tittabawassee embankments is approximately 682.1 feet.

Edenville Dam -Tobacco River Section - The left embankment of the Tobacco River section extends 520 feet from M-30 to the Tobacco spillway. The right embankment of the Tobacco River section extends approximately 1,895 feet from the Tobacco spillway and ties into natural ground. The minimum crest elevation of the Tobacco embankment is approximately 682.1 feet.

There are two (2) gated spillway sections, the Tittabawassee and the Tobacco spillways. The Tittabawassee and Tobacco gated spillways have three (3) steel Tainter gates each (radial gates). The Tittabawassee spillway contains two (2) gates that are 20 feet wide by 9 feet 6 inches high and one (1) gate that is 23 feet 7 inches wide by 9 feet 6 inches high. The Tobacco spillway has two (2) gates that are 23 feet 7 inches wide by 9 feet 6 inches high and one (1) gate that is 20 feet wide by 9 feet 6 inches high. From abutment-to-abutment, the Tittabawassee and Tobacco spillways are 68.6 and 72.2 feet wide, respectively. Gate sill elevation of the current structures is 667.8 feet.

The powerhouse is located adjacent to the Tittabawassee spillway and has a concrete substructure and brick superstructure, is approximately 50.6 feet wide, and contains two (2) vertical-shaft generating units.

HAZARD POTENTIAL CLASSIFICATION

The Edenville Dam, which includes both the Tittabawassee and Tobacco embankments, is classified as having a high-hazard potential due to the impact that a potential failure could have on downstream developments, potential for loss of life and potential for failure of downstream dams. The maximum height is 54.5 feet. State of Michigan law requires this dam to have spillway capacity to convey half the Probable Maximum Flood (PMF).

SUMMARY OF STANDARD OPERATING PROCEDURES

Reservoir/Lake Operation

The Edenville Dam was built to provide headwater level control for the purpose of hydroelectric power generation and received it a license from FERC in 1998. The FERC license was revoked September 2018. The FERC license included a requirement to operate lake between two sets of water levels. The summer water operation is within 0.3 above and 0.4 feet below of the normal pool elevation of 675.8 feet. The winter water operation is 672.8 feet. The winter drawdown may begin from December 15 and must be completed by January 15. Lake level is to return to summer operating level when water temperature reaches 39 degrees Fahrenheit. The minimum flow that must be released into the bypassed reach of the Tobacco River is 40 cubic feet per second (cfs) from October 1 through March 31 and 66 cfs April 1 and September 30. All minimum flows shall be continuous. There is not a reference to minimum flow through the Tittabawassee River, this is estimated to be 125 cfs. Section 402 of the FERC license references the water temperature and dissolved oxygen requirements.

Gate Operation

Spillway structures exist at the Edenville Dam. The Dam has one gate hoist trolley on the Tittabawassee River side and one gate hoist trolley on the Tobacco River side. Each gate is opened fully before the hoist trolley is disconnected from the hoist chain to begin opening the adjacent gate. Gate operators must always be on site when discharging from the spillway structures during flood events.

The normal gate operation procedure is to open the Tobacco Tainter gates first to make releases to control the pool level. The Tittabawassee spillway gates are opened when additional spillway discharge capacity is needed to control the lake level. Each gate is fully opened prior to opening an additional gate. The order of gate operation is rotated such that no one gate is opened more often than another gate.

Because this dam is located downstream of the Secord Dam, the most northern station operated by Boyce Hydro, water flow from the Secord Dam affects water levels in all downstream lakes. When Secord Dam is operated to pass increasing flow, in a manner of a few minutes, all dams must be operated so increased flow is passed from dam to dam to maintain normal lake levels in the system. In practice, gates are opened when the inflow is greater than normal capacity and water levels are expected to exceed the normal lake level range. There is a FEMA 100-year flood elevation and during large storm events, water level may exceed normal levels.

SMALLWOOD DAM AND LAKE DESCRIPTION

The Smallwood Dam, built in 1924, is located approximately 18 miles northwest of the City of Midland, Michigan near M-30. The dam is oriented in a northeast-southwest direction and consists of four (4) major components including the left embankment, spillway, powerhouse and right embankment.

The Smallwood Dam creates Smallwood Lake which is approximately 500 acres in size and gross storage volume of 6,000 acre-feet when the normal summer elevation of 704.8 is achieved. The majority of the shoreline of Smallwood Lake is developed with residential properties. Based on the County of Gladwin's records, there are 721 parcels of property that front the lake and 91 parcels that do not front the lake but have private easement access to the lake. The flowage right contour of Smallwood Lake is 707.8.

The left embankment is approximately 800 feet long and is 38 feet high at the spillway. The right earth embankment is approximately 125 feet long. The top elevation is 715.7 feet. The powerhouse is brick and a reinforced concrete that is integral with the intake structure. The powerhouse is 27 feet by 28 feet by 60 feet in height and includes one (1) vertical propeller unit. The spillway for the dam is integral with the powerhouse. The right wall of the spillway is the left wall of the powerhouse. Two (2) 23.4 feet wide by 10.5 feet high radial gates sit atop the concrete spillway with a crest elevation of 694.8 feet.

HAZARD POTENTIAL CLASSIFICATION

The Smallwood Hydro-Electric Project is classified as having a high-hazard potential due to the impact that a potential failure could have on downstream developments, potential for loss of life and potential for failure of downstream dams. The maximum height is 38 feet. State of Michigan law requires this dam to have spillway capacity to convey the 200-year storm.

SUMMARY OF STANDARD OPERATING PROCEDURES

Reservoir/Lake Operation

The Smallwood Dam was built to provide headwater level control for the purpose of hydro-electric power generation and received its original license from FERC in 1998. The FERC license includes a requirement to operate the lake between two sets of water levels. The summer water operation is within 0.3 feet above and 0.4 feet below of the normal pool elevation of 704.8 feet. The winter water operation is 701.8 feet. The winter drawdown may begin December 15 and must be completed by January 15. The return to summer operating level is required when surface water temperature reaches 39 degrees Fahrenheit. There is not a reference to minimum flow, this is estimated to be 45 cfs. Section 402 of the FERC license references the water temperature and dissolved oxygen requirements.

Operation

The FERC License required that when water levels rise above the control levels and cannot be accommodated by increased hydro-electric use of the available water, spillway gate operations are required to control water level. Gate operations must be performed manually by an operator due to the means of opening and closing a gate. The gate uses a chain hoist on a trolley system.

An operator is required to set the chain on the hoist drum and to be in attendance to push the start and stop buttons on the gate hoist.

Because this dam is located downstream of the Secord Dam, the most northern station operated by Boyce Hydro, water flow from the Secord Dam affects water levels in all downstream lakes. When Secord Dam is operated to pass increasing flow, in a manner of a few minutes, all dams must be operated so increased flow is passed from dam to dam to maintain normal lake levels in the system. In practice, gates are opened when the inflow is greater than normal capacity and water levels are expected to exceed the normal lake level range. There is a FEMA 100-year flood elevation and during large storm events, water level may exceed normal levels.

SECORD LAKE DESCRIPTION

BRIEF PROJECT DESCRIPTION

The Secord Dam is located on the Tittabawassee River approximately 41 miles upstream of the City of Midland, Michigan. The dam is oriented in an east-west direction and consists of four (4) major components including left embankment, powerhouse, spillway, and right embankment.

The Secord Dam creates Secord Lake which is approximately 1,100 acres in size and gross storage volume of 15,000 acre-feet when the normal summer elevation of 750.8 is achieved. Most of the shoreline of Secord Lake is developed with residential properties. Based on the County of Gladwin records there are 2,015 parcels of property that front the lake and 124 parcels that do not front the lake but have private easement access to the lake. The flowage right contour for Secord Lake is 755.8.

The left embankment is approximately 1,400 feet long and extends from the natural high ground abutment to the left side of the powerhouse. The right embankment is 600 feet long and extends from the right spillway abutment wall to the natural high ground abutment. The design crest of the embankments is 757.8 feet. The powerhouse consists of concrete and brick and is approximately 36.5 feet long and 20 feet wide containing one vertical shaft generating unit. The spillway structure is a reinforced concrete with two (2) Tainter gate spillway bays with a total width of 45.58. The left Tainter gate is 20.5 feet wide by 10 feet high and the right Tainter gate is 23.58 feet wide by 10.0 feet high. The spillway crest is at elevation 742.8 feet.

The normal pool elevation is 750.8 feet. Although not a component of the dam, the eastern ridgeline along Secord Lake has areas that are lower than the dam embankments, with a minimum elevation of 754.9 feet. This low area along the ridgeline allows a significant amount of overflow into the Tea Creek watershed east of Secord Lake and does not return to the Tittabawassee River until 2.5 river miles downstream of Secord Dam.

HAZARD POTENTIAL CLASSIFICATION

The Secord Hydro-Electric Project is classified as having a high-hazard potential due to the impact that a potential failure could have on downstream developments, potential for loss of life and potential for failure of downstream dams. The maximum height is 55 feet. State of Michigan law requires this dam to have spillway capacity to convey half the Probable Maximum Flood (PMF).

SUMMARY OF STANDARD OPERATING PROCEDURES

The Secord Dam was built to provide headwater level control for the purpose of hydro-electric power generation and received its original license from FERC in 1998. The Smallwood Dam was built to provide headwater level control for the purpose of hydro-electric power generation and received its original license from FERC in 1998. The FERC license is to operate the reservoir/lake between two sets of water levels. The summer water operation is within 0.3 above and 0.4 feet below of the normal pool elevation of 750.8 feet. The winter water operation is 747.8 feet. The winter drawdown is between the period from December 15 and January 15. The return to summer operating level is to raise the water level when water temperature reaches 39 degrees Fahrenheit. There is not a reference to minimum flow, this is estimated to be 30 cfs. Section 402 of the FERC license references the water temperature and dissolved oxygen requirements.

Gate Operation

The FERC license requires when water levels rise above the control levels that cannot be accommodated by increased hydro-electric use of the available water, gate operations are required to control water level. Gate operations must be performed manually by an operator due to the means of opening and closing a gate. The gate uses a chain hoist on a trolley system. An operator is required to set the chain on the hoist drum and to be in attendance to push the start and stop buttons on the gate hoist.

Because this station is the most northern station operated by Boyce Hydro Power, LLC, outflows from Secord affect water levels in all downstream reservoirs by virtue of the discharge occurring at Secord Station. When Secord Station runs, in a manner of a few minutes, all stations are running such that water is passed from station to station with no increase or decrease in reservoir level. In practice, gate spill will occur only when the inflow is greater than station capacity and is expected to last longer than the allowable storage within the lake level ranges discussed above.

III. PART 307 PRELIMINARY STUDY

Overview

Part 307 of Act 451 of 1994 is commonly known as Inland Lake Level Act. This part of Act 451 outlines how the courts establish a lake level and what aspects should be contained in the study. The study should contain the following:

- The feasibility of a project to establish and maintain a normal level of the inland lake.
- The expediency of the normal level project.
- Feasible and prudent alternative methods and designs for controlling the normal level.
- The estimated costs of construction and maintenance of the normal lake level.
- A method of financing initial costs.
- The necessity of a Special Assessment District and the tentative boundaries if a district is necessary.

Feasibility of A Project to Establish and Maintain a Normal Level of the Inland Lake

A project to establish and maintain normal levels is feasible. The dams and lakes presently exist, and regulated water elevations presently exist. Establishment of normal legal lake level would not introduce detrimental impacts to properties, or the environment as currently established. The scope of the project is to repair, maintain and operate the infrastructure that already exists and has been in operation for nearly 100 years.

The Expediency of the Normal Level Project

The implementation schedule is to operate normal lakes levels in 2019, as soon as possible, to implement necessary repairs and improvements on all four dams by 2023, and to complete acquisition of all assets by 2024.

With respect to the expediency of achieving normal lake levels, this is anticipated to occur immediately for Sanford Lake, Smallwood Lake and Secord Lake. These three lakes currently have FERC licenses and failure to operate normal lakes levels would be a FERC violation. At such time of the acquisition of the lake assets by the Counties, coordination between FERC, FERC Licensee and FLTF to ensure uninterrupted operations of normal level during and after the acquisition phase. The FERC license will need to be updated in connection with the ownership transfer of lake level assets.

For Wixom Lake, the objective is to achieve the normal level within 45 days of the Court Order. To achieve normal levels, the FLTF must enter into a purchase agreement with Boyce Hydro and a contract with them to operate the dam through 2019. The agreement includes the Counties holding title in escrow for the Edenville Dam and Wixom Lake assets in January of 2020, at which time the FLTF will need to either deploy an operations team, enter into a contract with a qualified operator for operation.

Property rights must be acquired to properly administer the normal lake levels in accordance with Part 307 for the remaining three dams, being Sanford, Secord and Smallwood. It is anticipated the dams and lakes will be divided into lake level assets and power assets. The lake level assets will be owned by the Counties and maintained by the Special Assessment District. The agreement is that the title in full to lake assets for all dams will be transferred in 2022 and the title to the power assets will be transferred in 2024, at which time the FLTF will need to either deploy an operations team, enter into a contract with a qualified operator, or coordinate FERC Licensee for operation and power generation.

The MDEQ spillway requirements for each dam will need to be determined, in accordance with Part 315 requirements. This will require that hydrologic and hydraulic analysis for each dam is completed and coordinated with MDEQ. This study will establish the maximum limits of the spillway improvements that the Four Lakes Special Assessment District will be responsible to finance, subject to agreement. Spillway improvements that exceed what would be required by the MDEQ, but are required by FERC, would be the financial responsibility of the hydro-electric operator.

Detailed engineering and comprehensive repair and improvement plans must be developed, then permitted by MDEQ/FERC. The FLTF will be required to implement repairs and improvements for the Wixom Lake assets. Boyce Hydro will be responsible to implement

repairs for remaining dam assets. All repairs and improvements are to be completed by the end of 2023. The FLTF, on behalf of the Special Assessment District, will be responsible for cost of the repairs and improvements needed to meet State requirements, the hydro-electric operator will be responsible for FERC requirements that exceed State requirements. The FLTF will not issue payment for any construction of Sanford, Secord and Smallwood without acceptance and approval by FERC and FLTF of work completed.

For Wixom Lake, upon receiving construction bids, the FLTF will enter into a contract with a qualified construction contractor. A computation of cost must be prepared, and the special assessment roll must be completed. Upon completion of assessment roll, a special assessment hearing must be conducted, and project financing must be secured, prior to proceeding with construction.

An implementation plan and tentative schedule are provided below:

Circuit Court Hearing	May 2019
Final Agreement with Boyce	June 2019
Interim Financing	December 2019
Closing	January 2020
Acquisition (Deeds and Titles in Escrow)	January 2020
Preliminary Engineering	July 2020
Permitting	November 2020
Bidding	December 2020
Computation of Cost	December 2020
Special Assessment Hearing	January 2021
Financing	February 2021
Acquisition (all Lake Assets in full)	January 2022
Construction completed	December 2023
All Operations Transfer from Boyce Hydro	June 2024

Feasible and Prudent Alternative Methods for Design to Control the Normal Level

As outlined in previous sections of this report, the Four Lakes, being Sanford, Wixom, Smallwood, and Secord already exist. They were created in 1924 when the four dams were constructed. Each dam has or had a FERC License that regulates water elevations for summer and winter levels. The most feasible and prudent method to control the normal lake levels is to repair/improve/maintain the existing dams to meet current safety regulations and operate the dams to the previously established normal levels. Since the lakes have been established for nearly 100 years and the shoreline around the lakes are highly developed, maintaining the status quo is feasible and prudent and introduces no changes to the established environment.

Historically, landowners around the lakes have been reliant on a private dam owner to operate normal levels using revenues from the generation of hydro-electric power. It is not clear and evident that the lakes can be sustained into the future being 100 percent reliant upon revenues generated from hydro-electric power. To protect the interest of Gladwin and Midland Counties and of the private property owners around the lake, the most feasible and prudent alternative to sustain normal lake levels is the establishment of a legal “normal” lake level and reliance on the county delegated authority, through the establishment of a legal lake level, to manage the dams with revenues from a Special Assessment District.

The Estimated Costs of Construction and Maintenance of the Normal Level Project

Given confidentiality requirements of FERC; the Spicer Group, the Four Lakes Task Force and the MDEQ have relied upon engineering inspections, reports and studies that have been provided by Boyce Hydro. Detailed information regarding the four dams and lakes is provided in the FERC Section 12D Safety Inspection Reports, compiled by Dee Purkeypile P.E., on behalf of Boyce Hydro. These reports are controlled distribution documents due to their “Critical Energy Infrastructure Information” classification by FERC. The Four Lakes Task Force was informed by Boyce the reports have been reviewed and accepted by FERC and that the information provided in the reports is a reliable source of reference for the current status of the dams. With the Circuit Court order of normal lake levels, the FLTF will complete independent surveys, inspections and detailed engineering plans for repairing the dams and updating of preliminary estimates of cost.

For estimating of construction costs provided in the report, engineers and contractors reviewed the needed repairs outlined in the FERC safety inspection reports, compiled by Dee Purkeypile, P.E. on behalf of Boyce Hydro. Also, a site inspection by a qualified construction estimator was completed. Furthermore, coordination with the MDEQ to review requirements for additional spillway improvements was completed. MDEQ has not finalized spillway requirements to date although, based on preliminary findings, it is anticipated that improvements to the spillway capacity of Wixom Lake and Secord Lake will be required.

The preliminary estimate of cost associated with the acquisition of lake level assets and the implementation of repairs/improvements needed to meet MDEQ safety requirements is \$20 million, of which \$5 million to be appropriated by the State of Michigan. It is anticipated the remaining \$15 million, less additional grants or private funding received, and subject to final findings of implementation plan, will be financed by a bond sale and special assessed over the next 20 years. The table below is a summary of the preliminary estimate of costs.

Preliminary Planning Level Budget

Lake Level Hearing

Engineering - Legal Lake Level Study	\$225,000.00	
Attorney	\$125,000.00	
Court Costs	\$10,000.00	
Notifications	\$15,000.00	
Administration	\$25,000.00	
Total Lake Level Hearing		\$400,000.00

Land, Easements, and Lake Assets (Dam and Bottom Lands)

Acquisition

*Land Purchase Price (also includes repairs to Sanford, Smallwood and Secord)	\$9,400,000.00	
Transition Payment	\$1,000,000.00	
Total Land and Easement Acquisition		\$10,400,000.00

Professional Services / Administration		
Land and Easement Title	\$200,000.00	
Engineering Manager	\$100,000.00	
Design Engineering - Wixom Lake	\$350,000.00	
Part 307 Mapping and Assessment Roll	\$150,000.00	
Permitting	\$50,000.00	
Advertising, Mailing, and Publishing	\$35,000.00	
Attorney - Lake Level	\$75,000.00	
Bond Counsel	\$60,000.00	
Financial Advisor	\$60,000.00	
Cost of Publication - Bond Rating, Publishing, Sales, and Notice	\$20,000.00	
Total Bidding & Computation of Cost & Special Assessment Hearing & Financing		\$1,100,000.00
Construction/Repairs to Maintain Existing Dams		
Sanford Lake performed by Boyce with FERC and FLTF oversight	\$1,350,000.00	
Wixom Lake contracted by FLTF with DEQ oversight	\$2,650,000.00	
Smallwood Lake Performed by Boyce with FERC and FLTF oversight	\$370,000.00	
Secord Lake performed by Boyce with FERC and FLTF oversight	\$770,000.00	
Construction Administration	\$450,000.00	
Subtotal Construction Costs	\$5,590,000.00	
Performed by Boyce and included in Acquisition Purchase Price Above	-\$2,490,000.00	
Subtotal Construction Repairs Assessed to District		\$3,100,000.00
Construction/Capacity Improvements to Meet Part 315		
Probably Maximum Flood Study(s)	\$300,000.00	
Capacity/Improvement for Wixom	\$2,000,000.00	
Capacity for other Dams	\$200,000.00	
Construction Administration	\$200,000.00	
Subtotal Construction Improvements		\$2,700,000.00
State of Michigan Appropriation		\$5,000,000.00
Contingency		\$1,500,000.00
Capitalized Interest		\$800,000.00
Total Planning Level Budget		\$20,000,000.00
Total Planning Level Budget Assessed to District		\$15,000,000.00

The estimated annual operations cost to the FLTF is expected to range between \$200,000 and \$500,000 dependent of the future of hydro-electric power generation. The goal of the FLTF is to secure a contract with a hydro-electric operator that would include charging of lease rates and reduced annual operations cost. Such contract is contingent upon FERC acceptance, renewal of power purchase agreements, contract with hydro-electric operator that can invest into power assets and maintain FERC licenses, and acceptance by the local community and counties. In the absence of developing a contract to maintain hydro-electric power generation, it is anticipated that annual operation cost to the Special Assessment District will be higher as there will be no revenues to offset operational costs.

Method of Financing Initial Cost

The initial costs in connection with development of this legal lake level report are from private landowners and lake associations. Should the normal legal lake level be ordered, it is anticipated that the eligible 2019 costs associated with the legal lake level report and circuit court hearing would be included in the computation of cost for the Special Assessment District, and thus be reimbursed.

The process, as outlined in the implementation schedule, will require a bond to finance project costs not covered by State appropriations, grants or private funding. The State of Michigan has appropriated \$5 million to date. It is anticipated that interim expenses between the Circuit Court Order and project financing will be structured such that the grant covers the interim expenses. In addition to the State funds, interim borrowing on behalf of the Special Assessment District for an approximate amount of \$3 million may be pursued. Full faith and credit of Midland and Gladwin Counties will be required.

With respect to the annual operational costs, this will not be included on the bond. This will be assessed annually based on operational expenses incurred. Resolutions from each Board of County Commissioners, in accordance with Part 307, will be required as annual costs are anticipated to exceed \$10,000 annually.

The Necessity of a Special Assessment District and the Tentative Boundaries

The establishment of a Special Assessment District is necessary to pay for the establishment and maintenance of a normal legal lake level project and the ongoing operational costs. The intent of the Special Assessment District is to include properties that front the lake and properties that have deeded or dedicated (private easement) access to the lake.

A map showing the tentative boundary or the proposed Special Assessment District and a listing of properties within are provided in Appendix E. An affidavit from the Drain Commissioner certifying this is the best available parcel list is provided in Appendix A.

To develop the tentative Special Assessment District, Spicer Group is to obtain the following:

- Geographical Information System (GIS) parcel data from Midland and Gladwin Counties.
- Aerial imagery and LiDAR data for each county.
- Active weed control Special Assessment Districts within the four lakes.

- Flowage right contours for each lake.
- All subdivision plats surrounding the four lakes.
- Public input at six (6) separate public informational meetings.
- Parcel data information for all properties with return to sender based off public informational meeting notice.

Midland and Gladwin Counties provided the FLTF/Spicer Group with their GIS parcels layers, aerial photographs, LiDAR elevation data and property tax information. Also, the Townships and Lake Improvement Boards provided the various existing weed control Special Assessment Districts from around the four lakes. The weed control districts were input into the county GIS to visually illustrate the location of parcels within each weed control district. Examination of the current weed control Special Assessment District provides a starting point for developing the Four Lakes Special Assessment District. However, the recommended lake Special Assessment District does not match the weed control Special Assessment District. There are many parcels around the lakes that are in both.

The flowage rights were originally obtained by Wolverine Power Company. As a general statement, the lake bottom property below the flowage right contour is privately owned. The flowage right contours for each lake were mapped using the aerial LiDAR digital elevation model provided by each county. For the lower three (3) lakes being Sanford, Wixom, and Smallwood, the flowage right extends to the dam for the upstream lake. For Secord Lake, flowage rights transition into a natural river. Many property owners around the lakes have limited riparian rights and would benefit from establishing a normal legal lake level.

Due to areas of transition from a lake system and a river system, a headwater analysis was also performed. The headwater analysis consisted of reviewing aerial photographs, reviewing LiDAR elevation models, reviewing weed control district limits and conducting an engineering field observation. Aerial photographs were reviewed to identify the presence of docks and boats. The field review consisted of reviewing items such as road crossings, depth and width of water, and presence of boats/docks. The boundaries of the proposed Special Assessment District in the headwater areas were mapped with consideration of boating evidence from aerial photos and field observation, limits of existing weed control districts, elevations, and engineering judgment. The lakes were mapped to reflect where typical inland land recreational boating can reasonably occur.

The properties fronting the lakes (“lakefront lots”) and the properties not fronting the lakes but having private easement access (“backlots”) were mapped based on County GIS records. Lakefront lots recommended to be included in Special Assessment District are based on overlaying the GIS parcels onto aerial photographs and identifying lots that front the lakes.

Backlots recommended to be included in the Special Assessment District were determined by reviewing dedications on subdivision plats, provided by the State of Michigan. Approximately 310 subdivision plats obtained were reviewed. Backlots within subdivision plats that included a dedication of private access to the lakes were included in the Special Assessment District.

Following the review of subdivision plats for dedicated access, the special assessment layer was compared to the backlots in current weed control districts. In many instances, the two matched, however, not all. To better understand the differences, a meeting and follow up conversations

with township and county local government officials were conducted. This resulted in further updating of back lots based on known private access easements that are not shown on subdivision plats. The possibility exists that there are private easements to lake access that were not discovered during this research. At this point, the preliminary assessment district contained 8,457 properties, based on County GIS records.

The Four Lakes Task Force mailed notices and FAQ's for six (6) public informational meetings to the 8,516 parcels (See Appendix B). At the public informational meetings and/or following the informational meetings, feedback was received from numerous property owners and the Special Assessment District boundary was updated based on this public input. Appendix B included a list of all property owner comments, specific to the boundary of the proposed Special Assessment District and summary updates made to the proposed special assessment based on engineering verification of public input. The Special Assessment District was updated to include 8,516 parcels.

Below is a summary of the tentative Special Assessment District.

**Table 1
Number of Parcels in Tentative Special Assessment District**

<i>Four Lake Special Assessment District Summary Table</i>				
Lake	Township	Front Lots	Back Lots	Total
Sanford	<i>Edenville</i>	479	592	1071
	<i>Jerome</i>	465	326	791
	TOTAL	944	918	1862
Wixom	<i>Edenville</i>	6	0	6
	<i>Tobacco</i>	909	144	1053
	<i>Hope</i>	245	18	263
	<i>Billings</i>	1384	417	1801
	<i>Hay</i>	331	249	580
	TOTAL	2875	828	3703
Smallwood	<i>Hay</i>	549	75	624
	<i>Secord</i>	157	16	173
	<i>Gladwin</i>	14	0	14
	<i>Buckeye</i>	1	0	1
	TOTAL	721	91	812
Secord	<i>Secord</i>	1145	57	1202
	<i>Clement</i>	627	50	677
	<i>Bouret</i>	243	17	260
	TOTAL	2015	124	2139
TOTAL PARCEL COUNT:		6555	1961	8516

In the process of mailing notices for the public informational meetings, 160 notices were returned for various reasons, primarily being the wrong mailing address in the County GIS system. The Townships from which the returned notices came from were contacted and 100 of the tax records have been updated to date based on a new mailing address provided by the Township.

IV. RECOMMENDED NORMAL OR LEGAL LAKE LEVEL

In the determining the normal levels of lakes, Section 30707 of Part 307 requires that the Court consider several factors: (a) Past lake level records, including the ordinary high-water mark and seasonal fluctuations; (b) The location of septic tanks, drain fields, sea walls, docks, and other

pertinent physical features; (c) Government surveys and reports; (d) The hydrology of the watershed; (e) Downstream flow requirements and impacts on downstream riparians; (f) Fisheries and wildlife habitat protection and enhancement; (g) Upstream drainage; (h) Rights of riparians; (i) testimony and evidence offered by all interested persons; and (j) other pertinent facts and circumstances.

The four dams and the four lakes were established in the 1920's. FERC regulated water elevations have been in place for two decades. Copies of the current 1998 FERC License's for each lake are provided in Appendix D. The recommendation is to order the normal lake levels to match the FERC regulated lake levels thus there would be no change from the historically operated lake levels.

The shorelines of the lakes are presently highly developed, consisting mostly of residential properties. Given the current development around the lakes and the history of the normal lake elevations, fluctuations and discharges as regulated by FERC, and the existence of the lakes since the 1920's, the establishment of State of Michigan normal lake levels that match the FERC normal lake levels license's would not introduce detrimental impacts to private property, including septic tanks, drain fields, sea walls, docks or other pertinent physical features. Furthermore, detrimental impacts the environment, including currently established hydrology, drainage, riparian impacts, and natural resources, would not be introduced. Appendix B and Appendix C provide public testimony provided to the FLTF related to the establishment of the normal legal lake levels.

The recommendation is that the Circuit Court order State of Michigan legal lake elevations that match the elevations in FERC licenses, as outlined in Table 2. In other words, the recommendation is no change to historically observed water elevations. The establishment of legal lake levels is in the best interest of property owners surrounding the lakes. In the event a FERC license is revoked, surrendered or expires, a Court-ordered lake level enables local government, under State law, to continue regulating the water levels and sustaining the lakes.

Table 2
Recommended Normal Legal Lake Levels

Lake	Summer Level (NGVD 29)	Winter Level (NGVD 29)	Vertcon Conversion	Summer Level (NAVD 88)	Winter Level (NAVD 88)
<i>Sanford</i>	630.8	627.8	-0.568	630.2	627.2
<i>Wixom</i>	675.8	672.8	-0.558	675.2	672.2
<i>Smallwood</i>	704.8	701.8	-0.541	704.3	701.3
<i>Secord</i>	750.8	747.8	-0.512	750.3	747.3

The recommendation is the winter and summer levels be operated to match the FERC licenses. The summer water operation is within 0.3 feet above and 0.4 feet below the normal legal lake level. The winter drawdown may begin December 15 and must be completed by January 15. The return to summer operating level is required when surface water temperature reaches 39 degrees Fahrenheit. Minimum flows, water temperature and dissolved oxygen are maintained in accordance with the FERC licenses, as provided in Appendix E.

There is a FEMA 100-year floodplain surrounding the four lakes and during flood events, water level may exceed normal levels and flooding may occur.

V. MDEQ AND FERC REQUIREMENTS

In the scenario that hydro-electric power generation exists, a FERC license must be in place and FERC has regulatory authority and oversight for dam safety, not the MDEQ. In the scenario that hydro-electric power generation does not exist, the MDEQ has regulatory authority and oversight for dam safety.

In the scenario that hydro-electric power generation exists on dams that the Counties own the lake level assets, the FLTF will be responsible to ensure the dams are maintained, operated and inspected in accordance with the FERC license. In this scenario, it is anticipated that FLTF will have a contract with the hydro-electric operator that will outline the financial responsibilities of the Four Lakes Special Assessment District, the financial responsibilities of the hydro-electric operator and the operation, maintenance, safety inspection and emergency action plan procedures. Also, the MDEQ will required inspections in accordance with Part 307, copies of the FERC Part 12D safety inspections and copies of the emergency action plans are provided to them.

In the scenario that hydro-electric power generation does not exist. The FLTF will be responsible to ensure that the dams are maintained, operated and inspected in accordance with Part 307 and Part 315. In accordance with Part 315, dam will be classified as high hazard and will be required to have emergency action plans. The Smallwood and Sanford Dams will be required to pass 200-year storm flood event and the Wixom and Secord Dams will be required to pass the ½ Probable Maximum Flood event. The FLTF and MDEQ will coordinate a system wide spillway capacity analysis and establish a long-term assessment manage plan to sustain safety of dams, in accordance with Part 315.

***Resolutions from Counties
Affidavits from Drain Commissioners
Notice for Circuit Court***

Introduced by _____:

BOARD OF COMMISSIONERS OF THE COUNTY OF GLADWIN

**RESOLUTION RECOMMENDING THE FORMATION OF A
CITIZEN TASK FORCE TO PLAN TO IMPLEMENT
THE NORMAL LAKE LEVEL FOR WIXOM LAKE, SANFORD LAKE, SMALLWOOD
LAKE AND SECORD LAKE PURSUANT TO PART 307 OF THE MICHIGAN
NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT**

RESOLUTION # 2018-017

Minutes of a regular meeting of the Board of Commissioners of the County of Gladwin, Michigan, held at the 401 W Cedar Ave, Gladwin, Michigan 48624, on July 10, 2018 2018, at 9:00 a.m., local time.

PRESENT: Commissioners Hinman, Walters, Aultman,
Smith, Birgel

ABSENT: Commissioners _____

The following resolution was offered by Commissioner Hinman and supported by Commissioner: Birgel.

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake are inland lakes located in Gladwin and Midland Counties, created by the impoundment of the Tittabawassee River by four (4) hydroelectric dams which are privately owned and operated by Boyce Hydro Power, LLC ("Boyce Hydro"); and regulated by the Federal Energy Regulatory Commission ("FERC") which, among other things, includes terms and conditions concerning the water levels for each of the lakes, dam safety, property rights, water quality, public recreation and safety, and other areas of public concern; and,

WHEREAS, in the event that Boyce Hydro loses its FERC license(s) or is unable to perform its responsibilities there is no current state requirement for maintaining the lake levels or governance structure in the community to ensure that the dams and lake levels will be sustained long term.

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake, are important resources in Gladwin and Midland Counties, and the continued operation of the dams and water levels are of paramount importance to the environment, recreation, property values of lake residents, and the public and economic health of Gladwin and Midland Counties; and,

WHEREAS, Part 307 of the Michigan Natural Resources and Environmental Protection Act, "Inland Lake Levels", MCL 324.30701 et seq. ("Part 307") governs the process for the determination, establishment and maintenance of the water levels of an inland lake, and authorizes counties to finance, construct, operate and maintain dams as necessary to maintain such levels as determined by the circuit court; and,

WHEREAS, Section 30704(2) of Part 307, MCL 324.30704(2) provides that if the waters of an inland lake are located in 2 or more counties, the normal level of the lake may be determined by all counties involved, by resolution directing legal counsel of 1 or more counties to initiate proceedings by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, before proceeding with legal action to determine the normal level of the lakes under Part 307, the Gladwin County Board of Commissioners recommends and encourages the formation of a task force consisting of representatives from the lake associations that will interface with representatives of the Counties and other interested parties to plan for the implementation of the lake levels, including preparation of the potential assessment district boundaries, the designation of the Delegated Authority responsible, and any other issues necessary to establish and manage the normal level or levels of Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake;

NOW THEREFORE BE IT RESOLVED, that the Gladwin County Board of Commissioners finds that in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake, that a normal lake level or levels should be established for said lakes, pursuant to Part 307.

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends and invites the lake associations from Wixom Lake, Sanford Lake, Smallwood Lake and Secord Lake, to form a task force ("Task Force") to develop a plan, and present its recommendations for the implementation for establishing the normal levels for Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake (the "Lake Level Project").

BE IT FURTHER RESOLVED, that the County Board of Commissioners recommends and encourages the formation of a Task Force consisting of two (2) representatives from Wixom Lake Association, one (1) from Sanford Lake Association, one (1) from the Sanford Lake Preservation Association, and should they choose to participate, one (1) representative from any citizen group or lake association representing Smallwood Lake, and (1) representative from any citizen group or lake association representing Secord Lake..

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends that the Task Force meet and provide regular progress reports to the Board of Commissioners, elected representatives of the affected townships, the lake associations, and lake owners on all four lakes, and present a Final report by the end December, 2018, that addresses the following:

(1) An implementation plan for establishing the normal level for Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake;

(2) Recommendations with respect to the potential assessment district boundaries for all four lakes;

(3) Recommendations regarding the person or entity that shall serve as the Delegated Authority as provided by Part 307 to act on behalf of the Gladwin and Midland Counties to oversee the dams and manage the lake level, prepare a potential Special Assessment District and

potential Special Assessment Roll in accordance with the procedures set forth in Part 307, and take all other actions as necessary and required by the delegated authority as provided in Part 307; and,

(4) Recommendations concerning options for the long term ownership, finance, operations, maintenance and improvement of the lake level structures; and,

(5) Recommendations on County responses to FERC, Boyce or others action, that may impact this resolution's intention.

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends that the Task Force keep all stakeholders informed and by establishing a "Lake Level Project Communication Forum", consisting of a county commissioner from Gladwin, a county commissioner from Midland, designated representatives from the affected townships, the Village of Sanford, the Wixom Lake Improvement Board, the Sanford Lake Improvement Board, and Secord and Smallwood Lake Associations.

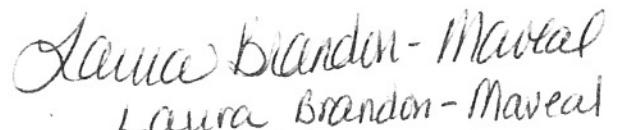

BE IT FURTHER RESOLVED, that no county funds shall be used to fund the costs and expenses of the Task Force.

BOARD OF COMMISSIONERS OF THE COUNTY OF GLADWIN

RESOLUTION FOR THE DETERMINATION OF THE NORMAL LAKE LEVEL FOR WIXOM LAKE, SANFORD LAKE, SMALLWOOD LAKE AND SECORD LAKE PURSUANT TO PART 307 OF THE MICHIGAN NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT

RESOLUTION # 2018-034

Minutes of a regular meeting of the Board of Commissioners of the County of Gladwin, Michigan, held at the 401 W Cedar Ave, Gladwin, Michigan 48624, on October 9, 2018, 2018, at 9:00 a.m., local time.

PRESENT: Commissioners Hinman, Walters, Aultman,
Smith, Birgel

ABSENT: Commissioners none

The following resolution was offered by Commissioner Hinman and supported by Commissioner: Smith.

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake are inland lakes located in Gladwin and Midland Counties, created by the impoundment of the Tittabawassee River by four (4) hydroelectric dams which are privately owned and operated by Boyce Hydro Power, LLC ("Boyce Hydro"); and are currently regulated by the Federal Energy Regulatory Commission ("FERC") which, among other things, includes terms and conditions concerning the water levels for each of the lakes, dam safety, property rights, water quality, public recreation and safety, and other areas of public concern; and,

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake, are important resources in Gladwin and Midland Counties, and the continued operation of the dams are of paramount importance to the environment, recreation, property values of lake residents, and the public and economic health of Gladwin and Midland Counties; and,

WHEREAS, in the event that Boyce Hydro loses its FERC license(s) with respect to any of the Lakes, or is unable to perform its responsibilities, there is no current state requirement for maintaining the lake levels or governance structure in the community to ensure that the dams and lake levels will be sustained long term; and,

WHEREAS, Part 307 of the Michigan Natural Resources and Environmental Protection Act, "Inland Lake Levels", MCL 324.30701 et seq. ("Part 307") governs the process for the determination, establishment and maintenance of the water level of inland lake, and authorizes counties to finance, construct, operate and maintain dams as necessary to maintain such levels as determined by the circuit court; and,

WHEREAS, Section 307011 of Part 307, MCL 324.30711 provides that the County may determine that the whole or part of the cost of the project to establish and maintain the normal

level for an inland lake be defrayed by special assessments for the benefits derived against privately owned parcels of land, political subdivisions of the state, and state owned lands, through the establishment of a special assessment district; and,

WHEREAS, Section 30704(1) of Part 307, MCL 324.30704(1), provides that if the County Board of Commissioners finds it expedient to have determined and established the normal level of an inland lake, the County shall direct legal counsel of the county to initiate a proceeding by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, the Sanford Lake Preservation Association, a Michigan non-profit corporation and IRC 501(c)(3) organization has raised the funds and committed to the funding of the Part 307 through creation of an authority and special assessment districts, and will expand their bylaws to include the preservation of all four lakes, and include representation of all four Lake Associations Presidents or Delegates currently represented on the Four Lakes Task Force, and representative(s) from Gladwin and Midland County, upon this and a similar resolution from Midland County; and,

WHEREAS, Section 30704(2) of Part 307, MCL 324.30704(2) provides that if the waters of an inland lake are located in 2 or more counties, the normal level of the lake may be determined by all counties involved, by resolution directing legal counsel of 1 or more counties to initiate proceedings by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, in order to maintain the normal lake levels for Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake (the "Lakes") in Gladwin and Midland Counties, the County Board of Commissioners has determined that it is necessary to establish the normal level or levels of the Lakes in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around the lake.

NOW THEREFORE BE IT RESOLVED, that the County Board of Commissioners finds that in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around the Lakes, that it is necessary to take all action to establish and maintain the normal lake level for the Lakes (the "Lake Level Project").

BE IT FURTHER RESOLVED, that County Board of Commissioners finds that the cost of the Lake Level Project to establish and maintain the normal level of the Lakes shall be defrayed by special assessments for the benefits derived against privately owned parcels of land, political subdivisions of the state, and state owned lands.

BE IT FURTHER RESOLVED, that the Sanford Lake Preservation Association, upon approval of new bylaws including representation of all lakes, shall be the "Delegated Authority" as provided by Part 307 to act on behalf of the Board of Commissioners to oversee the Lake Level Project, to prepare a Special Assessment District and Special Assessment Roll in

accordance with the procedures set forth in Part 307, and to take all other actions as necessary and required by the delegated authority as provided in Part 307.

BE IT FURTHER RESOLVED, that attorney, Douglas A. Jacobson representing Gladwin County as to Smallwood Lake, Secord Lake, and that portion of Wixom Lake located in Gladwin County, and attorney, Lawrence Wm. Smith, Jr., representing Midland County as to Sanford Lake and a portion of Wixom Lake located within Midland County, are appointed as joint-legal counsel for the Lake Level Project, and are directed to initiate a petition or other appropriate legal action in the appropriate Circuit Court(s) in Midland and/or Gladwin County for the determination of the legal lake level and the approval of boundaries of the Special Assessment District in accordance with the procedures set forth in Part 307 and said counsel may obtain the assistance of additional counsel where appropriate; and to assist the Delegated Authority with the Project and procedures as set forth in Part 307.

BE IT FURTHER RESOLVED, that the Spicer Group, Inc., is appointed as the engineer for the Lake Level Project, to prepare a preliminary study and/or reports required for the Lake Level Project, and to assist the Delegated Authority with all actions as necessary and required by the delegated authority as set forth in Part 307.

BE IT FURTHER RESOLVED, this Resolution shall not take effect unless and until the adoption of a resolution with substantially the same findings, determinations and conditions as set forth herein by the Board of Commissioners for the County of Midland, Michigan, within thirty (30) days from the date of the adoption of this Resolution.

BOARD OF COMMISSIONERS OF THE COUNTY OF MIDLAND

RESOLUTION RECOMMENDING THE FORMATION OF A CITIZEN TASK FORCE
TO PLAN TO IMPLEMENT
THE NORMAL LAKE LEVEL FOR WIXOM LAKE, SANFORD LAKE, SMALLWOOD
LAKE AND SECORD LAKE PURSUANT TO PART 307 OF THE MICHIGAN
NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT

RESOLUTION # _____

Minutes of a regular meeting of the Board of Commissioners of the County of Midland, Michigan, held at the County Services Building, 220 W. Ellsworth Street, Midland, Michigan 48640, on July 17, 2018, at 10:00 a.m., local time.

PRESENT: Commissioners Snyder, Terwilliger, Noesen
Dorrien, Geisler, Bone

ABSENT: Commissioners Glaser

The following resolution was offered by Commissioner Geisler and supported by Commissioner: Dorrien.

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake are inland lakes located in Gladwin and Midland Counties, created by the impoundment of the Tittabawassee River by four (4) hydroelectric dams which are privately owned and operated by Boyce Hydro Power, LLC ("Boyce Hydro"); and regulated by the Federal Energy Regulatory Commission ("FERC") which, among other things, includes terms and conditions concerning the water levels for each of the lakes, dam safety, property rights, water quality, public recreation and safety, and other areas of public concern; and,

WHEREAS, in the event that Boyce Hydro loses its FERC license(s) or is unable to perform its responsibilities there is no current state requirement for maintaining the lake levels or governance structure in the community to ensure that the dams and lake levels will be sustained long term.

WHEREAS, Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake, are important resources in Gladwin and Midland Counties, and the continued operation of the dams and water levels are of paramount importance to the environment, recreation, property values of lake residents, and the public and economic health of Gladwin and Midland Counties; and,

WHEREAS, Part 307 of the Michigan Natural Resources and Environmental Protection Act, "Inland Lake Levels", MCL 324.30701 et seq. ("Part 307") governs the process for the determination, establishment and maintenance of the water levels of an inland lake, and authorizes counties to finance, construct, operate and maintain dams as necessary to maintain such levels as determined by the circuit court; and,

WHEREAS, Section 30704(2) of Part 307, MCL 324.30704(2) provides that if the waters of an inland lake are located in 2 or more counties, the normal level of the lake may be determined by all counties involved, by resolution directing legal counsel of 1 or more counties to initiate proceedings by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, before proceeding with legal action to determine the normal level of the lakes under Part 307, the Midland County Board of Commissioners recommends and encourages the formation of a task force consisting of representatives from the lake associations that will interface with representatives of the Counties and other interested parties to plan for the implementation of the lake levels, including preparation of the potential assessment district boundaries, the designation of the Delegated Authority responsible, and any other issues necessary to establish and manage the normal level or levels of Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake;

NOW THEREFORE BE IT RESOLVED, that the Midland County Board of Commissioners finds that in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake, that a normal lake level or levels should be established for said lakes, pursuant to Part 307.

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends and invites the lake associations from Wixom Lake, Sanford Lake, Smallwood Lake and Secord Lake, to form a task force ("Task Force") to develop a plan, and present its recommendations for the implementation for establishing the normal levels for Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake (the "Lake Level Project").

BE IT FURTHER RESOLVED, that the County Board of Commissioners recommends and encourages the formation of a Task Force consisting of two (2) representatives from Wixom Lake Association, one (1) from Sanford Lake Association, one (1) from the Sanford Lake Preservation Association, and should they choose to participate, one (1) representative from any citizen group or lake association representing Smallwood Lake, and (1) representative from any citizen group or lake association representing Secord Lake.

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends that the Task Force meet and provide regular progress reports to the Board of Commissioners, elected representatives of the affected townships, the lake associations, and lake owners on all four lakes, and present a Final report by the end December, 2018, that addresses the following:

(1) An implementation plan for establishing the normal level for Wixom Lake, Sanford Lake, Smallwood Lake, and Secord Lake;

(2) Recommendations with respect to the potential assessment district boundaries for all four lakes;

(3) Recommendations regarding the person or entity that shall serve as the Delegated Authority as provided by Part 307, to act on behalf of the Gladwin and Midland Counties to oversee the dams and manage the lake level, prepare a potential Special Assessment District and

potential Special Assessment Roll in accordance with the procedures set forth in Part 307, and take all other actions as necessary and required by the delegated authority as provided in Part 307; and,

(4) Recommendations concerning options for the long term ownership, finance, operations, maintenance and improvement of the lake level structures; and,

(5) Recommendations on County responses to FERC, Boyce or others action, that may impact this resolutions intention.

BE IT FURTHER RESOLVED, the County Board of Commissioners recommends that the Task Force keep all stakeholders informed by establishing a "Lake Level Project Communication Forum", consisting of a county commissioner from Gladwin, a county commissioner from Midland, designated representatives from the affected townships, the Village of Sanford, the Wixom Lake Improvement Board, the Sanford Lake Improvement Board, and Secord and Smallwood Lake Associations.

BE IT FURTHER RESOLVED, that no county funds shall be used to fund the costs and expenses of the Task Force..

BOARD OF COMMISSIONERS OF THE COUNTY OF MIDLAND

RESOLUTION FOR THE DETERMINATION OF THE NORMAL LAKE LEVEL FOR WIXOM LAKE, SANFORD LAKE, SMALLWOOD LAKE AND SECORD LAKE PURSUANT TO PART 307 OF THE MICHIGAN NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT

RESOLUTION # _____

Minutes of a regular meeting of the Board of Commissioners of the County of Midland, Michigan, held at the County Services Building, 220 W. Ellsworth Street, Midland, Michigan 48640, on October 16, 2018, at 9:05 a.m., local time.

PRESENT: Commissioners Snyder, Geisler, Dorrien
Bone

ABSENT: Commissioners Glaser, Terwillegar, Noesen

The following resolution was offered by Commissioner Geisler and supported by Commissioner: Noesen.

WHEREAS, Sanford Lake, Wixom Lake, Smallwood Lake, and Secord Lake are inland lakes located in Gladwin and Midland Counties, created by the impoundment of the Tittabawassee River by four (4) hydroelectric dams which are privately owned and operated by Boyce Hydro Power, LLC ("Boyce Hydro"); and regulated by the Federal Energy Regulatory Commission ("FERC") which, among other things, includes terms and conditions concerning the water levels for each of the lakes, dam safety, property rights, water quality, public recreation and safety, and other areas of public concern; and,

WHEREAS, Sanford Lake, Wixom Lake, Smallwood Lake, and Secord Lake, are important resources in Gladwin and Midland Counties, and the continued operation of the dams are of paramount importance to the environment, recreation, property values of lake residents, and the public and economic health of Gladwin and Midland Counties; and,

WHEREAS, in the event that Boyce Hydro loses its FERC license(s) with respect to any of the Lakes, or is unable to perform its responsibilities, there is no current state requirement for maintaining the lake levels or governance structure in the community to ensure that the dams and lake levels will be sustained long term; and,

WHEREAS, Part 307 of the Michigan Natural Resources and Environmental Protection Act, "Inland Lake Levels", MCL 324.30701 et seq. ("Part 307") governs the process for the determination, establishment and maintenance of the water level of inland lake, and authorizes counties to finance, construct, operate and maintain dams as necessary to maintain such levels as determined by the circuit court; and,

WHEREAS, Section 307011 of Part 307, MCL 324.30711 provides that the County may determine that the whole or part of the cost of the project to establish and maintain the normal level for an inland lake be defrayed by special assessments for the benefits derived against privately owned parcels of land, political subdivisions of the state, and state owned lands, through the establishment of a special assessment district; and,

WHEREAS, Section 30704(1) of Part 307, MCL 324.30704(1), provides that if the County Board of Commissioners finds it expedient to have determined and established the normal level of an inland lake, the County shall direct legal counsel of the county to initiate a proceeding by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, the Sanford Lake Preservation Association, a Michigan non-profit corporation and IRC 501(c)(3) organization has raised the funds and committed to the funding of Part 307 activities through creation of an authority and special assessment districts, and will expand their bylaws to include the preservation of all four lakes, and include representation of all four Lake Associations Presidents or Delegates currently represented on a Four Lakes Task Force, and representative(s) from Midland and Gladwin County, upon this and a similar resolution from Gladwin County; and,

WHEREAS, Section 30704(2) of Part 307, MCL 324.30704(2) provides that if the waters of an inland lake are located in 2 or more counties, the normal level of the lake may be determined by all counties involved, by resolution directing legal counsel of 1 or more counties to initiate proceedings by proper petition in the circuit court for a determination of the normal level and for establishment of a special assessment district; and,

WHEREAS, in order to maintain the normal lake levels for Sanford Lake, Wixom Lake, Smallwood Lake, and Secord Lake (the "Lakes") in Midland and Gladwin Counties, the respective County Boards of Commissioners have determined that it is necessary to establish the normal level or levels of the Lakes in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around the lake.

NOW THEREFORE BE IT RESOLVED, that the County Board of Commissioners finds that in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to preserve and protect the value of property around the Lakes, that it is necessary to take all action to establish and maintain the normal lake level for each of the Lakes (the "Lake Level Project").

BE IT FURTHER RESOLVED that County Board of Commissioners finds that the cost of the Lake Level Project to establish and maintain the normal level of each of the Lakes shall be defrayed by special assessments for the benefits derived against privately owned parcels of land, political subdivisions of the state, and state owned lands.

BE IT FURTHER RESOLVED, that the Sanford Lake Preservation Association, upon approval of new bylaws including representation of all lakes, shall be the "Delegated Authority" as provided by Part 307 to act on behalf of the Board of Commissioners to oversee the Lake Level Project, to prepare a Special Assessment District(s) and Special Assessment Roll(s) in accordance

with the procedures set forth in Part 307, and to take all other actions as necessary and required by the delegated authority as provided in Part 307.

BE IT FURTHER RESOLVED, that attorney, Lawrence Wm. Smith, Jr., representing Midland County as to Sanford Lake and a portion of Wixom Lake located within Midland County, and attorney, Douglas A. Jacobson representing Gladwin County as to Smallwood Lake, Secord Lake, and that portion of Wixom Lake located in Gladwin County, are appointed as joint-legal counsel for the Lake Level Project, and are directed to initiate a petition or other appropriate legal action in the appropriate Circuit Court(s) in Midland and/or Gladwin County for the determination of the legal lake level and the approval of boundaries of the Special Assessment District in accordance with the procedures set forth in Part 307 and said counsel may obtain the assistance of additional counsel where appropriate; and to assist the Delegated Authority with the Project and procedures as set forth in Part 307.

BE IT FURTHER RESOLVED, that the Spicer Group, Inc., is appointed as the engineer for the Lake Level Project, to prepare a preliminary study and/or reports required for the Lake Level Project, and to assist the Delegated Authority with all actions as necessary and required by the Delegated Authority as set forth in Part 307.

BE IT FURTHER RESOLVED, this Resolution shall not take effect unless and until the adoption of a resolution with substantially the same findings, determinations and conditions as set forth herein by the Board of Commissioners for the County of Gladwin, Michigan, within thirty (30) days from the date of the adoption of this Resolution.

NOTICE OF PUBLIC HEARING – FOUR LAKES PROJECT

COUNTIES OF MIDLAND AND GLADWIN, STATE OF MICHIGAN

In the Matter of: Wixom Lake, Sanford Lake, Smallwood Lake and Secord Lake
Midland County Circuit Court, Case No. 19-5980-PZ

NOTICE is hereby given to that a public court hearing will be held on **Friday, May 3, 2019 at 1:30 p.m. Daylights Savings' Time, at the Courthouse for the County of Midland**, regarding Petitions filed jointly by Midland and Gladwin Counties, Case No. 19-5980-PZ. The Petitions request that the Court (1) establish and approve the boundaries of a special assessment district of property owners affected by the repair, replacement, operation, and maintenance project for Sanford Lake dam, Wixom Lake (Edenville) dam, Smallwood Lake dam and Secord Lake dam (the "Four Lakes Project"), and (2) formalize the normal summer and winter lake levels for all four lakes in accordance with Part 307 of the Michigan Natural Resources and Environmental Protection Act, Michigan Compiled Laws §§324.30701 et seq..

In October, 2018, Midland County and Gladwin County adopted Resolutions finding that in order to protect the public's health, safety, and welfare, to best preserve the natural resources of the state, and to best preserve and protect the value of property around all four lakes, that it is necessary to acquire, repair, replace, improve, operate and maintain the Sanford Lake dam, Wixom Lake (Edenville) dam, Smallwood Lake dam and Secord Lake dam in order to maintain the normal lake levels as previously established by the Federal Energy and Regulatory Commission. The Resolutions adopted by the Counties provide that the cost of the Four Lakes Project shall be defrayed by special assessments for the benefits derived against privately owned parcels of land, political subdivisions of the state, and state owned lands.

The Midland County Courthouse is located at 301 W. Main St, Midland, MI 48640. All persons interested are invited to attend this hearing.

For more information please visit the Four Lakes Task Force website at www.four-lakes-taskforce-mi.com, send us an email through the website, or call (989) 315-8366 and leave a detailed message.

¹ Pursuant to State Court Administrator's Order dated March 12, 2019, Judge Carras was also assigned to: *In the Matter of: Wixom Lake, Sanford Lake, Smallwood Lake and Secord Lake*, Case No. 19-009892-PZ, pending in the Gladwin County Circuit Court.

Appendix B

***Public Engagement &
Informational Meetings***

Four Lakes Task Force Summary of Public Engagement

Throughout the process of preparing this report, public engagement has been a primary focus. The Four Lakes Task Force has used many techniques to gather public input and testimony to help shape the recommendation of this report, specific to the legal lake level, the Four Lakes Special Assessment District, the special assessments and implementation plan.

One method to communicate information was social media including a website and a Facebook site. The Four Lakes Task Force Facebook page is <https://www.facebook.com/FourLakesTaskForce/> and the Four Lakes web site is <http://www.four-lakes-taskforce-mi.com/>. The Facebook page was created in November 2018 and has been the primary method to update the community on the status of the project and inform the public of community meetings. The Facebook analytics information shown in Appendix B, illustrates the traffic to the Facebook page. As of April 16, 2019, 19,668 unique users have viewed the page. In addition, the Four Lakes Task Force created and updates on a regular basis a website. Information found on the website includes the PowerPoint presentation presented at the public meetings, frequently asked question (FAQ) sheets, a summary regarding the Four Lakes Task Force, an interactive web map illustrating the location of the Special Assessment District boundary, summary of special assessments, resolutions from counties, notices and general information.

Multiple meetings have been held to explain the process and the goals of the Four Lakes Task Force. The first meeting was held December 4th, 2018 at the Swanton Hall in Edenville. Local government officials from townships, lake associations, and the counties were invited to discuss the options to pursue a Part 307 normal legal lake level and create the Four Lakes Special Assessment District. Table 1 in Appendix B summarizes the invitees to the meeting, as well as those who attended.

Following the local officials meeting and MDEQ, six (6) public informational meetings were held. The first meeting was held February 19th, 2019 and the final was held February 28th, 2019. The meetings were held at three venues. The dates and meeting locations can be found on the notice that was sent to all potential landowners in the preliminary Special Assessment District, located in Appendix B. Additionally landowners received a FAQ flyer which illustrated answers related to legal lake levels, Special Assessment Districts, the Four Lakes Task Force, Wixom Lake, and other topics. The public meetings consisted of a power point presentation, a question and answer period, and time for landowners to speak with the Engineers regarding specific questions to their property and the proposed Special Assessment District. The FAQ and PowerPoint presentation can be found in Appendix B.

As a result of the public meetings and interactions with the specific landowners, numerous updates were made to the preliminary Special Assessment District, including removal and additions of parcels based in testimony from landowners. Updates were only made if the landowner's claim could be verified and evidence was available to support the change. Table 2 in Appendix B summarizes the changes made to date to the Special Assessment District boundary.

In summary, based on public comment from the meetings, support letters (found in Appendix C), and Facebook comments, it appears the majority of the landowners surrounding the four lakes are in favor of a project to establish Part 307 normal legal lake levels and the Four Lakes Special Assessment District as a method to protect the lakes and ensure they are available for future generations.

April 3, 2019

To Whom it may concern,

The Secord Lake Association supports the action of Gladwin and Midland Counties and the Four Lakes Task Force, as the delegated authority in regard to the establishment of the Special Assessment District and to establish a State Lake Level in accordance with Part 307 of the Natural Resource and Environmental Protection Act of 1994 for Sanford, Edenville/Wixom, Smallwood and Secord Lakes.

A handwritten signature in black ink, appearing to read "Philip R. Dast". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Philip R. Dast, President
Secord Lake Association
3184 West River Dr.
Gladwin, MI 48624

March 19, 2019

To Whom It May Concern:

The Wixom Lake Association supports the Four Lakes Task Force efforts to petition the Circuit Court to order lake levels for Wixom Lake under Part 307 of Michigan Public Act 451 of 1994.

Sincerely,

A handwritten signature in black ink, appearing to read "Larry Woodard". The signature is fluid and cursive, with a large initial "L" and a long, sweeping underline.

Larry Woodard, President
Wixom Lake Association
P. O. Box 191
Edenville, MI 48620-0191

Smallwood Lake Association, Inc.

John Hart, President
1894 Chatham Drive
Troy, MI 48084

President-----John Hart	(248) 231-1723	E-mail: jophhart@att.net
Vice-President--Jack Dalton	(989) 426-8060	jackpatdalton@yahoo.com
Secretary-----Wanda Raymer	(989) 426-0649	wmrlar@yahoo.com
Treasurer-----Mark Mudge	(989) 426-7595	marklmudge@gmail.com

April 11, 2019

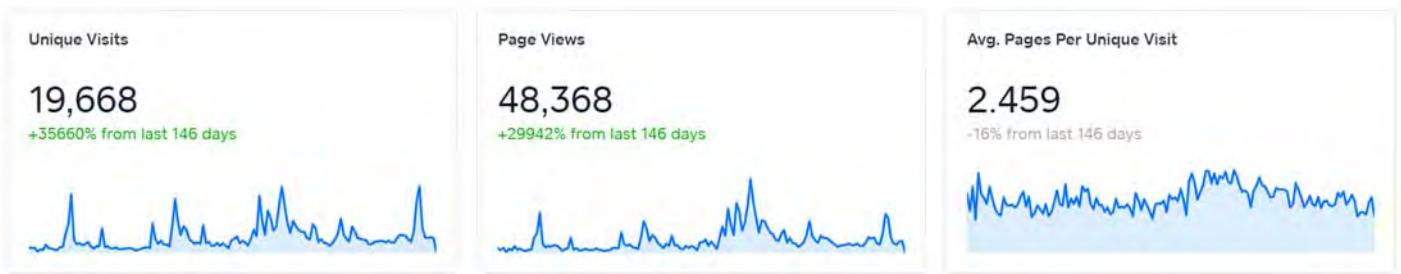

The Association supports the action of the Four Lakes Task Force as delegated authority for Gladwin and Midland Counties in regard to the establishment of a State Lake Level in accordance with Part 307 of the Natural Resource and Environmental Protection Act 451 of 1994.

Sincerely,

John Hart, President

A Sustainable Future for the Four Lakes

February 6, 2019

Dear Landowner:

You are invited to attend one of the upcoming public informational meetings for an update from the Four Lakes Task Force (Sanford, Wixom, Smallwood and Secord) on efforts to establish Michigan “Legal Lake Levels” for each lake. You have received this invitation because County tax records indicate you own property in a tentative Special Assessment District which is being proposed (as required by the Legal Lake Level process). The status of this effort will be discussed, including recommended lake elevations, tentative special assessment district boundaries, planning level cost estimates, and preliminary implementation schedule. Following the presentation will be a question/answer period, and an opportunity for you to provide input to the project engineers. You are not required to attend any of these informational meetings, but your attendance and input is welcomed, valued, and encouraged.

Below please find the dates and location for your lake's informational meeting. Choose whichever date is more convenient, the agenda and content will be the same.

Wixom Lake

Albright Shores Eagles F.O.E., 1380 Estey Road

Tuesday, February 19, 2019, 7PM – 9PM

Wednesday, February 20, 2019, 7PM - 9PM

Sanford Lake

Meridian Early College High School, Community Room, 3303 N. Meridian Road

Thursday, February 21, 2019, 7PM – 9PM

Thursday, February 28, 2019, 7PM - 9PM

Smallwood and Secord Lake

Secord Lake F.O.E., 3485 Lake Shore Drive

Sunday, February 24, 2019, 2PM – 4PM

Tuesday, February 26, 2019, 7PM – 9PM

If you are not able to attend one of the public meetings or want additional information please visit the Four Lakes Task Force website at www.four-lakes-taskforce-mi.com, send us an email through the website, or call (989) 315-8366 and leave us a detailed message, and we will follow up as soon as we can.

Sincerely,
The Four Lakes Task Force

FREQUENTLY ASKED QUESTIONS (FAQ's):

Public Information Meetings & Circuit Court Hearing

Why have I received this notice for Public Information Meetings?

- The Four Lakes Task Force invites you to attend a Public Information Meeting regarding the establishment of Michigan legal lake levels and a Special Assessment District (SAD) for Sanford, Wixom, Smallwood and Secord Lakes.
- The objective of the Four Lakes Task Force is to safeguard the lakes for future generations by establishing State of Michigan legal lake levels. By establishing these legal lake levels, the current levels will be sustained and managed locally into the future.
- You have been identified as owning property within the tentative Four Lakes Special Assessment District that has been petitioned for.
- A Map of the tentative Four Lakes Special Assessment District is available on the Four Lakes Task Force website at www.four-lakes-taskforce-mi.com.

What is a Special Assessment District?

- A Special Assessment District includes properties that would receive special assessments to pay for a particular benefit received from public projects such as lakes, drains, water lines, or roads.
- In this case, the tentative Four Lake Special Assessment District includes waterfront properties along the Four Lakes and "backlot" properties with dedicated (private easement) access. These properties benefit from sustaining the lakes now, and into the future.

What is the benefit of the Special Assessment District?

- With the establishment of State of Michigan legal lake levels and the Special Assessment District, the ownership of the Four Lakes would be transferred from Boyce Hydro to Midland and Gladwin Counties.
- The lake levels can be sustained for future generations regardless of future hydro power.
- The operation and maintenance of these lakes and dams will be controlled by a "Delegated Authority", appointed by the Counties, with representation from each lake.

Is the lake level going to change?

- No. The lakes will be managed at the same levels as they have been for the past 20-30 years.
- The State of Michigan legal lake level will match the current elevations specified by Federal Energy Regulatory Commission (FERC) licenses.
- This process is designed to formally set this lake level in the State of Michigan, rather than rely only on the existing FERC licenses to do so. Should additional FERC licenses be revoked or expire, established Michigan lake levels will provide a legal requirement that lake levels are sustained.

Who will be responsible for maintaining the lake levels?

- The Four Lakes Task Force Board will be the Delegated Authority with oversight from County Commissioners.
- The Four Lakes Task Force Board will be responsible to maintain the established lake level set by a Circuit Court Order.

A Sustainable Future for the Four Lakes

What is the purpose of the [Public Information Meetings](#), and do I have to attend?

- The intent of these meetings is to share information with the public regarding the reasons for establishment of Michigan legal lake levels and the Special Assessment District (SAD). A Question/Answer period will allow the landowners within the tentative SAD to **ask questions and offer input** on those matters.
- Details for the meetings will be mailed to all property owners in the tentative Special Assessment District, posted on the Four Lakes Task Force website, and on our Facebook page.
- You do not have to attend any of the several public information meetings. However, we encourage you to attend any of these meetings to get additional information on the status of the dams and lakes, the process going forward, and the boundaries of the tentative SAD.

What is the purpose of the [Circuit Court Hearing](#), and do I have to attend?

- You do not need to attend the hearing. However, it is your right to do so.
- The Circuit Court hearing is a formal process in which you may present **sworn testimony and evidence** to the Court regarding establishment of the legal lake elevations and the establishment and confirmation of the Special Assessment District boundaries.
- Please note that you must protest in person or by writing to reserve your right to appeal the special assessment.

When do I receive my lake level special assessment?

- It is currently estimated the first assessment would be no sooner than your 2020 winter taxes, roughly two years from now.
- Assessment amounts may vary from year to year, depending on annual cost to operate and maintain dams.

What is my tentative assessment amount?

- Preliminary, estimated assessment amounts will be available at the Public Information Meetings.
- They are also available on the website, www.four-lakes-taskforce-mi.com.
- Notices for the Public Information Meetings and a separate notice of the Circuit Court Hearing will be sent out to all property owners within the tentative Special Assessment District.

Where can I get more information?

- You can attend one of several public information meetings, visit the Four Lakes Task Force website at www.four-lakes-taskforce-mi.com, send us an email through the website, or call (989) 315-8366 and leave us a detailed message, and we will follow up as soon as we can.

Four Lakes Task Force

Public Informational Meeting

The Four Lakes

Sanford, Wixom, Smallwood and Secord

The Purpose of Meeting

- ❑ **Collect your input**
 - Please fill out our comment cards
 - Question/Answer period AFTER presentation
- ❑ Explain why the Four Lakes Task Force was formed
- ❑ Discuss common issues of the Four Lakes
- ❑ Review findings of Legal Lake Level Study
- ❑ Provide preliminary estimates of cost
- ❑ Inform of Circuit Court Hearing process
- ❑ Explain the next steps and tentative schedule

Dams and Lakes Facts

- ❑ The four dams are currently **private property** owned by the Boyce Trusts and used for Hydro-electric power generation
 - **Dams and lake bottoms are privately owned**
- ❑ Thus, in most instances, the property owners (**your**) riparian rights are limited
- ❑ Dams and water levels historically licensed and regulated by the Federal Energy Regulatory Commission (FERC)
 - **The Edenville Dam Hydro-license revoked in September 2018 for non-compliance**
- ❑ The other 3 Dam Hydro-licenses expire in 2028
 - **FERC can revoke license(s) sooner for non-compliance**
- ❑ Consumers Power contract expires in 2022

Dams and Lakes Facts

- ❑ ***FERC licenses are the only mechanism currently in place to regulate our lake levels***
- ❑ ***A Michigan Legal Lake Level is another mechanism, but we don't have this now!***
- ❑ Four Lakes Task Force is taking action to ensure lakes are sustained into the future

Four Lakes Task Force Goals

1. Lake levels maintained this year and every year into the future
 - *Enacting Michigan Part 307 Legal Lakes Levels is best avenue to accomplish this goal*
2. All dams are repaired and *become and remain compliant* with safety standards and safety requirements
3. Midland and Gladwin Counties own dams/lakes
4. A Community Authority will manage dams

Why all Four Lakes?

- ❑ Most cost effective and expedient to go through process once, rather than four times
- ❑ All the lakes have similar sustainability issues that need to be addressed now
 - All the dams have FERC compliance issues
 - Can't depend on hydro-electric to pay bills in the future
- ❑ The Dams have always been operated by one organization
 - That is the best way to operate these dams

Process to Establish A Michigan Legal Lake Level – Part 307

- ❑ Part 307 of Public Act 451 of 1994
 - Michigan Natural Resource and Environmental Protection Act allows for the enactment of Circuit Court ordered Michigan Legal Lake Levels on inland lakes
- ❑ Part 307 requires
 - ***A Delegated Authority be identified***, by Resolution of County Commissioners, to implement Part 307
 - Completion of legal lake level study by Professional Engineer to provide recommendation of ***Legal Lake Levels*** and boundary of ***Special Assessment District***
 - Order of ***Circuit Court*** to set Legal Lake Levels and Special Assessment District boundary

Part 307 Lake Level Order

- ❑ Counties named Four Lakes Task Force as their ***Delegated Authority*** to do the work for establishing legal lake levels
- ❑ Task Force created Part 307 implementation team
- ❑ Task Force has petitioned ***Circuit Court*** to establish Michigan Part 307 Legal Lake Levels for all 4 lakes
 - Same lake levels as each FERC license requires
- ❑ Establishing a Legal Lake Level requires
 - Specifying the lake level(s) based on engineering data
 - Creation of a Special Assessment District
 - Identify Delegated Authority to acquire, repair, improve, maintain and manage the dams

Hydro-electric Power Generation

- ❑ Hydro-electric generation may go away in the future due to poor economics, revocation, abandonment, or expiration.
- ❑ **Michigan Legal Lake Level provide legal requirement that lake levels will be maintained *regardless of Federal Hydro-electric License(s)*.**
- ❑ Task Force supports hydro-electric generation as long as it benefits the lake community
- ❑ The **Special Assessment District** WILL NOT invest in hydro-electric generation or FERC safety compliance
- ❑ Task Force is in negotiations with Boyce to transition to a new owner and operator for the Power Assets

Four Lakes Task Force Board

- ❑ Board is the **Delegated Authority** of Midland and Gladwin Counties by unanimous resolution, and a 501c3 Non Profit
- ❑ Board Members
 - Dave Kepler – Chair, and Sanford Lake Resident
 - Adam Beebe – Sanford Lake Association
 - Carl Kerr – Secord Lake (**Lake Association is now forming**)
 - Mark Mudge – Smallwood Lake Association
 - Dave Rothman – Wixom Lake Association
 - Don Zakett – Wixom Lake Association
- ❑ County Legal Representatives
 - Doug Jacobson, Gladwin County
 - Bill Smith, Midland County

Task Force Part 307 Implementation Team

- ❑ Engineer – Spicer Group, Inc.
 - Ron Hansen PE, PS
- ❑ Attorney – Clark Hill
 - Joe Colaianne
- ❑ Financial Expert
 - Tamara McGovern
- ❑ Communications Expert
 - Carrie Houtman

Communications Plan

- ❑ FAQ available in hard copy tonight or on website
- ❑ Website Address
 - www.four-lakes-taskforce-mi.com
- ❑ Phone Number
 - (989) 315-8366
- ❑ Facebook: *Four Lakes Task Force*
- ❑ Instagram: *foullakestaskforcemi*

Engineer's Report

- ❑ Implementation Plan and Schedule
- ❑ Legal Lake Level Study Requirement
 - Recommendation of legal or “normal” lake levels
 - Tentative Special Assessment District Boundary
- ❑ Special Assessments
 - Methods for spreading assessment
 - Estimate annual amounts
 - Anticipated timing of assessments
- ❑ Circuit Court hearing
- ❑ Next Steps

Preliminary Implementation Schedule

TASK	Estimated Start	Estimated Completion
Lake Level Hearing	April 5, 2019	April 5, 2019
Land & Easement Acquisition	April 2019	August 2019
Dam Operator	April 2019	on going
Engineering Design of Dams	May 2019	May 2020
Permitting	May 2020	September 2020
Bidding	September 2020	October 2020
Computation of Cost	October 2020	October 2020
Special Assessment Hearing	October 2020	November 2020
Financing	October 2020	January 2021
Construction of Repairs to Dams	January 2021	April 2023

Michigan Legal Lake Levels or “Normal” Elevations

- ❑ No change current levels based on FERC licenses
- ❑ Winter drawdown starts on December 15th and is achieved by January 15th
- ❑ Summer level in Spring once water temperature reaches 39°
- ❑ Water level allowed to fluctuate 0.3 feet above and 0.4 feet below normal elevations

Lake Levels per FERC Licenses		
Lake	Summer Level (NGVD 29)	Winter Level (NGVD 29)
<i>Sanford</i>	630.8	627.8
<i>Wixom</i>	675.8	672.8
<i>Smallwood</i>	704.8	701.8
<i>Secord</i>	750.8	747.8

Tentative Special Assessment District (SAD)

- ❑ Properties which front lakes
- ❑ Properties with private easement access to lake
- ❑ Includes private property, MDNR and local government property
- ❑ Maps showing properties in tentative district on web site (www.four-lakes-taskforce-mi.com)
- ❑ Maps available for review at meeting following presentation
- ❑ If you received mailed notice to this meeting, you are in the tentative SAD

Tentative Special Assessment District

Four Lakes Task Force

<i>Lake</i>	<i>Township</i>	<i>Lake Front</i>	<i>Private Easement</i>	<i>Total</i>
Sanford	<i>Edenville</i>	479	592	1071

	TOTAL	2043	69	2112
TOTAL PARCEL COUNT		6596	1861	8457

Method of Financing

- ❑ Grants and Private Funding
- ❑ Special Assessment District
 - Pays costs that are not covered by grants or private financing

Tentative Assessment Method

- ❑ Assessments will not be same for all landowners
- ❑ Assessment factor will be established for each category of land ownership

Estimated Annual Special Assessments

- ❑ Residential property owner
 - Less than 300 ft. of frontage
 - \$350 annually
 - Greater than 300 ft. of frontage
 - \$700 annually
 - Private easement and no frontage
 - \$88 annually
- ❑ Commercial, agricultural and other properties
 - Details provided on website

Special Assessments

- ❑ Not expected until 2021
- ❑ A Special Assessment Hearing will be held before and assessment are levied
 - You will receive a notice
 - Anticipated to be fall of 2020
- ❑ Final amounts provided at Hearing
 - Only estimates at this point
- ❑ There is an appeal process

Preliminary Estimate of Cost

- ❑ Planning level estimate includes budget for
 - Lake level study
 - Acquisition of dams and lakes (Lake Level Assets)
 - Dam repairs and improvements for safety requirements
 - Annual maintenance and operation of dams
 - Professional services, administration and financing
- ❑ \$20 million
 - \$5 million State grant is identified and pending
 - Pursuing additional grants and funding

Circuit Court

- ❑ Hearing date tentatively scheduled April 5, 2019
 - You will receive notice in mail
 - Also, check website and local newspapers
- ❑ Circuit Court does
 - Order establishment of Legal Lake Level
 - Order Special Assessment District
- ❑ Circuit Court does not
 - Set project cost
 - Set special assessment amount
 - Set project schedule

Four Lakes Task Force Delegated Authority

- ❑ Items Four Lakes Task Force Board and County Officials are responsible for pending Circuit Court Order
 - Scope of project and project cost
 - Assessments
 - Project schedule
 - Annual Maintenance and Operation
- ❑ Special Assessment Hearing would be required before any assessment levied
 - Landowners in SAD would be noticed
 - Earliest hearing would be Fall 2020

Questions

- ❑ Hand in comment card
- ❑ Questions will be drawn from cards collected
- ❑ Questions will be answered on website if they cannot be answered tonight.

Communications Plan

- ❑ FAQ available in hard copy tonight or on website

Four Lakes Task Force
233 E Larkin St, Ste 2
Midland MI 48640

Topic: Legal Lake Levels / Special Assessment

We are writing to support the Four Lakes Task Force recommendation to set a "Special Assessment District" and set a "Legal Lake Limit" to support the future of Sanford, Wixom, Smallwood & Secord Lakes.

As a property owner and recreational user of Wixom we need support for our property values to continue economic growth for the schools, community and local business. Leaving this situation in the current state will turn this area of Gladwin and Midland counties in to a "Ghost Town"

Please work for resolution to the current conflict as soon as possible. We are being used as a "Pawn" in a game of chess by a business that does not have any concern of what is best for the environment or local entities.

Thank you

Kurt & Ann Kelly

To: Four Lakes Task Force

Date: Thursday, April 11, 2019

Parcel Number: 030-046-000-114-00

Topic: 2019 Support Letter

I am writing this letter as a means of communicating my desire and intension of supporting the Four Lakes Task Force.

As 60 ft waterfront stakeholders, we want to enjoy lake activities like swimming, boating, and fishing. That isn't possible today with the current lake water level eight feet below the level at which we purchased our recreational get-a-way.

An additional concern is what this unacceptable water level is having on the value of our lake front property.

Hoping to enjoy the lake again this summer,

Sincerely,

Leo E. Walt

THE WATER IS NOW THIS FAR
FROM OUR BEACH AREA AND DOCK.

SW

Honorable Judge Carras,

We are writing to express our full support of The Four Lakes Task Force in their effort to enact Michigan legal lake levels for Wixom, Sanford, Secord and Smallwood Lakes. We believe that establishing legal lake levels in the four lakes will benefit all of the people who live in the lakes' communities. Families here rely on the lakes' levels for our quality of life, for the success of our businesses serving our communities and visitors, for our property values and thus our local governments' revenue. Without the enactment of Michigan legal lake levels the livelihood of all of the families in our lakes' communities will be at risk. For these reasons we ask that you rule in favor of the proposed special assessment district.

Sincerely,
Lisa Gerstacker

Re: Proposed Lake Level Order/ Wixom Lake

Dear Four Lake Task Force:

I am writing in support of the proposed Lake Level Order for Wixom Lake that will be presented to Judge Stephen Carras on May 3, 2019.

Sadly, over the past few years those who own waterfront property on Wixom Lake, those who have enjoyed boating and recreational activities on Wixom Lake, and the businesses that depend upon Wixom Lake for their livelihood have effectively been held hostage by the antics of Boyce Hydro and its Management Team.

As a waterfront property owner (5149 Wixom Drive) I fully support - and greatly appreciate - the efforts of the Wixom Lake Association and the Four Lakes Task Force. This dedicated team of individuals has worked in good faith to research, develop, and present a workable plan to return Wixom Lake to its previously enjoyed level. The special assessment - as currently presented - represents a logical and cost effective mechanism to assure the future of Wixom Lake and secure the recreational and business benefits Wixom Lake provides to the residents of Midland County, Gladwin County and the surrounding areas.

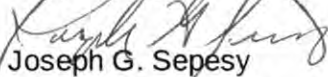

However, I am concerned that upon issuance of a Lake Level Order and the implementation of a Special Assessment there may be no safeguards to prevent Boyce Hydro or any successors or assigns from attempting to implement unreasonable fees or expenses for the operation of the Wixom Lake dams and potentially taking Wixom Lake "hostage" once again. Sadly, while the Four Lakes Task Force has negotiated in good faith in an effort to purchase the four dams (Sanford, Wixom, Smallwood, and Secord) and lake bottoms from Boyce Hydro, Boyce Hydro's recent filing with FERC requesting permission to assign the Wixom Lake dams to another operator - without ever notifying the Four Lakes Task Force - is yet one more example of the continued bad faith dealing on the part of Boyce Hydro. I would ask the Four Lakes Task Force to request and the Court to please place restrictions, controls, and mandated oversight upon Boyce Hydro (and any successors or assigns) to ensure that the fee to be charged for maintaining the Lake Level Order is both fair and reasonable.

While it has been stated by others, it is worth repeating that Wixom Lake provides numerous benefits to the surrounding community, including but not limited to:

- Tax revenue for Midland County
- Tax revenue for Gladwin County
- Employment opportunities
- Lake related/lake dependent business ventures
- Flood control for downstream communities
- Tourism revenue for the State of Michigan and its Counties
- Constructive Family activities: boating, fishing, and more
- Generations of happy memories

Wixom Lake is a treasure. My Family - like so many others - has enjoyed all the Lake has to offer. I fully support the Lake Level Order and the Special Assessment as proposed.

Respectfully submitted,

Joseph G. Sepesy

April, 2019

To Whom It May Concern,

We are in full support of the Four Lakes Task Force. They have worked very hard for us. We bought our place on Wisconsin Lake almost two years ago. If we don't have a lake, our property has no value and we would not have bought it. We bought a lake front home and pay taxes for this. We hope the local townships, Counties, cities, and even the state will help and contribute to getting our lake levels back. We hope and pray the court system will help us, too.

Thank you,
Janet and Jim
Neddermeyer

Four Lakes Task Force
233 E Larkin St., Ste. 2
Midland, MI 48640

Stryker's Lakeside Marina, Inc. would like to take this opportunity to sincerely thank all the members of the FLTF for the long hours spent working on the four lakes water issues.

It is our understanding that at the Court hearing scheduled for May 3rd there are two issues being presented to the court.

1. Are there particular properties that should, or should not, belong in the proposed special assessment district.
2. Would the proposed lake legal levels adversely affect property owners around the lakes.

We would like to see the court bifurcate the two issues. While the issue of which properties are, or are not, in the proposed special assessment district is of financial concern to all the citizens with lake access it is a moot issue if there is no lake to access. We encourage the Court to make a ruling on the 3rd that will establish the legal lake levels so that the lakes can begin to be raised immediately.

The rippling economic impact of no lake water.

The employees of Stryker's Lakeside Marina have proudly served the citizens of Midland County and Gladwin County for 35 years. The Wixom Lake water level issue has resulted in a noteworthy impact to our business this spring.

In the spring the marina typically has many employees helping customers by prepping boats out of winter storage, delivering boats, setting up docks and pumping gas. All the things that need to be done so that the boat owners can enjoy the many reasons that attracted them to lake life in the first place. We have

not been able to bring these employees back this spring because we have not had any work for them to do. Sadly, several of our employees do not have the financial ability to wait for the lake level to rise and have had to look elsewhere for work to support their families.

It is difficult to understand how our communities got into this peculiar lake level situation. Stryker's Lakeside Marina has no issue with the proposed special assessment district. We just ask that the court rule quickly to raise the water levels so that further economic impact to our community can be averted.

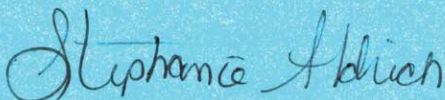

On behalf of the employees at Stryker's Lakeside Marina, we thank you for the opportunity to submit this letter for your consideration.

Sincerely,

Stryker's Lakeside Marina, Inc.

TO WHOM IT MAY CONCERN,

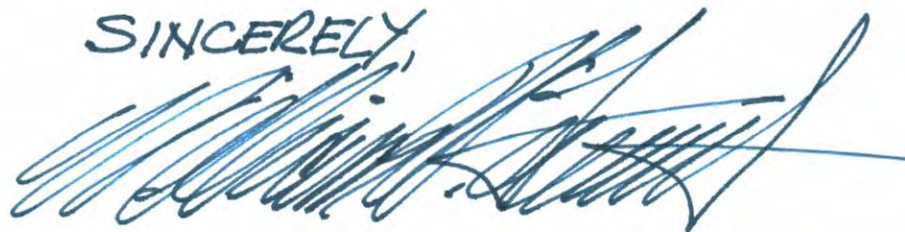

WE WOULD LIKE TO EXPRESS OUR SUPPORT OF
THE PETITIONS IN CIRCUIT COURT CASE #19-5980-P2
PRESENTED TO THE HON. STEPHEN P. CARRAS.

WE ARE STRONGLY IN FAVOR OF AND SUPPORT BOTH
PETITIONS TO ESTABLISH A SPECIAL ASSESSMENT
DISTRICT AND FORMALIZE THE NORMAL SUMMER AND
WINTER LAKE LEVELS FOR ALL FOUR LAKES MENTIONED.

WE MOVED (RETIRED) TO WIXOM LAKE FROM INDIANA
FIVE YEARS AGO AND HAVE GREATLY ENJOYED USE OF
THE LAKE IN SUMMER AND WINTER. IT IS DISHEARTENING
TO SEE THE LAKE AT THIS LOW LEVEL AND WE LOOK
FORWARD TO HAVING ITS RETURN TO A NORMAL LEVEL.

THANK YOU FOR ALL THE TIME AND RESOURCES
SPENT ON BEHALF OF OUR LAKES.

SINCERELY,

WILLIAM & KATHLEEN FAUST

April 16, 2019

Dear Four Lakes Team,

My wife and I would like to thank you for all of the great work that you are doing to attempt to resolve our water level issues. We fully support your team and your efforts to litigate on our behalf.

It is not at all acceptable that Boyce Hydro is playing games with ~8000 parcel owners and the local businesses that 100% rely on our waterways. They are trying to hold us all hostage only to benefit their financial interests. In the process of playing these games, they were not even wise enough to realize that they would awaken a hornet's nest of federal, state and local regulatory agencies that turned this into a very complex situation. Shame on them!

We sincerely hope that the courts are supportive of the people and businesses most impacted. Please let us know if there is anything that we can do to help!

Many regards,

Midland, MI 48640

I am writing to support the Four Lakes Task Force and its efforts to establish legal lake levels. I am grateful this group had the foresight and the resources to establish itself as a voice for our communities.

I have lived on Sanford Lake for 16 years. My wife and I raised our children with the benefits of all the lake has to offer: beautiful views, numerous water fowl, Bald Eagles, fishing, swimming and boating. For years we have entertained our friends and family at the lake (some from as far away as Germany).

We have some of the region's best natural, recreational and economic assets at stake. I support the FLTF in its effort to make our lake system sustainable for future generations and to end the environmental abuses perpetrated by Boyce Hydro.

Four Lakes Task Force
233 E Larkin St., Ste. 2
Midland, MI 48640

I am writing to support the Four Lakes Task Force and its efforts to establish legal lake levels. I have lived on Sanford Lake for most of my life; my family has owned property around (and under) the lake for over 100 years!

I fully support the work the Four Lakes Task Force has undertaken to ensure we can enjoy the lakes for the next 100 years! I find it astonishing that our dams have been entrusted (with little accountability) to a private entity that has proven for decades that it was not complying with regulations. I believe the FLTF is acting in the best interest of our communities to preserve the lake system for future generations.

Please feel free to contact me if any further information or action is needed.

Kindest Regards,

A handwritten signature in cursive script that reads "Sue LaBonville".

BILLINGS TOWNSHIP, GLADWIN COUNTY

April 9, 2019

To whom it may concern:

The Board of Trustees of Billings Township, Gladwin County, supports the efforts of the Four Lakes Tax Force to enact the Michigan Part 307 Legal Lake Levels for Wixom Lake and the other three lakes (Smallwood, Secord and Sanford), in the proposed special assessment district.

Wixom Lake makes up a large portion of Billings Township. More than half of the properties in the township, approximately 1,760 units, fall within the proposed special assessment district. If the legal lake level order is not granted, it will have a MAJOR economic impact on the local businesses, the Township and the County.

Because of the Wixom Lake drawn down that took place in the fall, the lake is unusable for recreational purposes for its residents and the general public. With the water level low none of the boat ramps leading to the lake and rivers are usable, making the lake unusable.

The Board of Trustees of Billings Township urges the Court to approve the Four Lakes Task Force petition quickly so that the water levels can be restored and relieve the property owners and businesses the distress caused by the current situation.

Sincerely

Tim Mester,
Supervisor

April 22, 2019

Hon. Stephen P. Carras
Circuit Court for the County of Midland
State of Michigan

To the Hon. Stephen Carras,

I am writing today to make known my support for the Petitions request filed jointly by Midland and Gladwin Counties, Case No. 19-5980-PZ. I support the establishment and approval of boundaries of a special assessment district of property owners affected for the purpose of repair, replacement, operation and maintenance project known as the Four Lakes Project. I also support to formalize normal lake levels for all four lakes in accordance with Part 307 of the Michigan Natural Resources and Environmental Protection Act.

I am a life-long resident of Sanford Lake, as well as being the current township Supervisor. I am well aware of the history of Boyce Hydro and how their actions or inactions have affected our community. I have closely followed the situation over the years and have experienced first-hand the impact due to loss of water in the lake. While the frustration and inconvenience for property owners is immense, as Supervisor, I am greatly concerned that the potential impact of an extended loss of lake water would result in a significant tax adjustment that will severely impact the entire Township of Jerome. This loss of tax revenue would affect many functions and services that we currently have within our township budget, perhaps permanently.

Therefore I wish to reiterate my full support for the Petition listed above and brought forward by Four Lakes. I am asking that you approve the project, which will not only protect the properties along the lake, but also protect the financial stability of the entire Township of Jerome.

Thank you for your consideration in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Mike Wood".

Mike Wood
Jerome Township Supervisor

Secord Township
1507 Secord Dam Rd
Gladwin MI 48624
989-426-7445
www.secordtownship.org

April 9, 2019

Secord Dam is located in Secord Township and holds back the waters of the Tittabawassee River. The Township of Secord supports the actions of Gladwin and Midland Counties along with the Four Lakes Task Force as the delegated authority in regard to the establishment of the special assessment district and to establish a state lake level in accordance to Part 307 of the Natural Resource and Environmental Protection Act of 1994 for Sanford, Edenville/Wixom, Smallwood and Secord Lakes.

Colin Combs
Secord Township Supervisor

Tobacco Township

Gladwin County, Mi

April 8, 2019

To Whom it may Concern:

Tobacco Township (Township), Gladwin County, Michigan **STRONGLY** supports the petition by Gladwin County's Delegated Authority, known as the Four Lakes Task Force (Task Force), to enact Michigan Part 307 Legal Lake Levels and the proposed boundary of a Special Assessment District for Wixom, Smallwood, Secord, and Sanford Lakes.

Tobacco Township contains the entire western arm of Wixom Lake, extending from the Dam in Edenville, to the upstream boundary of Wixom Lake on the Tobacco river. A small portion of the Township extends east of M-30 in the vicinity of the Dam. The Task Force has provided regular and detailed updates on the progress of the Part 307 process to Township officials and residents. The Task Force Part 307 engineering study identifies over 1000 Tobacco Township properties contained within the proposed Special Assessment District.

As the Court is aware, last Fall, Wixom Lake was drawn down by the Dam owner, to levels not seen in many decades and is now being held at eight feet (8') below the normal summer level. This renders Wixom Lake substantially unusable for recreational purposes by our residents and the public, and is causing great controversy and potential harm to the local economy.

Tobacco Township urges the Court to quickly approve the Task Force petition which will begin to alleviate the distress and economic harm now facing our Community, and reestablish sustainable recreational, and economic opportunities for both local residents and the visiting public.

Sincerely, Tobacco Township Board

FERC Licenses

85 FERC ¶ 61,063

UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

Before Commissioners: James J. Hoecker, Chairman;
Vicky A. Bailey, William L. Massey,
Linda Breathitt, and Curt Hébert, Jr.

Wolverine Power Corporation) Project No. 10808-000

ORDER ISSUING ORIGINAL LICENSE

(Issued October 16, 1998)

Wolverine Power Corporation (Wolverine) filed applications under Part I of the Federal Power Act (FPA) for original licenses for the continued operation and maintenance of four unlicensed hydroelectric projects located on the Tittabawassee River in Gladwin and Midland Counties, Michigan. Beginning furthest downstream, the projects are: the 3.3-megawatt (MW) Sanford Hydroelectric Project No. 2785, the 4.8-MW Edenville Project No. 10808, the 1.2-MW Smallwood Project No. 10810, and the 1.2-MW Secord Project No. 10809.

We issued a license for the Sanford Project No. 2785 in 1987. 1/ Rehearing requests of the license order have been held in abeyance while we analyzed all four projects together. 2/ We stayed parts of the license order for the same reason. In 1989, Wolverine filed license applications for its Edenville, Smallwood, and Secord Projects.

We are concurrently issuing an order on rehearing of the Sanford Project license, and orders issuing licenses for the other three projects. This order issues the license for the Edenville Project No. 10808 and, in addition, addresses issues common to all four projects.

BACKGROUND

Each project includes a dam and reservoir, and a powerhouse that is integral to the dam. The four projects' reservoirs occupy about 39 river miles on the Tittabawassee River, with the tailwater of each project being the headwater of the next downstream project. From Sanford Dam, the most downstream project, the river flows 35 miles to its confluence with the

1/ 41 FERC ¶ 62,192.

2/ The four projects comprise a single unit of development. See Section 3(11) of the FPA, 16 U.S.C. § 796(11).

-2-

Shiawassee, where they form the Saginaw River. 3/ The projects, which have been in existence since the 1920s, are operated in coordinated fashion to optimize peak demand period (i.e., weekdays from 7:00 a.m. to 10:00 p.m.). Historically, Wolverine has drawn down the reservoirs from three to four feet in the late winter to maximize the benefits of winter generation and to minimize spilling during spring snowmelt run-off. The reservoirs are refilled to normal pool elevations before water temperatures reach levels that stimulate northern pike spawning.

In 1976, the Commission determined that the Tittabawassee River is a navigable waterway of the United States and that therefore Wolverine's four projects are required to be licensed by Section 23(b)(1) of the Federal Power Act (FPA). 4/

In 1983, Wolverine filed its license application for the Sanford Project No. 2785, and in 1987 it was issued a license. 5/ Wolverine, the Dow Chemical Company (Dow), and the City of Midland, Michigan (Midland), filed requests for rehearing 6/ of the license order; and on January 28, 1988, the Commission stayed certain license articles, pending action on the rehearing requests. 7/

On July 24, 1989, Wolverine filed license applications for its Edenville Project No. 10808, Smallwood Project No. 10810, and Secord Project No. 10809. The applications do not propose any new construction or redevelopment. Notice of the applications was issued, and the State of Michigan Department of Natural Resources (Michigan DNR), the U.S. Department of the Interior (Interior), Donald J. Maladecki, and Terry Whittington filed timely motions to intervene in the three licensing proceedings; the Wixom Lake Association intervened only in this proceeding. Maladecki and Whittington, local residents and recreational users of the project reservoirs, and the Wixom Lake Association state that large fluctuations of reservoir levels adversely affect

3/ The Saginaw River flows 27 miles to where it enters Lake Huron's Saginaw Bay.

5/ 41 FERC ¶ 62,192.

6/ Wolverine, Midland and Dow's pleadings were filed as appeals of staff action. See 18 C.F.R. § 385.1902 (1987) (converting pending appeals to rehearing requests).

7/ 42 FERC ¶ 61,192. The Commission stayed license Articles 401, 402, and 404, which contain requirements regarding the project's mode of operation.

Project No. 10808-000

- 3 -

boaters and lake-front residences, and ask that any license issued limit such fluctuations.

The Commission staff prepared an Environmental Assessment (EA) that evaluates the impacts of all four projects on the environmental resources of the area. ^{8/} This order addresses, among other matters, issues of pertinence to some or all of the four projects, notably including mode of operation, fluctuation of reservoir levels, and fish entrainment. As described in the rehearing order for the Sanford Project, we are making revisions to that order based on the information and recommendations in the EA.

We have fully considered the motions and comments received from interested agencies and individuals in determining whether to issue this license.

PROJECT DESCRIPTION

The Edenville Project, the second project as one travels upstream, is located just upstream of the point where the Tobacco River enters the Tittabawassee. The project dam, which consists of three sections totaling about 6,600 feet in length and having a maximum height of 54.5 feet, spans both the Tittabawassee and Tobacco Rivers, creating a 2,600-acre reservoir (Wixom Lake) with a 49-mile shoreline at full pool. There is a 50-foot-long intake leading to the powerhouse, which is located at the dam and has an installed capacity of 4.8 MW. The project creates a 0.4-mile bypassed reach on the Tobacco River that extends from the dam to the point where the Tobacco meets the Tittabawassee. A more detailed project description is contained in Ordering Paragraph B(2).

WATER QUALITY CERTIFICATION

Section 401(a)(1) of the Clean Water Act (CWA) ^{9/} requires an applicant for a federal license or permit for any activity which may result in a discharge into navigable waters of the United States to provide to the licensing or permitting agency a certification from the state in which the discharge originates that such discharge will comply with certain sections of the CWA.

^{8/} A draft EA was issued March 31, 1994; the final EA was issued August 14, 1998.

^{9/} 33 U.S.C. § 1341 (1988).

Project No. 10808-000

-4-

If a state fails to act on a request for certification within one year, the certification requirement is waived. 10/

Wolverine requested Section 401 water quality certification from Michigan DNR for the Secord, Smallwood, and Edenville Projects by letters dated November 2, 1987. 11/ Michigan DNR failed to act on those requests within one year of their receipt. 12/ Therefore, in accordance with the provisions of the CWA and the Commission's regulations, 13/ the State of Michigan waived the certification requirements of Section 401. 14/

SECTION 18 FISHWAY PRESCRIPTION

Section 18 of the FPA 15/ provides that the Commission shall require the construction, maintenance, and operation by a licensee of such fishways as may be prescribed by the Secretary of Commerce or the Interior, as appropriate.

By letter dated April 14, 1993, Interior asked that the Commission reserve Interior's authority to prescribe fishways for the Secord, Smallwood, and Edenville Projects. Consistent with our practice, we are therefore including a condition in each of the three licenses (Article 405 in this license) that reserves our authority to require such fishways as Interior may prescribe pursuant to Section 18 of the FPA.

10/ 33 U.S.C. § 1341(a)(1) (1988).

11/ See letters for each project dated November 2, 1987, from Wolverine to Michigan DNR.

12/ See letters for each project dated July 31, 1989, and filed August 7, 1989, from Michigan DNR to Wolverine. The letters acknowledge that Michigan DNR received the certification requests and began processing them. The letters, which were filed over 18 months after Wolverine's certification requests, purport to "conditionally deny" the requests. Such attempts, coming more than a year after receipt of the requests, are however not valid.

13/ See 18 C.F.R. § 4.38(e)(2) (1989); and 4.38(f)(7)(ii) (1998).

14/ As discussed in the Sanford Project license order, Section 401 certification for the Sanford Project was also waived. 41 FERC at p. 63,408.

15/ 16 U.S.C. § 811.

Project No. 10808-000

- 5 -

ENDANGERED SPECIES

No federally listed endangered animal species are known to occur in the project area. Bald eagles (federally listed as threatened) are known to forage along the Tittabawassee River, Sanford Lake, and probably Smallwood Lake. There are three known nesting sites in the vicinity of the projects, but there are no known bald eagle nests on project lands. ^{16/} Pursuant to Section 7(a) of the Endangered Species Act, ^{17/} the U.S. Fish and Wildlife Service (FWS) has notified the Commission that, if the licenses require the preparation of a bald eagle protection plan, the projects, as licensed, are not likely to adversely affect the bald eagle. ^{18/} We have included the requested conditions in all four licenses.

RECOMMENDATIONS OF FEDERAL AND STATE FISH AND WILDLIFE AGENCIES**A. Section 10(j) Recommendations**

Section 10(j)(1) of the FPA ^{19/} requires the Commission, when issuing a license, to include license conditions, based on recommendations of federal and state fish and wildlife agencies submitted pursuant to the Fish and Wildlife Coordination Act, for the protection of, mitigation of adverse impacts to, and enhancement of fish and wildlife resources (including related spawning grounds and habitat) affected by the project.

If the Commission believes that any such recommendation may be inconsistent with the purposes and requirements of Part I of the FPA or applicable law, ^{20/} Section 10(j)(2) requires the

^{16/} See EA at 47-48, and January 10, 1995 letter from FWS to the Commission, filed January 17, 1995.

^{17/} 16 U.S.C. § 1536(a).

^{18/} See January 10, 1995 FWS letter, n. 16, supra. The plan must include completion of bald eagle surveys of the project areas, protection of perch trees on project lands, and measures to protect eagle habitat on project lands. FWS also recommends, and the licenses require, that reservoir fluctuations be minimized as proposed in the EA.

^{19/} 16 U.S.C. § 803(j)(1).

^{20/} Any such inconsistency is usually with the Commission's determinations under the equal consideration/comprehensive development standards of FPA Sections 4(e) and 10(a)(1), in that the recommendation conflicts unduly with other project
(continued...)

Project No. 10808-000

-6-

Commission and the agencies to attempt to resolve any such inconsistency, giving due weight to the recommendations, expertise, and statutory responsibilities of such agencies. If the Commission then does not adopt a recommendation, it must explain how the recommendation is inconsistent with applicable law and how the conditions selected by the Commission adequately and equitably protect, mitigate damages to, and enhance fish and wildlife.

Michigan DNR and Interior submitted ten recommendations for inclusion in the Edenville, Smallwood, and Secord Project licenses that we have considered under Section 10(j): (1) run-of-river operation of the projects; (2) continued flow releases through the project during project shut-downs; (3) a gaging plan to monitor project operation; (4) establishment of target reservoir elevations and limitation on reservoir fluctuations to +/-0.2 feet; (5) maintenance of state water quality standards for temperature and dissolved oxygen (DO), and development of a monitoring plan; (6) a bald eagle protection plan; (7) a habitat protection plan for state-listed threatened or endangered species; (8) a nuisance flora monitoring and control plan; (9) a wildlife management and land use plan; and (10) an erosion control plan. In addition, Michigan DNR recommended minimum flow releases for the Tobacco River bypass reach. 21/

We have included conditions in the Edenville license consistent with six of the recommendations and portions of two others: (1) a gaging plan to monitor project operation

20/ (...continued)

purposes or values (including the project's economic benefits). See, e.g., Mead Corp., 72 FERC ¶ 61,027 at p. 61,071 (1995).

21/ The agencies submitted five other recommendations that we do not consider under Section 10(j), because they are not specific measures to protect, mitigate damages to, or enhance fish and wildlife. See, e.g., Mead Corp., 72 FERC ¶ 61,027. These recommendations are: (1) a turbine entrainment and mortality study; (2) a reservation of authority to Michigan DNR to order changes in project operations and facilities; (3) a reservation of authority to Michigan DNR to order preparation of an upstream fish passage plan; (4) a plan for recreation facilities; and (5) a plan for studying the costs of decommissioning and partial or complete project removal. We instead consider these recommendations under Section 10(a) of the FPA.

Project No. 10808-000

-7-

(Article 406); 22/ (2) establishment of target reservoir elevations (Article 404); (3) maintenance of state water quality standards for dissolved oxygen (DO) and temperature downstream of the project, 23/ and development of a related monitoring plan (Article 402); (4) a bald eagle protection plan (Article 407); (5) a nuisance flora monitoring and control plan (Article 408); (6) an erosion control plan (Article 401); (7) a wildlife management and land use plan (Articles 404 and 407); 24/ and (8) minimum flow releases for the Tobacco River bypass reach (Article 403). 25/

The Section 10(j) recommendations that we decline to adopt for the four projects are discussed below. 26/

22/ The agencies asked for a gaging plan to monitor run-of-river operation. Although we do not adopt the run-of-river recommendation, we require the licensee to establish a gaging plan to monitor the mode of operation required by the licenses.

23/ We do not adopt the portion of this recommendation that would require the licensee to not warm the river downstream of each impoundment greater than five degrees Fahrenheit above the temperature upstream.

24/ As explained in the EA, the limitations in this license on reservoir fluctuations (Article 404) and the bald eagle protection measures of Article 407 will fulfill the intent of this plan. EA at 116.

25/ With the exception of the project-specific minimum flows to the Tobacco River bypassed reach, we have included the same conditions in the Sanford, Smallwood, and Secord licenses.

Wolverine objects to providing minimum flows in the Tobacco River bypassed reach. However, as explained in the EA at 33-34, the reach contains high-quality habitat characteristics relative to other potential or existing riverine habitat at the projects, and with sufficient flows could provide quality spawning and rearing habitat for smallmouth bass and walleye.

26/ Commission staff, Michigan DNR, and FWS met on August 9, 1994, to attempt to resolve staff's preliminary determinations of inconsistencies. A summary of that meeting is attached to the EA.

1. Mode of operation

Wolverine proposed to release a minimum flow of 120 cfs from Sanford Dam and to continue daily peaking operations at all of its projects. The agencies, on the other hand, recommended that the projects' operations be changed to run-of-river.

As explained in the EA, although run-of-river operations would provide the greatest environmental benefits, such a requirement is inconsistent with the Commission's balancing of beneficial public uses of the waterway under Sections 4(e) and 10(a)(1) of the FPA. ^{27/} Run-of-river operations at the projects would have a substantial adverse effect on the projects' economics without providing corresponding resource benefits. ^{28/} As explained in the EA, establishing reservoir elevations, limiting reservoir fluctuations, and providing minimum flows at the Sanford Project and in the Tobacco River bypassed reach will protect the resources at a cost that is significantly less than the cost of run-of-river operations. ^{29/} Furthermore, we find that the affected environmental resources can be adequately protected and enhanced by requiring Wolverine to provide minimum flows below Sanford Dam and by limiting reservoir fluctuation in all four reservoirs.

2. Continuous Instream flow

The recommendation by FWS to pass river inflows through the four projects during normal operating shutdowns effectively results in run-of-river operations, which, as explained above, is inconsistent with the Commission's balancing of beneficial public uses of the waterway under Sections 4(e) and 10(a)(1) of the FPA.

Because each of the tailrace areas is dominated by backwater effects of the downstream reservoirs and because fish are highly mobile, the effect of the fluctuations on adult and juvenile fish is probably small. Tailrace fluctuations may have more significant effects on fish spawning habitat by dewatering spawning sites that may occur in channel margins, particularly for walleye.

Reducing reservoir water level fluctuations would stabilize the backwater in the tailrace area of each of the three projects. Stabilizing the backwater would reduce the range of dewatering and thereby enhance habitat conditions in the tailrace zone.

^{27/} See EA at 97.

^{28/} Id. at 18-35, 79-97, and 109-115.

^{29/} Id.

However, we conclude that continuous instream flows in the Tittabawassee River channel downstream from the Secord, Smallwood, and Edenville dams are not necessary to protect the aquatic resources of the Tittabawassee River. Our requirement for a reduced range of reservoir fluctuations (0.4 foot above and 0.3 foot below the normal pool elevation) at each project will stabilize the backwater and enhance aquatic habitat in the tailrace areas.

3. Temperature change standard

Michigan DNR recommended that Wolverine maintain state standards for DO and temperature downstream of the projects and in addition that Wolverine not warm the Tittabawassee River downstream from each impoundment by more than 5°F (2.8°C) above the temperature of the water entering the impoundment.

As we have explained in other proceedings, 30/ since fish living downstream of a project are affected by water temperatures in their local habitat rather than by any differences between the temperature there and the upstream temperature, there is no substantial evidence to support imposing this standard on these projects.

4. Habitat protection plan for listed species

As explained in the EA, 31/ there are no known resident federal- or state-listed species or critical habitat for such species on project lands, and Michigan DNR has provided no persuasive evidence to support this recommendation. 32/

B. Other Recommendations and Resource Issues

1. Project Retirement

Michigan DNR requests that Wolverine be required to develop and implement a plan to study the costs of: (a) permanent nonpower operation, (b) partial project removal, and (c) complete project removal at each project. Michigan DNR also recommends that, based on the results of the study, Wolverine post a bond to cover the cost of eventual project retirement.

30/ See Mead, 76 FERC ¶ 61,352.

31/ EA at 115-16.

32/ In the event that such species occur on project lands or become listed in the future, a management plan and agency-recommended enhancement measures could be required through the standard reopener articles.

Project No. 10808-000

-10-

Project retirement and dam removal were considered in the EA. 33/ However, since no participant has proposed dam removal, these alternatives were eliminated as reasonable alternatives requiring further study.

The Commission will not generically impose retirement funding requirements on licensees. 34/ However, the licensee is ultimately responsible for meeting a reasonable level of retirement costs when the project is retired. Because there are no data to suggest that the Tittabawassee River projects are in poor physical condition or have marginal economics such that the projects would not remain viable throughout the term of the license, there is no reason to require the establishment of a trust fund.

2. Recreation facilities

Since the construction of the project impoundments in the 1920's, Wolverine's four reservoirs have provided surface water recreation resources for several counties and have seen rapid growth in recreational use. Both Wolverine and Michigan DNR propose recreation facility improvements. 35/ The three project licenses accordingly require that Wolverine develop, in consultation with Michigan DNR, a recreation plan that includes fishing piers, fishing accesses, and canoe portages for each of the projects. 36/

3. Entrainment and mortality studies

Approximately 20 to 25 fish species are known to inhabit the Tittabawassee River in the projects' area, and up to 70 species may inhabit the entire Tittabawassee River. 37/ Michigan DNR

33/ The Commission's position on project decommissioning is set forth in its December 14, 1994 Policy Statement. FERC Statutes and Regulations, Preambles 1991-June 1996 ¶ 31,011 (1994).

34/ Id.

35/ See EA at 60-70.

36/ The required facilities are those proposed by Wolverine.

The Sanford Project license contains a more general recreation plan requirement.

37/ See EA at 24-25. Primary gamefish inhabiting the Tittabawassee River include northern pike, muskellunge,
(continued...)

Project No. 10808-000

-11-

describes the fisheries in the project reservoirs as "excellent" to "very good," with "good" populations and "above average" growth rates.

The Michigan DNR recommends that Wolverine conduct additional turbine entrainment and mortality studies at each of the projects and evaluate all potential protection devices.

Wolverine conducted limited entrainment studies at the Sanford and Edenville Projects in consultation with Michigan DNR. While additional studies could produce more precise study results, the results provide sufficient information to indicate that juvenile and adult entrainment and mortality at the projects are generally low, and that these losses are likely to have no substantial adverse effects on the resident fish populations at these projects. 38/

In the draft EA, staff recommended annual funding for compensatory mitigation in an amount equal to the replacement costs of the fish killed: \$550 at Secord, \$3,530 at Smallwood, \$840 at Edenville, and \$3,830 at Sanford (adjusted to reflect changes in the CPI), and that resource enhancement plans be developed for the use of these funds. After the draft EA was issued, the U.S. Court of Appeals for the District of Columbia Circuit in City of New Martinsville v. FERC, held that entrainment losses that have no appreciable impact on fish populations do not constitute losses to the fishery can hardly be characterized as losses to the fishery for which mitigation is justifiable. 39/ Since the EA found no appreciable adverse impact on fish populations at the projects, resource compensation will not be required at the Edenville, Secord, and Smallwood Projects. 40/

37/ (...continued)
walleye, yellow perch, largemouth bass, smallmouth bass, white crappie, black crappie, bluegill, pumpkinseed, rock bass, channel catfish, and bullhead catfish. Chinook salmon, walleye, white bass, and lake sturgeon have spawning runs from Saginaw Bay into the Tittabawassee River. The river downstream from Sanford Dam is an important spawning area for walleye from Saginaw Bay.

38/ See EA at 37-40.

40/ Article 403 of the Sanford Project license, which requires Wolverine to monitor turbine entrainment and mortality at
(continued...)

4. Reservations of Authority to Michigan DNR

Michigan DNR recommends that we include conditions in each license that reserve to it the authority to order changes in project operations and facilities and to order preparation of an upstream fish passage plan. While we decline to yield our authority over post-licensing proceedings, 41/ Michigan DNR is free to file a request for such measures, should circumstances so warrant in the future. 42/

5. Winter draw-downs

In response to comments received from landowners and local entities, we are requiring that Wolverine draw down the projects' reservoirs in early-winter to no more than three feet below the target elevations. This will prevent ice damage to shoreline recreation and erosion control structures, allow residents to maintain and repair these structures, and reduce uncontrolled spill events that contribute to flooding. 43/

40/ (...continued)
the Sanford Project, was not raised as an issue on rehearing and therefore remains unchanged.

41/ See, e.g., Commonwealth of Pennsylvania v. FERC, 868 F.2d 592, 599-600 (3rd Cir. 1989).

42/ Standard Article 15 of Form L-3, 54 FPC 1817 (1975), states that:

[t]he licensee shall, for the conservation and development of fish and wildlife resources, construct, maintain, and operate, or arrange for the construction, maintenance, and operation of such reasonable facilities, and comply with such reasonable modifications of the project structures and operation, as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project or part thereof is located, after notice and opportunity for hearing.

43/ See EA at 35-36, 48-51, 69-70, and 75.

COMPREHENSIVE PLANS

Section 10(a)(2)(A) of the FPA 44/ requires the Commission to consider the extent to which a project is consistent with federal or state comprehensive plans for improving, developing, or conserving a waterway or waterways affected by the project. 45/ Of the comprehensive plans filed with the Commission, the Commission staff identified and reviewed two that are relevant to the Edenville Project. 46/ No conflicts were found.

COMPREHENSIVE DEVELOPMENT

Sections 4(e) and 10(a)(1) of the FPA require the Commission, in acting on applications for license, to give equal consideration to the power and development purposes and to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife, the protection of recreational opportunities, and the preservation of other aspects of environmental quality. Any license issued shall be best adapted to a comprehensive plan for improving or developing a waterway or waterways for all beneficial public uses. The decision to license this project, and the terms and conditions included herein, reflect such consideration.

The EA analyzed the effects associated with the issuance of an original license for the existing Edenville Project. It recommends a number of measures to protect and mitigate environmental resources, which we adopt, as discussed herein. These measures will improve the fish and wildlife resources through seasonal minimum flow releases, limit reservoir fluctuations, and enhance recreational resources in the project area.

The electricity generated from renewable water power resources will be beneficial, because it will continue to offset the use of fossil-fueled, steam-electric generating plants, thereby conserving nonrenewable resources and reducing atmospheric pollution.

44/ 16 U.S.C. § 803(a)(2)(A).

45/ Comprehensive plans for this purpose are defined at 18 C.F.R. § 2.19 (1998).

46/ Michigan's State Comprehensive Outdoor Recreation Plan - Building Michigan's Recreation Future: the 1985-1990 Michigan Recreation Plan; U.S. Fish and Wildlife Service's North American Waterfowl Management Plan.

One of the public interest factors the Commission considers is the economic benefits of project power. Under our approach to evaluating the economics of hydropower projects, as articulated in Mead Corp., 47/ we employ an analysis that uses current costs to compare the costs of the project and likely alternative power, with no forecasts beyond the license issuance date concerning potential future inflation, escalation, or deflation. The basic purpose of the analysis is to provide a general estimate of the potential power benefits and the costs of a project, and reasonable alternatives to project power. The estimate helps to support an informed decision concerning what is in the public interest with respect to a proposed license.

In making our decision, we consider the project power benefits both with the applicant's proposed mitigation measures and with the Commission's proposed recommendations to the applicant's proposal. In addition, certain economic factors related to project decommissioning impinge on the decision to issue original licenses for existing projects that are not present in the licensing of unconstructed projects. If an existing project is not issued a license, or if its licensee declines to accept the license, the project generally will have to be retired in one form or another. This could range from simply removing the generator at the powerhouse to major environmental restoration varying from minor measures to dam removal.

As licensed by the Commission, the Edenville Project will produce an average of about 15.625 GWh of energy, at an annual cost of about \$239,000 (15.3 mills/kWh). The current annual value of the project's power would be \$686,000 (43.9 mills/kWh). 48/ To determine whether the project is currently economically beneficial, we subtract the project's cost from the value of the project's power. Thus, the project, as licensed by the Commission would have a net benefit of about \$447,000 (about 28.6 mills/kWh).

As explained in Mead, the economic analysis is by necessity inexact, and project economics is only one of many public interest factors considered in determining whether or not, and under what conditions, to issue a license. Wolverine is

47/ 72 FERC ¶ 61,027 (1995).

48/ We base this value on the cost of alternative resources, which in this case is the cost of a new combined cycle and simple cycle combustion turbine plants, the regional cost of natural gas, and peak and off-peak energy values. The estimate of the value of project power is more completely described in the MEA.

ultimately responsible and best able to determine whether continued operation of the existing project, with the conditions adopted herein, is a reasonable decision in these circumstances.

Based on our review of the comments on this project filed by agencies and the public, our review of the staff's evaluation of the environmental and economic effects of the project and its alternatives, and our analysis pursuant to Sections 4(e) and 10(a)(1), we find that the Edenville Project, with our mitigative measures, will be best adapted to the comprehensive development of the Tittabawassee River for beneficial public uses.

LICENSE TERM AND ANNUAL CHARGES

The license applications for the Secord, Smallwood, and Edenville Projects propose no new construction or redevelopment. In accordance with Commission policy, the licenses for these projects will be issued for prospective 30-year terms. ^{49/} We will however condition the licenses upon payment of an additional amount equivalent to the charges that would have been collected, had Wolverine obtained licenses for the projects in a timely manner. ^{50/} Because the projects were constructed on a navigable waterway before 1935, and because there was no specific finding of navigability as to the Tittabawassee River prior to April 1, 1962, then, consistent with Commission policy, charges will be assessed for the Secord, Smallwood, and Edenville Projects from April 1, 1962. ^{51/}

The Commission orders:

(A) This license is issued to Wolverine Power Corporation (Licensee) for a period of 30 years, effective the first day of the month in which this order is issued, to operate and maintain the Edenville Project. This license is subject to the terms and

^{49/} See City of Danville, Va., 58 FERC ¶ 61,318, at p. 62,020 (1992). As discussed in the rehearing order of the Sanford license, we are extending the Sanford license term to expire with the Smallwood, Secord, and Edenville licenses.

^{50/} Id.

^{51/} Id. at pp. 62,021-22. For these same reasons, the Sanford license also assesses back charges to April 1, 1962. As of October 1, 1994, the Commission is not assessing annual charges for projects with less than 1.5-MW authorized installed capacity. Therefore, the Smallwood and Secord Projects (1.2 MW each) will be assessed annual charges for the period April 1, 1962, through September 30, 1994.

Project No. 10808-000

-16-

conditions of the Federal Power Act (FPA), which is incorporated by reference as part of this license, and subject to the regulations the Commission issues under the provisions of the FPA.

(B) The Edenville Project consists of:

(1) All lands, to the extent of the Licensee's interest in those lands, shown by exhibit G:

<u>Exhibit G-</u>	<u>FERC No. 10808-</u>	<u>Showing</u>
1	7	Edenville Project Map

(2) Project works consisting of: (1) a reservoir named Wixom Lake with a surface area of 2,600 acres and gross storage of about 40,000 acre-feet; (2) a reinforced concrete multiple arch spillway 69 feet wide and 39 feet high; (3) a powerhouse with two 2.4 MW Francis-type turbines and generators; (4) three Taintor gates at the spillway crest and two low-level sluiceway gates; (5) three lengths of earth embankments; (6) a reinforced concrete multiple arch spillway at the Tobacco River that is 72 feet long, 72 feet wide and a crest height of about 40 feet with three steel Taintor gates; and (7) appurtenant facilities.

The project works generally described above are more specifically shown and described by those portions of Exhibit A and F that also form a part of the application for license and that are designed and described as:

Exhibit A: The following sections of exhibit A filed July 24, 1989.

The turbines and generators as described on page A-1.

<u>Exhibit F Drawing</u>	<u>FERC No.</u>	<u>Description</u>
F-1	10808-1	Edenville General Plan
F-2	10808-2	Edenville Powerhouse and Spillway
F-3	10808-3	Edenville Tobacco Spillway
F-4	10808-4	Edenville Powerhouse Section
F-5	10808-5	Edenville Spillway Section
F-6	10808-6	Edenville Embankment Section

(3) All of the structures, fixtures, equipment or facilities used to operate or maintain the project, all portable property that may be employed in connection with the project, and all riparian or other rights that are necessary or appropriate in the operation or maintenance of the project.

Project No. 10808-000

-17-

(C) The Exhibits A, F, and G as designated in ordering paragraph (B) above are approved and made part of the license.

(D) This license is subject to the articles in Form L-3 (October 1975), entitled "Terms and Conditions of License for Constructed Major Project Affecting Navigable Waters of the United States" as it applies to the Edenville Project, and the following additional articles:

Article 201. The Licensee shall pay the United States the following annual charges:

- (1) From April 1, 1962, through September 30, 1998, for the purpose of reimbursing the United States for the cost of administration of Part I of the Federal Power Act (FPA), a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 4,800 kilowatts (kW).
- (2) From October 1, 1998, through September 30, 2028, for the purpose of reimbursing the United States for the cost of administration of Part I of the FPA, as determined by the Commission, a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 4,800 kilowatts (kW).

Article 202. Pursuant to Section 10(d) of the Federal Power Act, after the first twenty years of operation of the Edenville Project, a specified reasonable rate of return upon the net investment in the project shall be used for determining surplus earnings of the project for the establishment and maintenance of amortization reserves.

The Licensee shall set aside in a project amortization reserve account at the end of each fiscal year one-half of the project surplus earnings, if any, accumulated after the first twenty years of operation under the license, in excess of the specified rate of return per annum on the net investment.

To the extent that there is a deficiency of project earnings below the specified rate of return per annum for any fiscal year after the first twenty years of operation under the license, the Licensee shall deduct the amount of that deficiency from the amount of any surplus earnings subsequently accumulated, until absorbed. The Licensee shall set aside one-half of the remaining surplus earnings, if any, cumulatively computed, in the project amortization reserve account. The Licensee shall maintain the amounts established in the project amortization account. The

Project No. 10808-000

-18-

Licensee shall maintain the amounts established in the project amortization reserve account until further order of the Commission.

The specified reasonable rate of return used in computing amortization reserves shall be calculated annually based on current capital ratios developed from an average of 13 monthly balances of amounts properly includible in the Licensee's long-term debt and proprietary capital accounts as listed in the Commission's Uniform System of Accounts. The cost rate for such ratios shall be the weighted average cost of long-term debt and preferred stock for the year, and the cost of common equity shall be the interest rate on ten-year government bonds (reported as the Treasury Department's ten-year constant maturity series) computed on the monthly average for the year in question plus four percentage points (400 basic points).

Article 203. Within 120 days from the date of issuance of this order, the Licensee shall file for Commission approval a revised Exhibit G showing the project boundary enclosing all of the project works and other features described under paragraph(B) necessary to operate the project.

Article 401. Within six months of license issuance, the Licensee shall file for Commission approval a plan for erosion control in order to minimize shoreline erosion and bank instability occurring in the project reservoir and the river area downstream from the project dam and tailrace. Erosion control measures in the plan shall adhere to the most recent version of the Michigan Department of Transportation standards, and shall be designed to allow pedestrian access while providing long-term stability.

The plan shall include as a minimum:

- (1) a summary description of the existing erosion control program;
- (2) a description of measures to monitor shoreline erosion and bank instability caused by project operations;
- (3) descriptions, functional design drawings, and topographic map locations of proposed new and enhanced control measures;
- (4) a description of how the control measures will allow pedestrian access while providing long-term stability;
- (5) identification of the Michigan Department of Transportation standards used, and description of how the pertinent standards would be adhered to;

- (6) an implementation schedule;
- (7) provisions for the Licensee's periodic review and revision of the plan; and
- (8) provisions for provide the results of its monitoring program to the Michigan Department of Natural Resources, other agencies, and property owners upon request.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources and the Natural Resources Conservation Service. The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan after is has been prepared and provided to the agencies, and specific description of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of 30 days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. No land-disturbing or land-clearing activities shall begin until the Licensee is notified by the Commission that the plan is approved. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 402. The Licensee must implement all reasonable and prudent measures to ensure that the following water quality standards are met whenever inflows to the projects are greater than or equal to the 95-percent-exceedance inflow:

- (1) Dissolved oxygen (DO) concentrations in the project's tailwaters of not less than 5 milligrams per liter (mg/l) at all times; and
- (2) monthly average temperatures downstream from the project no greater than:

January	-----	42°F
February	-----	41°F
March	-----	53°F
April	-----	67°F
May	-----	78°F
June	-----	85°F
July, August	-	86°F
September	----	80°F
October	-----	69°F
November	-----	56°F
December	-----	44°F

Project No. 10808-000

-20-

These monthly average temperatures may be exceeded for short periods when natural water temperatures measured upstream of the project exceed the ninetieth percentile occurrence of water temperatures (i.e., the monthly average temperatures cited in item No. 2 minus 5°F).

Within six months of license issuance, the Licensee shall file for Commission approval a plan to monitor, and mitigate if necessary, dissolved oxygen (DO) and temperature levels of the Tittabawassee River downstream from the Edenville Project. The plan shall include provisions for: (1) monitoring of DO and temperature downstream from Edenville Dam with the sensor locations and monitoring frequency determined in consultation with the Michigan Department of Natural Resources (Michigan DNR) and the U.S. Fish and Wildlife Service (FWS); and (2) description of operating procedures developed in consultation with Michigan DNR and FWS to alleviate water quality conditions which deviate from the above limits.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources and the U.S. Fish and Wildlife Service. The monitoring plan shall include a schedule for: (1) implementation of the program within twenty-four months from the date of issuance of this license; (2) consultation with the Michigan Department of Natural Resources and the U.S. Fish and Wildlife Service concerning the results of the monitoring; and (3) filing the results, agency comments, and Licensee's response to agency comments with the Commission.

The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 403. The Licensee shall release from the Edenville Dam into the Tobacco River bypass channel a minimum flow of 40 cfs from October 1 through March 31 each year, and a minimum flow of 66 cfs from April 1 through September 30 each year as measured at the outlet of the Edenville Dam into the Tobacco River bypass channel for the protection and enhancement of fish resources in the bypassed reach of the Tobacco River. The

minimum flows are required within sixty days of installation of streamflow monitoring equipment required by Article 406.

This flow may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods upon agreement between the Licensee and the Michigan Department of Natural Resources. If the flow is so modified, the Licensee shall notify the Commission as soon as possible, but no later than ten days after each such incident.

Article 404. Within sixty days of the installation of reservoir level gages required by Article 406, the Licensee shall operate the Edenville Project so that the project reservoir elevation does not fluctuate more than 0.4 foot below or 0.3 foot above the normal pool elevation of 675.8 feet National Geodetic Vertical Datum (NGVD) except during the winter drawdown. The Licensee shall begin the winter drawdown after December 15, and shall complete the winter drawdown by January 15 of each year. The Licensee shall complete the refill of the reservoir, thus ending the winter drawdown period, prior to the surface water temperature of the reservoir reaching 39°F. During the winter drawdown, the Licensee shall operate the Edenville Project so that the reservoir level does not fall below 672.8 feet NGVD, and so that the daily fluctuation in reservoir elevation does not exceed 0.7 foot.

The required reservoir elevation may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods for project maintenance purposes, upon mutual agreement between the Licensee and the Michigan Department of Natural Resources. If the reservoir level fluctuation is so modified, the Licensee shall notify the Commission as soon as possible, but no later than ten days after each such incident.

Article 405. The Commission reserves the authority to require the Licensee to construct, maintain, and operate or to provide for the construction, maintenance, and operation of such fishways as may be prescribed by the Secretary of the U.S. Department of the Interior.

Article 406. To ensure compliance with the reservoir elevation requirements of Article 404, the Licensee, within 180 days of license issuance, shall file for Commission approval a reservoir level gaging plan to monitor water surface elevations in Wixom Lake at intervals of 15 minutes or less and to monitor streamflow in the bypassed Tobacco River channel. This provision is to monitor compliance with the reservoir fluctuation limitations as stipulated by Article 404 and to monitor compliance with the minimum instream flow requirement of Article 403.

Project No. 10808-000

-22-

The plan shall include, but not be limited to, (1) details on the location, design, and calibration of the monitoring equipment; (2) the method of data collection; (3) provisions for compiling and storing the data; and (3) provisions for supplying the data to the U.S. Fish and Wildlife Service (FWS), the U.S. Geological Service (USGS), and the Michigan Department of Natural Resources (Michigan DNR) within thirty days of the agency's request.

The monitoring plan shall also include a schedule for: (1) implementation of the program; (2) consultation with the appropriate federal and state agencies concerning the data from the monitoring; and (3) filing the data, agency comments, and the Licensee's response to agency comments with the Commission.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources, the U.S. Fish and Wildlife Service, and the U.S. Geological Survey. The Licensee shall include with the plan, documentation of consultation, copies of comments and recommendations on the completed plan after it has been prepared and provided to the agencies, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations prior to filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 407. Within one year of license issuance, the Licensee shall file for Commission approval a Bald Eagle Management Plan to protect the federally listed as threatened bald eagle (Haliaeetus leucocephalus) and its habitat. The plan shall be developed in consultation with the U.S. Fish and Wildlife Service and the Michigan Department of Natural Resources, and include, but not be limited to the following:

- (1) The results of a winter and breeding season survey of bald eagles and a bald eagle habitat assessment of project lands and waters, including descriptive and mapped identification of any existing and potential future eagle perching, roosting, nesting, and foraging habitat areas;
- (2) A proposed protocol and an implementation schedule for an ongoing bald eagle monitoring program;

Project No. 10808-000

-23-

- (3) Specific measures to maintain and protect any existing and potential eagle habitat areas on project lands and waters, including an implementation schedule;
- (4) Specific measures to maintain and protect bald eagle perch and roost trees on project lands, including an implementation schedule; and
- (5) Procedures for notifying the Commission if potential adverse affects to eagles or their habitats arise as a result of project operation or activities on project lands or waters.

The Licensee shall include in the plan documentation of consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan.

Article 408. Within six months of license issuance, the Licensee shall, in consultation with the Michigan Department of Natural Resources, file for Commission approval a plan to monitor purple loosestrife and Eurasian watermilfoil in project waters. The Commission reserves the right to require changes to the plan.

The plan shall include, but not be limited to: (1) a description of the monitoring method; (2) a monitoring schedule; and (3) a schedule for providing the monitoring results to Michigan DNR; (4) documentation of agency consultation, including copies of comments and recommendations on the completed plan; and (5) specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

If at any time during the period of license, Michigan DNR demonstrates that purple loosestrife or Eurasian watermilfoil is significantly affecting fish and wildlife populations at the project and that control measures are needed, and the Commission agrees with those determinations, the Commission may require the

Project No. 10808-000

-24-

Licensee to cooperate with Michigan DNR and to undertake reasonable measures to control or eliminate the weeds in project waters.

Article 409. The Licensee, before starting any land-clearing or land-disturbing activities within the project boundary, including recreation developments at the project, shall consult with the State Historic Preservation Officer.

If the Licensee discovers previously unidentified archeological or historic properties during the course of constructing or developing project works or other facilities at the project, the Licensee shall stop all land-clearing and land-disturbing activities in the vicinity of the properties and consult with the State Historic Preservation Officer.

In these instances, the Licensee shall file for Commission approval a cultural resource management plan (plan) prepared by a qualified cultural resource specialist after having consulted with the State Historic Preservation Officer. The plan shall include the following items: (1) a description of each discovered property indicating whether it is listed on or eligible to be listed on the National Register of Historic Places; (2) a description of the potential effect on each discovered property; (3) proposed measures for avoiding or mitigating effects; (4) documentation of the nature and extent of consultation; and (5) a schedule for mitigating effects and conducting additional studies.

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan after it has been prepared and provided to the agencies, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on site-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 410. Within one year of license issuance, the Licensee shall file for Commission approval a recreation plan for the Edenville Project. The Commission reserves the right to make changes to the plan.

The plan shall be prepared in consultation with the Michigan Department of Natural Resources and shall include the following :

Project No. 10808-000

-25-

- (1) A fishing access site at the Tittabawassee River outlet of the Edenville Dam that shall include (a) directional signs; (b) barrier-free restroom; (c) access paths to the tailwater, dike areas, restrooms, canoe portage, and parking areas; (d) parking for 15 vehicles with designated barrier-free parking spaces; and (e) improved railed barrier-free fishing pier at the tailwater area;
- (2) A fishing access site at the Tobacco River outlet of the Edenville Dam that shall include (a) directional signs; (b) access paths to the tailwater, dike areas, parking lot, and fishing pier; (c) parking for 15 vehicles; and (d) an improved railed shoreline fishing pier located on the dike near the dam;
- (3) A canoe portage around the dam;
- (4) Installation of signs that identify all recreational facilities and access at the project;
- (5) Functional design drawings, costs for the improvements to, or construction of, recreation facilities, and a construction schedule for the facilities; and
- (6) A schedule for completing construction of the required facilities within three years of license issuance.

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

No land clearing or land-disturbing activities shall begin until the Licensee is notified by the Commission that the plan is approved.

Article 411. (a) In accordance with the provisions of this article, the Licensee shall have the authority to grant permission for certain types of use and occupancy of project lands and waters and to convey certain interests in project lands and waters for certain types of use and occupancy, without prior Commission approval. The Licensee may exercise the authority only if the proposed use and occupancy is consistent with the purposes of protecting and enhancing the scenic, recreational, and other environmental values of the projects. For those purposes, the Licensee shall also have continuing responsibility

to supervise and control the use and occupancies for which it grants permission, and to monitor the use of, and ensure compliance with the covenants of the instrument of conveyance for, any interest that it has conveyed, under this article. If a permitted use and occupancy violates any condition of this article or any other condition imposed by the Licensee for protection and enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of this article is violated, the Licensee shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, canceling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

(b) The type of use and occupancy of project lands and waters for which the Licensee may grant permission without prior Commission approval are: (1) landscape plantings; (2) non-commercial piers, landings, boat docks, or similar structures and facilities that can accommodate no more than 10 watercraft at a time and where said facility is intended to serve single-family type dwellings; and (3) embankments, bulkheads, retaining walls or similar structures for erosion control to protect the existing shoreline.

To the extent feasible and desirable to protect and enhance the project's scenic, recreational, and other environmental values, the Licensee shall require multiple use and occupancy of facilities for access to projects lands or waters. The Licensee shall also ensure, to the satisfaction of the Commission's authorized representative, that the use and occupancies for which it grants permission are maintained in good repair and comply with applicable state and local health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, the Licensee shall: (1) inspect the site of the proposed construction; (2) consider whether the planting of vegetation or the use of riprap would be adequate to control erosion at the site; and (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline.

To implement this paragraph (b), the Licensee may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover the Licensee's costs of administering the permit program. The Commission reserves the right to require the Licensee to file a description of its standards, guidelines, and procedures for implementing this paragraph (b) and to require modification of those standards, guidelines, or procedures.

Project No. 10808-000

-27-

(c) The Licensee may convey easements or rights-of-way across, or leases of, project lands for: (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary state and federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas, and electric utility distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir.

No later than January 31 of each year, the Licensee shall file three copies of a report briefly describing for each conveyance made under this paragraph (c) during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed.

(d) The Licensee may convey fee title to, easements or rights-of-way across, or leases or project lands for: (1) construction of new bridges or roads for which all necessary state and federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary federal and state water quality certification or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection of support structures within the project boundary, for which all necessary federal and state approvals have been obtained; (5) private or public marinas that can accommodate no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed for a particular use is five acres or less; (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation; and (iii) no more than 50 total acres of project lands for the project development are conveyed under this clause (d)(7) in any calendar year.

At least forty-five days before conveying any interest in project lands under this paragraph (d), the Licensee must submit a letter to the Director, Office of Hydropower Licensing, stating its intent to convey the interest and briefly describing the type of interest and location of the lands to be conveyed (a marked exhibit G or K map may be used), the nature of the proposed use,

Project No. 10808-000

-28-

the identity of any federal or state agency official consulted, and any federal or state approvals required for the proposed use. Unless the Director, within forty-five days from the filing date, requires the Licensee to file an application for prior approval, the Licensee may convey the intended interest at the end of that period.

(e) The following additional conditions apply to any intended conveyance under paragraph (c) or (d) of this article:

- (1) Before conveying the interest, the Licensee shall consult with federal and state fish and wildlife or recreation agencies, as appropriate, and the State Historic Preservation Officer.
- (2) Before conveying the interest, the Licensee shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved exhibit R or approved report on recreational resources of an exhibit E; or, if the project does not have an approved exhibit R or approved report on recreational resources, that the lands to be conveyed do not have recreational value.
- (3) The instrument of conveyance must include covenants running with the land adequate to ensure that: (i) the use of the land conveyed shall not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use; and (ii) the grantee shall take all reasonable precautions to insure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will occur in a manner that will protect the scenic, recreational, and environmental values of the project.
- (4) The Commission reserves the right to require the Licensee to take reasonable remedial action to correct any violation of the terms and conditions of this article, for the protection and enhancement of the project's scenic, recreational, and other environmental values.

(f) The conveyance of an interest in project lands under this article does not in itself change the project boundaries. The project boundaries may be changed to exclude land conveyed under this article only upon approval of revised exhibit G or K drawings (project boundary maps) reflecting exclusion of that land. Lands conveyed under this article will be excluded from the project only upon a determination that the lands are not necessary for project purposes, such as operation and maintenance, flowage, recreation, public access, protection of

Project No. 10808-000

-29-

environmental resources, and shoreline control, including shoreline aesthetic values. Absent extraordinary circumstances, proposals to exclude lands conveyed under this article from the project shall be consolidated for consideration when revised exhibit G or K drawings would be filed for approval for other purposes.

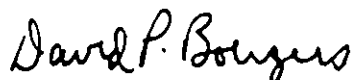

(g) The authority granted to the Licensee under this article shall not apply to any part of the public lands and reservations of the United States included within the project boundary.

(E) The Licensee shall serve copies of any Commission filing required by this order on any entity specified in this order to be consulted on matters related to that filing. Proof of service on these entities must accompany the filing with the Commission.

(F) This order is final unless a request for rehearing is filed within thirty days of the date of its issuance pursuant to Section 313 of the Federal Power Act. The filing of a request for rehearing does not operate as a stay of the effective date of this order or of any other date specified in this order, except as specifically ordered by the Commission. The Licensee's failure to file a request for rehearing shall constitute acceptance of this order.

By the Commission.

(S E A L)

David P. Boergers,
Secretary.

UNITED STATES OF AMERICA 61 FERC ¶ 61,066
FEDERAL ENERGY REGULATORY COMMISSION

Before Commissioners: James J. Hoecker, Chairman;
Vicky A. Bailey, William L. Massey,
Linda Breathitt, and Curt H. Bert, Jr.

Wolverine Power Corporation) Project Nos. 2785-002,
008 and 009

ORDER ON REHEARING AND AMENDING LICENSE ORDER

(Issued October 16, 1998)

On December 1, 1987, the Acting Director, Office of Hydropower Licensing (Director), issued an original license to Wolverine Power Corporation (Wolverine) for the continued operation and maintenance of the 3.3-megawatt (MW) Sanford Water Power Project No. 2785, located on the Tittabawassee River in Midland County, Michigan. 1/ Requests for rehearing of the license order were filed by Wolverine, Dow Chemical Company, and the City of Midland, Michigan. 2/ On January 28, 1988, the

- 1/ 41 FERC ¶ 62,192. In 1976, 55 FPC 673, the Commission determined that the Tittabawassee River is a navigable waterway of the United States and that therefore Wolverine's four projects are required to be licensed. See Section 23(b)(1) of the Federal Power Act, 16 U.S.C. § 817(1).
- 2/ The pleadings were filed as appeals of staff action. See 18 C.F.R. § 385.1902 (1987) (converting pending appeals to rehearing requests). Wolverine accepted the Sanford license, while appealing certain of its provisions. Rehearing request at 3.

With their appeals, Midland and Dow also filed motions for late intervention and requests for extensions of time to supplement their appeals. These motions and requests have been granted. See Commission Secretary notice (unreported) and Commission staff letter to Midland, both dated September 1, 1988; and Commission order 45 FERC ¶ 61,310 (1988). Midland and Dow timely filed their appeals on October 31, 1988, and January 27, 1989, respectively.

The State of Michigan and the Michigan Department of Natural Resources (Michigan DNR) (referred to jointly as Michigan) jointly filed a late motion to intervene in the proceeding, which was granted by Commission Secretary notice dated (continued...)

Project No. 2785-002 et al.

-2-

Commission stayed certain of the license articles pending action on three related Wolverine projects. 3/ This order acts on the rehearing requests, 4/ amends the license, and lifts the stay.

BACKGROUND

The Sanford Project is one of four existing, adjacent hydroelectric projects on the Tittabawassee River in Midland and Gladwin Counties, Michigan. Beginning furthest downstream, the projects are: the 3.3-megawatt (MW) Sanford Project No. 2785, the 4.8-MW Edenville Project No. 10808, the 1.2-MW Smallwood Project No. 10810, and the 1.2-MW Secord Project No. 10809.

The 1987 Sanford license order was based on a 1987 Environmental Assessment (EA) of the Sanford Project. 5/ However, because the four projects are hydraulically and hydrologically interrelated, Commission staff has subsequently prepared a Multiple Project Environmental Assessment (MEA) that evaluates the impacts of all four projects on the environmental resources of the area. 6/ We have reviewed the non-final 1987

2/ (... continued)

April 25, 1990 (unreported).

3/ 42 FERC ¶ 61,192. The Commission stayed license Articles 401 (run-of-river operations), 402 (gaging), and 404 (recreational development, including reservoir elevation level schedules). Consequently, Wolverine's arguments on rehearing regarding the timing of compliance with Articles 402 and 404 are moot.

4/ Because on rehearing we are amending Sanford's mode of operation from what was required in the 1987 license order, a number of the rehearing arguments appear to be moot.

5/ The 1987 EA is published at 41 FERC at pp. 63,407-13.

6/ The 131-page (plus appendices) MEA was issued on August 14, 1998. Dow asserts that the Commission should have prepared an Environmental Impact Statement (EIS). The National Environmental Policy Act requires an EIS to be prepared whenever a federal agency is considering a major federal action significantly affecting the quality of the human environment. See 42 U.S.C. § 4332(2)(c). The Council on Environmental Quality's regulations implementing NEPA provide that an agency may prepare an environmental assessment in order to determine whether an EIS must be prepared. 42 U.S.C. § 1501.3-.4. In this proceeding, both the 1987 EA and the 1998 MEA made a finding of no significant impact (FONSI), and thereby discharged the
(continued...)

Project No. 2785-002 et al.

-3-

Sanford license in light of the MEA, and are amending the license as necessary to update our findings pursuant to the applicable public interest standards. 7/ We are concurrently issuing to Wolverine original licenses for the Edenville, Smallwood, and Secord Projects.

The license order for the Edenville Project No. 10808 addresses certain issues pertinent to all four projects, notably operational modes, reservoir levels and fluctuations (including winter drawdowns), endangered species, and wildlife resources, and we incorporate those discussions by reference herein.

DISCUSSION

A. Mode of Operation

Wolverine has been operating the Sanford Project in a peaking mode since 1925. There is no minimum flow, and when the project is not operating the river below the dam receives only leakage flows of between 30 and 60 cubic feet per second (cfs). The 1987 license required Wolverine to change project operation to a run-of-river mode, 8/ but this requirement was stayed pending rehearing. 9/

Wolverine's 1983 license application proposed a minimum flow of 120 cfs, 10/ whereas Michigan DNR and the U. S. Fish and Wildlife Service (FWS) recommended that the project be operated in a run-of-river mode, in order to reduce the 5.4-foot daily fluctuations in the project tailwater, increase the fishery

6/ (...continued)
Commission's NEPA responsibilities.

7/ See the equal consideration standard of FPA Section 4(e), 16 U.S.C. § 797(e), and the comprehensive development standard of FPA Section 10(a)(1), 16 U.S.C. § 803(a)(1). We are amending the Sanford license to include articles on erosion control, maintenance of water quality standards for dissolved oxygen and temperature, reservoir elevations and fluctuation limits, bald eagles, nuisance aquatic plants, and cultural resources. The MEA and the Project No. 10808 license order provide background information and support for these articles.

8/ Run-of-river is defined as instantaneous inflow equal to instantaneous outflow from the reservoir.

9/ See n. 3, supra.

10/ Flows 0.25 mile below Sanford Dam would be 130 cfs, due to flows from a tributary.

♀

Project No. 2785-002 et al.

-4-

forage base, improve spawning habitat, and assist fish passage past the downstream Dow Chemical dam. 11/ The 1987 EA concluded that, while a 120-cfs minimum flow would increase somewhat the amount of downstream aquatic habitat over that available under peaking operations, run-of-river operation would provide a much greater overall benefit to the fishery resources. It also concluded that such operation would not result in a net change in overall project generation; on-peak generation would however decrease by 1,200,000 kilowatt hours (kWh). 12/

The 1998 MEA compared the amount of effective fish habitat provided by current flows, various minimum flows, and run-of-river conditions. The analysis shows that, as year-round minimum flows increase, enhancement to fish habitat increases. However, the incremental benefit of increasing minimal flows diminishes as the minimum flows increase. 13/ Operating the projects in a run-of-river mode would provide the greatest predicted fishery habitat. Using run-of-river results as the benchmark, the MEA calculated that the 120-cfs minimum flow at Sanford (proposed by Wolverine) would provide effective habitat of an average of 50 percent of the benchmark, while a 210-cfs minimum flow would provide an average of 68 percent of the benchmark. 14/

Current operation of the Sanford Project results in average annual energy generation of 9,210,000 kWh, worth about \$445,600. 15/ A change to run-of-river operation would reduce

- 11/ The Dow Chemical Company maintains a small impoundment about 12 miles downstream of Sanford. The minimum flow amendments we adopt today will increase the daily hours during which fish may successfully pass over this dam, which is the first barrier for fish migration upstream from Saginaw Bay.
- 12/ See the Safety and Design Assessment for the Sanford Project, 41 FERC at pp. 63,412-13. Corrections to this analysis are contained in the MEA.
- 13/ See MEA at 31, Figure 3.
- 14/ See MEA at 28-29, Table 2.
- 15/ The description of the economic analysis, per Mead Paper Corp., 72 FERC ¶ 61,027 (1995), is set forth in the MEA at 103-04. Briefly, we used current costs only (except for major capital investments) to compare the cost of the project under various alternatives with the cost of a likely source of alternative power. Costs were annualized over 30 years, and a 10 percent discount rate was used. Net benefit is defined as the difference between the power value
(continued...)

♀

Project No. 2785-002 et al.

-5-

the average annual energy by about 2,058,872 kWh, or by a value of about \$145,500, which, together with an additional \$8,600 in annual O&M expense, would result in an annual cost of about \$154,100, making the net worth \$291,500, which is a 35 percent reduction from peaking mode. 16/ The annual lost energy cost of a year-round minimum instream flow of 210 cfs would be \$89,300 (a 20 percent reduction from current peaking operations).

The primary migratory game fish species of concern are walleye, white bass, smallmouth bass, and chinook salmon. 17/ The MEA therefore examined the energy generation cost of providing higher minimum flows from Sanford during the walleye spawning season, March 15 through April 30. It concluded that a 650-cfs minimum flow during this period would provide six times the habitat available under current peaking conditions, and 97 percent of the habitat available under run-of-river operations. 18/ The cost of a 650-cfs minimum flow instead of a 210-cfs flow during this period would average an additional \$5,500 annually. 19/ A minimum flow requirement of 650 cfs from March 15 through April 30 and 210 cfs the rest of the year would result in a loss of about 950,000 kWh per year of energy generation. Under this regime, the project's annual power value would be \$363,000, its annual costs would be about \$97,000, and its annual net benefit would be about \$266,000. 20/

In light of all of the above, we conclude that the agencies' recommendations for run-of-river operations are inconsistent with our balancing of beneficial public uses of the waterway under Sections 4(e) and 10(a)(1) of the FPA, 21/ in that they would

15/ (... continued)

of project generation and the cost of owning and operating the project, including costs of amortized capital, O&M, and insurance. Power values were calculated using 53.7 mills/kWh for on-peak energy and 32.6 mills/kWh for off-peak energy, based on alternative combined-cycle combustion turbine generation and include both energy and capacity value.

-6-

significantly reduce the power value of the project but would not obtain concomitant environmental gains over and above the MEA-recommended flow regime. We are accordingly amending the Sanford Project license to require a minimum flow of 210 cfs, except for the period of walleye spawning, when the minimum flow will be 650 cfs.

In its comments on the Draft MEA, Wolverine expressed concern that any continuous instream flow requirement from the Sanford Project would cause winter gate-icing, affecting operations and potentially causing dam safety concerns. Because some form of outlet works modification may be necessary, and because installation of a low-flow turbine to capture the hydroelectric potential of the instream flow releases may prove feasible, we will give Wolverine six months to file a plan that identifies an appropriate release system, and an additional six months to construct or modify facilities once approved by the Commission. 22/

B. Impact on Downstream Effluent Discharges

Dow Chemical Company (Dow) operates a manufacturing plant, located about seven miles downstream from the Sanford Dam in the City of Midland, that discharges treated wastewater into the Tittabawassee River pursuant to an NPDES permit. 23/ Dow states that its plant depends on the Sanford Project's weekly peaking operation to comply with the discharge requirements of its NPDES permit. Whenever streamflow past its plant is below 300 cfs, Dow holds its treated effluent in a pond until flow releases from Sanford increase the streamflow to a level sufficient to meet the dilution requirements in Dow's NPDES permit. Dow asserts that a change in Sanford operation from peaking to run of river would reduce the amount Dow could discharge by from 10 to 15 percent,

21/ (... continued)

Smallwood, and Edenville Projects, held on August 9, 1994, included discussion of minimum flows at the Sanford Project.

22/ See amended Article 401.

23/ National Pollutant Discharge Elimination System (NPDES) permits are issued by states pursuant to Section 402 of the Clean Water Act. Dow treats and discharges wastewater not only from its manufacturing plant in Midland but also, under contract, from three landfills, a benzene cleanup in Auburn, Michigan, and groundwater from the sites of regional brine spills. Rehearing request at 9-10; City of Midland's rehearing request at 19.

♀

causing its holding pond to fill up and its plant operations to be curtailed, with concomitant socioeconomic impacts. 24/

The MEA examined Dow's submittals regarding the effect of Sanford operations on Dow's ability to discharge effluent. First, the MEA noted that the adverse effects on Dow's discharges of operating Sanford in a run-of-river mode were overstated, due to an earlier state error in estimating low-flow frequency. 25/ Second, if there is any need to change how Dow discharges effluents from its Midland plant in light of either a run-of-river or minimum-flow operation at Sanford, 26/ it will be to release lower concentrations over a longer time period. 27/ The same is true for the City of Midland's NPDES-permitted discharges from its wastewater treatment facility below Sanford.

We conclude, based on the record in this proceeding, that implementation of the MEA-recommended operating regime for the Sanford Project will not have a significant adverse impact on the ability of Dow and the City of Midland to comply with their existing NPDES permits.

C. Flood Mitigation and Control

The City of Midland notes that it frequently experiences flooding, and is concerned that, without the ameliorative effect of Sanford's peaking operation, flood damage will increase, necessitating new flood control and mitigation measures. 28/ To demonstrate the Sanford Project's flood control benefits, Midland filed with the Commission the U.S. Army Corps of Engineers (Corps) flood study for the City. 29/

24/ Dow's rehearing request at 12.

25/ See MEA at 71-73.

26/ In comments on the draft MEA, Midland and Dow objected to the minimum flow recommendation for Sanford, but provided no data or analysis to demonstrate negative impacts on the discharges authorized by their NPDES permits.

27/ See Dow's rehearing request at 11-12 (conceding that under neither peaking mode nor run-of-river mode would the total dissolved solids concentration limits of the NPDES permit be exceeded); and Comment #27 in the Responsiveness Summary attached to the July 21, 1997 NPDES permit issued to Dow by Michigan Department of Environmental Quality.

28/ Rehearing request at 17.

29/ See Final Environmental Impact Statement (EIS), Flood (continued...)

♀

While we understand Midland's concern, there is no evidence that changes to Sanford's operational mode will have much effect on flooding patterns. The maximum usable storage 30/ for all four of Wolverine's hydroelectric plants on the Tittabawassee is about 18,000 acre-feet, which is only about one-tenth of the amount the Corps' flood study determined is required for meaningful flood control at Midland. 31/ Moreover, to use even the Sanford Project's 15,000 acre-feet for flood control, Sanford would have to increase reservoir and flow fluctuations, at the expense of the environmental and recreational values that the participants in the license proceeding seek to foster.

D. Dead Tree Removal

License Article 203 is a standard article which requires Wolverine to remove "all trees along the periphery of the project reservoir[] which may die during operations of the project." Wolverine argues that under this article it need remove only those trees that die as a direct result of project operation. Wolverine misreads the article: there is no predicate that the trees must die as a result of project operation. However, we note that we have interpreted this provision as requiring the removal of only those dead trees that pose a hazard to project operations, public safety, or navigation. 32/

E. License Term and Annual Charges

The 1987 Sanford license was backdated to 1962 and given a 20-year prospective term, pursuant to the license term policy then in effect for projects that were required to have been licensed years earlier. In 1992, we adopted a new policy for

29/ (... continued)

Control on the Tittabawassee River at Midland, Michigan ("flood study"), prepared by U.S. Army Corps of Engineers (1980).

30/ Storage that can be regulated by means of the dam's gate structures.

31/ See Corps' flood study at 41.

32/ See, e.g., Wisconsin Electric Power Company, 76 FERC ¶ 61,183 at p. 62,021 (1996) (order on rehearing). Article 20 of the Wisconsin Electric license is published at 54 FPC 1817, 1823 (1975) (Form L-3), incorporated by reference, 72 FERC ¶ 62,190 at p. 64,520, ordering para. D (1995) (license order).

‡

Project No. 2785-002 et al.

these projects, 33/ no longer backdating the licenses, and tracking our policy when issuing original licenses for new projects at existing non-federal dams: 30, 40, or 50 year terms, depending on the level of new construction, redevelopment, or environmental mitigation and enhancement. 34/ It is, however, also our policy to "coordinate the expiration dates of licenses to the maximum extent possible, to maximize future consideration of cumulative impacts . . . in contemporaneous proceedings at relicensing." 35/ We use our discretion to apply these two policies flexibly in a manner that makes sense according to the facts of each case. 36/ Here, in order to facilitate the Commission's future coordinated treatment of the hydrologically-related Sanford, Edenville, Secord, and Smallwood Projects, we are modifying the term of Sanford's license so that it will expire at the same time as the three upstream projects (September 30, 2028).

It is the Commission's long-standing policy that the owner of an existing project which should have been licensed earlier but was not, should not, by receipt of a license at a later date, be placed in a more favorable position, at least with respect to annual charges, than a project owner who filed an received a license in a timely manner. 37/ Accordingly, license Article 201 requires the Wolverine to pay a sum representing the annual administrative charges that would have been collected, had the Sanford Project been licensed when the project owner first should have sought and obtained a license. Under both prior and current policy, the Sanford Project, which is a pre-1935 project on a navigable water, would be assessed "in lieu" charges as of April 1, 1962. 38/

On rehearing, Wolverine argues that it should be assessed "in lieu" charges for Sanford only back to February 1976, which is when the Commission issued its order requiring Sanford and the

33/ City of Danville, Va., 58 FERC ¶ 61,318 at pp. 62,020-21.

34/ Id. The "environmental measures" element was added in 1994. See Consumers Power Co., 68 FERC ¶ 61,077 at p. 61,384.

35/ See 18 C. F. R. § 2.23.

36/ See, e.g., Consolidated Papers, Inc., 83 FERC ¶ 61,279 at p. 62,158 (1998).

37/ City of Danville, 58 FERC at p. 62,017.

38/ Id. at pp. 62,019-21.

♀

three upstream projects to be licensed. 39/ However, Wolverine's rehearing request reflects no awareness of the Commission's above-described policy, and gives no reason for why Sanford should not be bound by that policy, nor do we perceive any. Alternatively, Wolverine asks that it be required to pay "in lieu" charges at the rates in effect during the years in question. That is what Article 201 provides.

F. Effective-Date Issues

Noting that the December 1, 1987 order issuing the Sanford Project a license backdated the license's effective date to April 1, 1962, Wolverine asks for clarification that December 1987, not April 1962, is the effective date with respect to obligations under two license articles.

License Article 202 tracks Section 10(d) of the FPA in requiring Wolverine, after the first twenty years of licensed operation, to establish and maintain amortization reserves. 40/ By this rehearing order, we are revising the effective date of the Sanford license to its issuance date, December 1, 1987. In any event, we confirm Wolverine's understanding of the effective date of Article 202.

License Article 405 addresses the kinds of approval needed for certain types of non-project use, occupancy, or conveyance of project lands. Wolverine seeks clarification that the requirements of Article 405 are prospective from December 1987 only. Wolverine is correct in the sense that the license does not hold it accountable for pre-December 1987 approvals and regulation of non-project uses on project lands and waters, or past conveyances of land. However, this is not to say that Wolverine might not be required to file for Commission approval a land use plan to govern future approvals and regulations, or to acquire for inclusion in the project boundary lands that the Commission might determine, after notice and opportunity for hearing, are necessary for project purposes.

- 39/ See n. 1, supra. Wolverine has paid the "in lieu" portion of its annual charge assessment under protest. Accordingly, its payment has been placed in a suspense account pending resolution of the rehearing request.
- 40/ See 16 U.S.C. § 803(d). The amortization reserve is an obligation to reduce the licensee's cost base in case, e.g., its property should be taken over by the United States upon expiration of its license.

♀

(A) The requests for rehearing filed in this proceeding by Wolverine Power Corporation, Dow Chemical Company, and the City of Midland, Michigan, are granted to the extent provided in this order, and in all other respects are denied.

(B) The January 29, 1988 stay of Articles 401, 402 and 404 of the license issued on December 1, 1987, for the Sanford Project No. 2785 is lifted, effective as of the date of this order.

(C) The first sentence of Ordering Paragraph (A) of the license issued to Project No. 2785 on December 1, 1987, is amended to read as follows:

This license is issued to Wolverine Power Corporation (Licensee) for a term effective December 1, 1987, and expiring on September 30, 2028, to operate and maintain the Sanford Water Power Project.

(D) License Article 401 is amended to read as follows:

Article 401. The Licensee shall release from the Sanford Water Power Project into the Tittabawassee River a minimum flow of 210 cubic feet per second, as measured immediately downstream of the project, for the protection and enhancement of fish and wildlife resources, riparian vegetation, aesthetic resources and water quality in the Tittabawassee River. The Licensee shall release 650 cubic feet per second during the walleye spawning season from March 15 through April 30 each year.

These flows may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods upon agreement between the Licensee, the Michigan Department of Natural Resources, and the U.S. Fish and Wildlife Service. If the flow is so modified, the Licensee shall notify the Commission as soon as possible, but no later than 10 days after each such incident.

Within six months from the date of issuance of this order, the Licensee shall file for Commission approval a plan to evaluate and identify an appropriate continuous release system at Sanford Dam.

The Licensee shall prepare the continuous release system plan after consultation with the Michigan Department of Natural Resources and U.S. Geological Survey. The Licensee shall allow a minimum of 30 days

♀

Project No. 2785-002 et al.

for the consulted agencies to comment and make recommendations on the plans before filing them with

19981016-3066(1407349)

the Commission. The Licensee shall include with its filings documentation of such consultation including copies of the comments and recommendations on the proposed plans during consultation. Further, the Licensee shall identify in its filings how the comments or recommendations are accommodated by the proposed plans. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information. The Commission reserves the right to require reasonable changes in the plans. Upon Commission approval, the Licensee shall implement the plan and construct or modify the facilities as approved by the Commission within six months.

(E) The first sentence in License Article 402 is revised by changing the reference to article 404 to 411.

(F) Article 404 is revised to read as follows:

Article 404. Within one year of the date of issuance of this order, the Licensee shall file for Commission approval a recreation plan for the Sanford Project. The Commission reserves the right to make changes to the plan.

The plan shall be prepared in consultation with the Michigan Department of Natural Resources and shall include the following:

- (1) Development of public access to the reservoir and to the downstream Tittabawassee River;
- (2) The short- and long-term need for recreational facilities and a timetable for their construction;
- (3) Installation of signs that identify all recreational facilities and access at the project;
- (4) Functional design drawings, costs for the improvements to, or construction of, recreation facilities; and
- (5) A schedule for completing construction of the required facilities within three years of issuance of this order.

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan, and

♀

Project No. 2785-002 et al.

-13-

specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment

19981016-3066(1407349)

before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

(G) The following Articles are added to the license issued for the Sanford Project No. 2785:

Article 406. Within six months of the date of issuance of this order, the Licensee shall file for Commission approval a plan for erosion control in order to minimize shoreline erosion and bank instability occurring in the project reservoir and the river area downstream from the project dam and tailrace. Erosion control measures in the plan shall adhere to the most recent version of the Michigan Department of Transportation standards, and shall be designed to allow pedestrian access while providing long-term stability.

The plan shall include at a minimum:

- (1) a summary description of existing erosion control measures;
- (2) a description of measures to monitor shoreline erosion and bank instability caused by project operations;
- (3) descriptions, functional design drawings, and topographic map locations of proposed new and enhanced control measures;
- (4) a description of how the control measures will allow pedestrian access while providing long-term stability;
- (5) identification of the Michigan Department of Transportation standards used, and description of how the pertinent standards would be adhered to;
- (6) an implementation schedule;
- (7) provisions for the Licensee's periodic review and revision of the plan; and
- (8) provisions to provide the results of its monitoring program to the Michigan Department of

♀

Project No. 2785-002 et al.

-14-

Natural Resources, other agencies, and property owners upon request.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural

19981016-3066(1407349)

Resources and the U.S. Natural Resources Conservation Service. The Licensee shall include with the plan, documentation of consultation, copies of comments and recommendations on the completed plan, and a specific description of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of 30 days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. No land-disturbing or land-clearing activities shall begin until the Licensee is notified by the Commission that the plan is approved. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 407. The Licensee must implement all reasonable and prudent measures to ensure that the following water quality standards are met whenever inflows to the projects are greater than or equal to the 95-percent exceedance inflow:

- (1) Dissolved oxygen (DO) concentrations in the project's tailwaters not less than 5 milligrams per liter (mg/l) at all times; and
- (2) monthly average temperatures downstream from the project no greater than:

January	-----	42øF
February	-----	41øF
March	-----	53øF
April	-----	67øF
May	-----	78øF
June	-----	85øF
July, August	-	86øF
September	----	80øF
October	-----	69øF
November	-----	56øF
December	-----	44øF

These monthly average temperatures may be exceeded for short periods when natural water temperatures measured upstream of the project exceed the ninetieth

♀

Project No. 2785-002 et al.

-15-

percentile occurrence of water temperatures (i.e., the monthly average temperatures cited in item No. 2 minus 5øF).

Within six months of the date of issuance of this order, the Licensee shall file for Commission approval

19981016-3066(1407349)

a plan to monitor, and mitigate if necessary, dissolved oxygen (DO) and temperature levels of the Tittabawassee River downstream from the Sanford Project. The plan shall include provisions for: (1) monitoring of DO and temperature downstream from Sanford Dam with the sensor locations and monitoring frequency determined in consultation with the Michigan Department of Natural Resources (Michigan DNR) and the U.S. Fish and Wildlife Service (FWS); and (2) a description of operating procedures developed in consultation with Michigan DNR and FWS to alleviate water quality conditions which deviate from the above limits.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources and the U.S. Fish and Wildlife Service. The monitoring plan shall include a schedule for: (1) implementation of the program within twenty-four months from the date of issuance of this order; (2) consultation with the Michigan Department of Natural Resources and the U.S. Fish and Wildlife Service concerning the results of the monitoring; and (3) filing the results, agency comments, and Licensee's response to agency comments with the Commission.

The Licensee shall include with the plan, documentation of consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 408. Within one year of the date of issuance of this order, the Licensee shall file for Commission approval a Bald Eagle Management Plan to protect the federally listed as threatened bald eagle (*Haliaeetus leucocephalus*) and its habitat. The plan

♀

Project No. 2785-002 et al.

-16-

shall be developed in consultation with the U.S. Fish and Wildlife Service and the Michigan Department of Natural Resources, and include, but not be limited to the following:

- (1) The results of a winter and breeding season survey of bald eagles and a bald eagle habitat assessment

19981016-3066(1407349)

of project lands and waters, including descriptive and mapped identification of existing and potential future eagle perching, roosting, nesting, and foraging habitat areas;

- (2) A proposed protocol and an implementation schedule for an ongoing bald eagle monitoring program;
- (3) Specific measures to maintain and protect existing and potential eagle habitat areas on project lands and waters, including an implementation schedule;
- (4) Specific measures to maintain and protect bald eagle perch and roost trees on Licensee-owned project lands, including an implementation schedule; and
- (5) Procedures for notifying the Commission if potential adverse affects to eagles or their habitats arise as a result of project operation or activities on project lands or waters.

The Licensee shall include in the plan documentation of consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan.

Article 409. Within six months of the date of issuance of this order, the Licensee shall, in consultation with the Michigan Department of Natural Resources, file for Commission approval a plan to monitor purple loosestrife and Eurasian watermilfoil in project waters. The Commission reserves the right to require changes to the plan.

♀

Project No. 2785-002 et al.

-17-

The plan shall include, but not be limited to: (1) a description of the monitoring method; (2) a monitoring schedule; (3) a schedule for providing the monitoring results to Michigan DNR; (4) documentation of agency consultation, including copies of comments and recommendations on the completed plan; and (5) specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment

19981016-3066(1407349)

and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

If at any time during the period of license, the Michigan Department of Natural Resources demonstrates that purple loosestrife or Eurasian watermilfoil is significantly affecting fish and wildlife populations at the project and that control measures are needed, and the Commission agrees with those determinations, the Commission may require the Licensee to cooperate with Michigan DNR and to undertake reasonable measures to control or eliminate the weeds in project waters.

Article 410. The Licensee, before starting any land-clearing or land-disturbing activities within the project boundary, including recreation developments at the project, shall consult with the State Historic Preservation Officer.

If the Licensee discovers previously unidentified archeological or historic properties during the course of constructing or developing project works or other facilities at the project, the Licensee shall stop all land-clearing and land-disturbing activities in the vicinity of the properties and consult with the State Historic Preservation Officer.

In these instances, the Licensee shall file for Commission approval a cultural resource management plan (plan) prepared by a qualified cultural resource specialist after having consulted with the State Historic Preservation Officer. The plan shall include the following items: (1) a description of each discovered property indicating whether it is listed on or eligible to be listed on the National Register of Historic Places; (2) a description of the potential effect on each discovered property; (3) proposed measures for avoiding or mitigating effects; (4) documentation of the nature and extent of consultation; and (5) a schedule for mitigating effects and conducting additional studies.

♀

Project No. 2785-002 et al.

-18-

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan after it has been prepared and provided to the agencies, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall

19981016-3066(1407349)

include the Licensee's reasons, based on site-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 411. The Licensee shall operate the Sanford Project so that the project reservoir elevation does not fluctuate more than 0.4 foot below or 0.3 foot above the normal pool elevation of 625.0 feet National Geodetic Vertical Datum (NGVD), except during the winter drawdown. The Licensee shall begin the winter drawdown after December 15, and shall complete the winter drawdown by January 15 of each year. The Licensee shall complete the refill of the reservoir, thus ending the winter drawdown period, prior to the surface water temperature of the reservoir reaching 39°F. During the winter drawdown, the Licensee shall operate the Sanford Project so that the reservoir level does not fall below 622.0 feet NGVD, and so that the daily fluctuation in reservoir elevation does not exceed 0.7 foot. Management of reservoir fluctuations is required within sixty days of installation of reservoir level gages required by Article 402.

The required reservoir elevation may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods for project maintenance purposes, upon mutual agreement between the Licensee and the Michigan Department of Natural Resources. If the reservoir level fluctuation is so modified, the Licensee shall notify the Commission as soon as possible, but no later than ten days after each such incident.

85 FERC ¶ 61,064

UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

Before Commissioners: James J. Hoecker, Chairman;
Vicky A. Bailey, William L. Massey,
Linda Breathitt, and Curt Hébert, Jr.

Wolverine Power Corporation) Project No. 10809-000

ORDER ISSUING MINOR LICENSE

(Issued October 16, 1998)

BACKGROUND

Wolverine Power Corporation (Wolverine) filed applications under Part I of the Federal Power Act (FPA) for original licenses for the continued operation and maintenance of four unlicensed hydroelectric projects located on the Tittabawassee River in Gladwin and Midland Counties, Michigan. Beginning furthest downstream, the projects are: the 3.3-megawatt (MW) Sanford Hydroelectric Project No. 2785, the 4.8-MW Edenville Project No. 10808, the 1.2-MW Smallwood Project No. 10810, and the 1.2-MW Secord Project No. 10809.

We issued a license for the Sanford Project No. 2785 in 1987. 1/ Rehearing requests of the license order have been held in abeyance while we analyzed all four projects together. 2/ We stayed parts of the license order for the same reason. In 1989, Wolverine filed license applications for its Edenville, Smallwood, and Secord Projects.

Notice of the applications was issued, and the State of Michigan Department of Natural Resources (Michigan DNR), the U.S. Department of the Interior (Interior), Donald J. Maladecki, and Terry Whittington filed timely motions to intervene in the three licensing proceedings. Maladecki and Whittington, local residents and recreational users of the project reservoirs, state that large fluctuations of reservoir levels adversely affect boaters and lake-front residences, and ask that any license issued limit such fluctuations.

The Commission staff prepared an Environmental Assessment (EA) that evaluates the impacts of all four projects on the

1/ 41 FERC ¶ 62,192.

2/ The four projects comprise a single unit of development. See Section 3(11) of the FPA, 16 U.S.C. § 796(11).

981020-0310-3

FERC-DOCKETED

Project No. 10809-000

-2-

environmental resources of the area. 3/ We are concurrently issuing an order on rehearing of the Sanford Project license, and orders issuing licenses for the other three projects. This order issues the license for the Secord Project No. 10809.

The license order for the Edenville Project No. 10808 addresses, among other matters, issues of pertinence to all four projects, notably including mode of operation, fluctuation of reservoir levels, and fish entrainment. The discussion in the Edenville license order is incorporated by reference herein.

PROJECT DESCRIPTION

The Secord Project is the most upstream of the four projects. The Secord Dam, which has three sections totaling about 2,085 feet in length and has a maximum height of 55 feet, creates Secord Lake, a 1,100-acre reservoir with a 69-mile shoreline at full pool. There is a 47-foot-long intake leading to the powerhouse, which is located at the dam and has an installed capacity of 1.2 MW. The license application does not propose any new construction or redevelopment.

WATER QUALITY CERTIFICATION

The State of Michigan waived water quality certification for this project by its failure to act on Wolverine's certification request within one year. 4/

SECTION 18 FISHWAY PRESCRIPTION

As requested by Interior, we are including a condition in this license (Article 405) that reserves our authority to require such fishways as Interior may prescribe pursuant to Section 18 of the FPA. 5/

ENDANGERED SPECIES

Bald eagles (federally listed as threatened) are known to forage along the Tittabawassee River, Sanford Lake, and probably

3/ A draft EA was issued March 31, 1994; the final EA was issued August 14, 1998.

4/ See Order Issuing Original License for Project No. 10808.

Project No. 10809-000

-3-

Smallwood Lake. As requested by FWS, Article 406 of the license requires Wolverine to prepare a bald eagle protection plan. 6/

RECOMMENDATIONS OF FEDERAL AND STATE FISH AND WILDLIFE AGENCIES

A. Section 10(j) Recommendations

Section 10(j)(1) of the FPA 7/ requires the Commission, when issuing a license, to include license conditions, based on recommendations of federal and state fish and wildlife agencies submitted pursuant to the Fish and Wildlife Coordination Act, for the protection of, mitigation of adverse impacts to, and enhancement of fish and wildlife resources (including related spawning grounds and habitat) affected by the project. 8/

Michigan DNR and Interior submitted ten recommendations that we have considered under Section 10(j): (1) run-of-river operation of the projects; (2) continued flow releases through the project during project shut-downs; (3) a gaging plan to monitor project operation; (4) establishment of target reservoir elevations and limitation on reservoir fluctuations to +/-0.2 feet; (5) maintenance of state water quality standards for temperature and dissolved oxygen (DO), and development of a monitoring plan; (6) a bald eagle protection plan; (7) a habitat protection plan for state-listed threatened or endangered species; (8) a nuisance flora monitoring and control plan; (9) a wildlife management and land use plan; and (10) an erosion control plan. 9/

6/ Id.

7/ 16 U.S.C. § 803(j)(1).

8/ If the Commission believes that any such recommendation may be inconsistent with the purposes and requirements of Part I of the FPA or applicable law, Section 10(j)(2) requires the Commission and the agencies to attempt to resolve any such inconsistency, giving due weight to the recommendations, expertise, and statutory responsibilities of such agencies. If the Commission then does not adopt a recommendation, it must explain how the recommendation is inconsistent with applicable law and how the conditions selected by the Commission adequately and equitably protect, mitigate damages to, and enhance fish and wildlife.

9/ The agencies submitted five other recommendations that we do not consider under Section 10(j), because they are not specific measures to protect, mitigate damages to, or enhance fish and wildlife. See, e.g., Mead Corp., 72 FERC

(continued...)

Project No. 10809-000

- 4 -

We have included conditions in the Secord license consistent with five of the recommendations and portions of two others: (1) a gaging plan to monitor project operation (Article 405); (2) establishment of target reservoir elevations (Article 403); (3) maintenance of state water quality standards for dissolved oxygen (DO) and temperature downstream of the project, and development of a related monitoring plan (Article 402); (4) a bald eagle protection plan (Article 406); (5) a nuisance flora monitoring and control plan (Article 407); (6) an erosion control plan (Article 401); and (7) a wildlife management and land use plan (Articles 403 and 406). 10/

As explained in the license order for Project No. 10808, we decline to adopt the Section 10(j) recommendations for (1) run-of-river operation, (2) continuous flows from the project during project shutdowns, (3) a temperature change standard, and (4) a habitat protection plan for listed species.

B. Other Recommendations and Resource Issues

As discussed in the Project No. 10808 license order, we decline to include in the Secord license conditions requiring the licensee: (1) to study the costs of project retirement; (2) to perform additional entrainment and mortality studies, evaluate potential protection devices, and provide compensation for fish losses at the project; and (3) to modify project operations or facilities or to install fish passage facilities when so ordered by Michigan DNR.

As proposed by both Wolverine and Michigan DNR, the license requires recreation facility improvements. 11/

In response to comments received, we are including a condition in the Secord Project license that requires Wolverine

2/ (...continued)

¶ 61,027. These recommendations are: (1) a turbine entrainment and mortality study; (2) a reservation of authority to Michigan DNR to order changes in project operations and facilities; (3) a reservation of authority to Michigan DNR to order preparation of an upstream fish passage plan; (4) a plan for recreation facilities; and (5) a plan for studying the costs of decommissioning and partial or complete project removal. We instead consider these recommendations under Section 10(a) of the FPA.

10/ See Order Issuing Original License for Project No. 10808.

11/ Id.; and EA at 60-70.

Project No. 10809-000

- 5 -

to draw down the projects' reservoirs in early-winter to no more than three feet below the target elevations. 12/

COMPREHENSIVE PLANS

Pursuant to Section 10(a)(2)(A) of the FPA 13/ we reviewed the comprehensive plans relevant to this project and found no conflicts. 14/

COMPREHENSIVE DEVELOPMENT

Sections 4(e) and 10(a)(1) of the FPA require the Commission, in acting on applications for license, to give equal consideration to the power and development purposes and to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife, the protection of recreational opportunities, and the preservation of other aspects of environmental quality. Any license issued shall be best adapted to a comprehensive plan for improving or developing a waterway or waterways for all beneficial public uses. The decision to license this project, and the terms and conditions included herein, reflect such consideration.

The EA analyzed the effects associated with the issuance of an original license for the existing Secord Project. It recommends a number of measures to protect and mitigate environmental resources, which we adopt, as discussed herein and in the companion order issuing license for the Edenville Project No. 10808. These measures will establish target reservoir levels, limit reservoir fluctuations, and enhance recreational resources in the project area.

The electricity generated from renewable water power resources will be beneficial, because it will continue to offset the use of fossil-fueled, steam-electric generating plants, thereby conserving nonrenewable resources and reducing atmospheric pollution.

One of the public interest factors the Commission considers is the economic benefits of project power. Under our approach to evaluating the economics of hydropower projects, as articulated

12/ See Order Issuing Original License for Project No. 10808; and EA at 35-36, 48-51, 69-70, and 75.

13/ 16 U.S.C. § 803(a)(2)(A).

14/ See Order Issuing Original License for Project No. 10808.

in Mead Corp., ^{15/} we employ an analysis that uses current costs to compare the costs of the project and likely alternative power, with no forecasts beyond the license issuance date concerning potential future inflation, escalation, or deflation. The basic purpose of the analysis is to provide a general estimate of the potential power benefits and the costs of a project, and reasonable alternatives to project power. The estimate helps to support an informed decision concerning what is in the public interest with respect to a proposed license.

In making our decision, we consider the project power benefits both with the applicant's proposed mitigation measures and with the Commission's proposed recommendations to the applicant's proposal. In addition, certain economic factors related to project decommissioning impinge on the decision to issue original licenses for existing projects that are not present in the licensing of unconstructed projects. If an existing project is not issued a license, or if its licensee declines to accept the license, the project generally will have to be retired in one form or another. This could range from simply removing the generator at the powerhouse to major environmental restoration varying from minor measures to dam removal.

As licensed by the Commission, the Secord Project will produce an average of about 4.0 GWh of energy, at an annual cost of about \$104,000 (26.0 mills/kWh). The current annual value of the project's power would be \$176,000 (44.0 mills/kWh). ^{16/} To determine whether the project is currently economically beneficial, we subtract the project's cost from the value of the project's power. Thus, the project, as licensed by the Commission would have a net benefit of about \$72,000 (about 18.0 mills/kWh).

As explained in Mead, the economic analysis is by necessity inexact, and project economics is only one of many public interest factors considered in determining whether or not, and under what conditions, to issue a license. Wolverine is ultimately responsible and best able to determine whether continued operation of the existing project, with the conditions adopted herein, is a reasonable decision in these circumstances.

^{15/} 72 FERC ¶ 61,027 (1995).

^{16/} We base this value on the cost of alternative resources, which in this case is the cost of a new combined cycle and simple cycle combustion turbine plants, the regional cost of natural gas, and peak and off-peak energy values. The estimate of the value of project power is more completely described in the EA.

Project No. 10809-000

- 7 -

Based on our review of the comments on this project filed by agencies and the public, our review of the staff's evaluation of the environmental and economic effects of the project and its alternatives, and our analysis pursuant to Sections 4(e) and 10(a)(1), we find that the Secord Project, with our mitigative measures, will be best adapted to the comprehensive development of the Tittabawassee River for beneficial public uses.

LICENSE TERM AND ANNUAL CHARGES

The license for the Secord Project will be issued for a prospective 30-year term. ^{17/} In addition, the license will be conditioned upon payment of an additional amount equivalent to the charges that would have been collected, had Wolverine obtained a license for this project in a timely manner, to when it first was required, i.e., from April 1, 1962. ^{18/}

The Commission orders:

(A) This license is issued to Wolverine Power Corporation (Licensee) for a period of 30 years, effective the first day of the month in which this order is issued, to operate and maintain the Secord Project. This license is subject to the terms and conditions of the Federal Power Act (FPA), which is incorporated by reference as part of this license, and subject to the regulations the Commission issues under the provisions of the FPA.

(B) The Secord Project consists of:

(1) All lands, to the extent of the Licensee's interest in those lands shown by exhibit G:

<u>Exhibit G-</u>	<u>FERC No. 10809-</u>	<u>Showing</u>
1	6	Secord Project Map

(2) Project works consisting of: (a) Secord Lake, an 1,100-acre reservoir with a gross storage of approximately 15,000 acre-feet at the normal pool elevation of 750.8 feet National Geodetic Vertical Datum; (b) a 1,400-foot-long earth embankment

^{17/} See Order Issuing Original License for Project No. 10808.

^{18/} Id. As of October 1, 1994, the Commission is not assessing annual charges for projects, like the Secord, with less than 1.5-MW authorized installed capacity. Therefore, the Secord Project will be assessed annual charges for the period April 1, 1962, through September 30, 1994.

Project No. 10809-000

-8-

section of the dam (maximum height of 55.0 feet) between the left abutment and the powerhouse; (c) a 600-foot-long earth embankment section of the dam between the spillway and the right abutment; (d) a reinforced concrete multiple arch spillway with an ogee crest and two Taintor gates; (e) a powerhouse integral with the dam, equipped with one Francis vertical-axis turbine-generator unit rated at 1.2 MW; (f) a 47-foot-long intake structure; and (g) appurtenant facilities.

The project works generally described above are more specifically shown and described by those portions of Exhibit A and F that also form a part of the application for license and that are designed and described as:

Exhibit A: The turbines and generators as described on page A-1 of the Exhibit A filed July 24, 1989.

<u>Exhibit F Drawing</u>	<u>FERC No.</u>	<u>Description</u>
F-1	10809-1	Second Survey Plan
F-2	10809-2	Second Plan View
F-3	10809-3	Second Spillway Section
F-4	10809-4	Second Powerhouse Section
F-5	10809-5	Second Embankment Section

(3) All of the structures, fixtures, equipment, or facilities used to operate or maintain the project, all portable property that may be employed in connection with the project, and all riparian or other rights that are necessary or appropriate in the operation or maintenance of the project.

(C) The Exhibits A, F, and G as designated in ordering paragraph (B) above are approved and made part of the license.

(D) The following sections of the FPA are waived and excluded from the license for this minor project:

4(b), except the second sentence; 4(e), insofar as it relates to approval of plans by the Chief of Engineers and the Secretary of the Army; 6, insofar as it relates to public notice and to the acceptance and expression in the license of terms and conditions of the Act that are waived here; 10(c), insofar as it relates to depreciation reserves; 10(d); 10(f); 14, except insofar as the power of condemnation is reserved; 15; 16; 19; 20; and 22.

(E) This license is subject to the articles set forth in Form L-9 (October 1975), entitled, "Terms and Conditions of License for Constructed Minor Project Affecting Navigable Waters of the United States," and the following additional articles.

Project No. 10809-000

- 9 -

Article 201. The Licensee shall pay the United States the following annual charges:

- (1) From April 1, 1962, through September 30, 1994, for the purpose of reimbursing the United States for the cost of administration of Part I of the Federal Power Act (FPA), a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 1,200 kilowatts (kW).
- (2) From October 1, 1998, through August 31, 2028, for the purpose of reimbursing the United States for the cost of administration of Part I of the FPA, as determined by the Commission, a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 1,200 kW. Under the regulations currently in effect, projects with authorized installed capacity of less than or equal to 1,500 kW will not be assessed an annual charge.

Article 401. Within six months of license issuance, the Licensee shall file for Commission approval a plan for erosion control in order to minimize shoreline erosion and bank instability occurring in the project reservoir and the river area downstream from the project dam and tailrace. Erosion control measures in the plan shall adhere to the most recent version of the Michigan Department of Transportation standards, and shall be designed to allow pedestrian access while providing long-term stability.

The plan shall include at a minimum:

- (1) a summary description of the existing erosion control program;
- (2) a description of measures to monitor shoreline erosion and bank instability caused by project operations;
- (3) descriptions, functional design drawings, and topographic map locations of proposed new and enhanced control measures;
- (4) a description of how the control measures will allow pedestrian access while providing long-term stability;
- (5) identification of the Michigan Department of Transportation standards used, and description of how the pertinent standards would be adhered to;

- (6) an implementation schedule;
- (7) provisions for the Licensee's periodic review and revision of the plan; and
- (8) provisions for provide the results of its monitoring program to the Michigan Department of Natural Resources, other agencies, and property owners upon request.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources and the Natural Resources Conservation Service. The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan, and specific description of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of 30 days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. No land-disturbing or land-clearing activities shall begin until the Licensee is notified by the Commission that the plan is approved. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 402. The Licensee must implement all reasonable and prudent measures to ensure that the following water quality standards are met whenever inflows to the projects are greater than or equal to the 95-percent-exceedance inflow:

- (1) Dissolved oxygen (DO) concentrations in the project's tailwaters of not less than 5 milligrams per liter (mg/l) at all times; and
- (2) monthly average temperatures downstream from the project of no greater than:

January	-----	42°F
February	-----	41°F
March	-----	53°F
April	-----	67°F
May	-----	78°F
June	-----	85°F
July, August	-	86°F
September	----	80°F
October	-----	69°F
November	-----	56°F
December	-----	44°F

Project No. 10809-000

- 11 -

These monthly average temperatures may be exceeded for short periods when natural water temperatures measured upstream of the project exceed the 90th percentile occurrence of water temperatures (i.e., the monthly average temperatures cited in item No. 2 minus 5°F).

Within six months of license issuance, the Licensee shall file for Commission approval a plan to monitor, and mitigate if necessary, DO and temperature levels of the Tittabawassee River downstream from the Secord Project. The plan shall include provisions for: (1) monitoring of DO and temperature above the Secord impoundment and downstream from Secord Dam with the sensor locations and monitoring frequency determined in consultation with the Michigan Department of Natural Resources (Michigan DNR) and the U.S. Fish and Wildlife Service (FWS); and (2) a description of operating procedures developed in consultation with Michigan DNR and FWS to alleviate water quality conditions which deviate from the above limits.

The Licensee shall prepare the plan after consultation with Michigan DNR and FWS. The monitoring plan shall include schedules for: (1) implementing the plan within 24 months of license issuance; (2) consulting with Michigan DNR and FWS on the results of monitoring; and (3) filing the results, agency comments, and Licensee's response to agency comments with the Commission.

The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 403. Within sixty days of the installation of reservoir level gages required by Article 405, the Licensee shall operate the Secord Project so that the project reservoir elevation does not fluctuate more than 0.4 foot below or 0.3 foot above the normal pool elevation of 750.8 feet National Geodetic Vertical Datum (NGVD) except during the winter drawdown. The Licensee shall begin the winter drawdown after December 15, and shall complete the winter drawdown by January 15 of each year. The Licensee shall complete the refill of the reservoir, thus ending the winter drawdown period, prior to the surface water

Project No. 10809-000

-12-

temperature of the reservoir reaching 39°F. During the winter drawdown, the Licensee shall operate the Secord Project so that the reservoir level does not fall below 747.8 feet NGVD, and so that the daily fluctuation in reservoir elevation does not exceed 0.7 foot.

The required reservoir elevations may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods for project maintenance purposes, upon mutual agreement between the Licensee and the Michigan Department of Natural Resources. If the reservoir level fluctuation is so modified, the Licensee shall notify the Commission as soon as possible, but no later than ten days after each such incident.

Article 404. The Commission reserves the authority to require the Licensee to construct, maintain, and operate or to provide for the construction, maintenance, and operation of such fishways as may be prescribed by the Secretary of the U.S. Department of the Interior.

Article 405. To ensure compliance with the reservoir elevation requirements of Article 403, the Licensee, within 180 days of license issuance, shall file for Commission approval a reservoir level gaging plan to monitor water surface elevations in Secord Lake at intervals of no greater than 15 minutes.

The plan shall include, but not be limited to, (1) details on the location, design, and calibration of the monitoring equipment; (2) the method of data collection; (3) provisions for compiling and storing the data; and (3) provisions for supplying the data to the U.S. Fish and Wildlife Service (FWS), the U.S. Geological Survey (USGS), and the Michigan Department of Natural Resources (Michigan DNR) within thirty days of the agency's request.

The monitoring plan shall also include a schedule for: (1) implementation of the program; (2) consultation with the appropriate federal and state agencies concerning the data from the monitoring; and (3) filing the data, agency comments, and the Licensee's response to agency comments with the Commission.

The Licensee shall prepare the plan after consultation with Michigan DNR, FWS, and USGS. The Licensee shall include with the plan, documentation of consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations prior to filing the plan with the Commission. If the Licensee does not adopt a recommendation,

Project No. 10809-000

-13-

the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 406. Within one year of license issuance, the Licensee shall file for Commission approval a Bald Eagle Management Plan to protect the federally listed as threatened bald eagle (Haliaeetus leucocephalus) and its habitat. The Commission reserves the right to require changes to the plan.

The plan shall be developed in consultation with the U.S. Fish and Wildlife Service (FWS) and the Michigan Department of Natural Resources (Michigan DNR), and include, but not be limited to the following:

- (1) The results of a winter and breeding season survey of bald eagles and a bald eagle habitat assessment of project lands and waters, including descriptive and mapped identification of any existing and potential future eagle perching, roosting, nesting, and foraging habitat areas;
- (2) A proposed protocol and an implementation schedule for an ongoing bald eagle monitoring program;
- (3) Specific measures to maintain and protect any existing and potential eagle habitat areas on project lands and waters, including an implementation schedule;
- (4) Specific measures to maintain and protect bald eagle perch and roost trees on project lands, including an implementation schedule; and
- (5) Procedures for notifying the Commission if potential adverse impacts to eagles or their habitats arise as a result of project operation or activities on project lands or waters.

The Licensee shall include in the plan documentation of consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

Project No. 10809-000

- 14 -

Article 407. Within six months of license issuance, the Licensee shall, in consultation with the Michigan Department of Natural Resources (Michigan DNR), file for Commission approval a plan to monitor purple loosestrife and Eurasian watermilfoil in project waters. The Commission reserves the right to require changes to the plan.

The plan shall include, but not be limited to: (1) a description of the monitoring method; (2) a monitoring schedule; and (3) a schedule for providing the monitoring results to Michigan DNR; (4) documentation of agency consultation, including copies of comments and recommendations on the completed plan; and (5) specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

If at any time during the period of license, Michigan DNR demonstrates that purple loosestrife or Eurasian watermilfoil is significantly affecting fish and wildlife populations at the project and that control measures are needed, and the Commission agrees with those determinations, the Commission may require the Licensee to cooperate with Michigan DNR and to undertake reasonable measures to control or eliminate the weeds in project waters.

Article 408. The Licensee, before starting any land-clearing or land-disturbing activities within the project boundary, including recreation developments at the project, shall consult with the State Historic Preservation Officer.

If the Licensee discovers previously unidentified archeological or historic properties during the course of constructing or developing project works or other facilities at the project, the Licensee shall stop all land-clearing and land-disturbing activities in the vicinity of the properties and consult with the State Historic Preservation Officer.

In these instances, the Licensee shall file for Commission approval a cultural resource management plan prepared by a qualified cultural resource specialist after having consulted with the State Historic Preservation Officer. The plan shall include the following items: (1) a description of each discovered property indicating whether it is listed, or eligible to be listed, on the National Register of Historic Places; (2) a description of the potential effect on each discovered property; (3) proposed measures for avoiding or mitigating effects; (4) documentation of the nature and extent of consultation; and

Project No. 10809-000

-15-

(5) a schedule for mitigating effects and conducting additional studies.

The Licensee shall include with the plan documentation of agency consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on site-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 409. Within one year of license issuance, the Licensee shall file for Commission approval a recreation plan for the Secord Project. The Commission reserves the right to make changes to the plan.

The plan shall be prepared in consultation with the Michigan Department of Natural Resources (Michigan DNR) and shall include the following:

- (1) A fishing access site at the Secord Project dam that shall include (a) directional signs; (b) a barrier-free restroom; (c) access paths to the tailwater and dike areas, restrooms, canoe portage, and parking areas; (d) parking for 15 vehicles with designated barrier-free parking spaces; (e) improved railed shoreline fishing pier at the tailwater; and (f) improved railed barrier-free fishing pier located on the dike shoreline near the dam;
- (2) A canoe portage;
- (3) Installation of signs that identify the project's recreational facilities;
- (4) functional design drawings, costs for the improvements to, or construction of, the required facilities; and
- (5) A schedule for completing construction of the required facilities within three years of license issuance.

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee

Project No. 10809-000

-16-

shall allow a minimum of thirty days for the agencies to comment before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

No land clearing or land-disturbing activities shall begin until the Licensee is notified by the Commission that the plan is approved.

Article 410. (a) In accordance with the provisions of this article, the Licensee shall have the authority to grant permission for certain types of use and occupancy of project lands and waters and to convey certain interests in project lands and waters for certain types of use and occupancy, without prior Commission approval. The Licensee may exercise the authority only if the proposed use and occupancy is consistent with the purposes of protecting and enhancing the scenic, recreational, and other environmental values of the projects. For those purposes, the Licensee shall also have continuing responsibility to supervise and control the use and occupancies for which it grants permission, and to monitor the use of, and ensure compliance with the covenants of the instrument of conveyance for, any interest that it has conveyed, under this article. If a permitted use and occupancy violates any condition of this article or any other condition imposed by the Licensee for protection and enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of this article is violated, the Licensee shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, canceling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

(b) The type of use and occupancy of project lands and waters for which the Licensee may grant permission without prior Commission approval are: (1) landscape plantings; (2) non-commercial piers, landings, boat docks, or similar structures and facilities that can accommodate no more than 10 watercraft at a time and where said facility is intended to serve single-family type dwellings; and (3) embankments, bulkheads, retaining walls or similar structures for erosion control to protect the existing shoreline.

To the extent feasible and desirable to protect and enhance the project's scenic, recreational, and other environmental values, the Licensee shall require multiple use and occupancy of facilities for access to projects lands or waters. The Licensee shall also ensure, to the satisfaction of the Commission's authorized representative, that the use and occupancies for which it grants permission are maintained in good repair and comply

Project No. 10809-000

-17-

with applicable state and local health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, the Licensee shall: (1) inspect the site of the proposed construction; (2) consider whether the planting of vegetation or the use of riprap would be adequate to control erosion at the site; and (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline.

To implement this paragraph (b), the Licensee may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover the Licensee's costs of administering the permit program. The Commission reserves the right to require the Licensee to file a description of its standards, guidelines, and procedures for implementing this paragraph (b) and to require modification of those standards, guidelines, or procedures.

(c) The Licensee may convey easements or rights-of-way across, or leases of, project lands for: (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary state and federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas, and electric utility distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir.

No later than January 31 of each year, the Licensee shall file three copies of a report briefly describing for each conveyance made under this paragraph (c) during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed.

(d) The Licensee may convey fee title to, easements or rights-of-way across, or leases or project lands for: (1) construction of new bridges or roads for which all necessary state and federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary federal and state water quality certification or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection of support structures within the project boundary, for which all necessary federal and state approvals have been

Project No. 10809-000

-18-

obtained; (5) private or public marinas that can accommodate no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed for a particular use is five acres or less; (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation; and (iii) no more than 50 total acres of project lands for the project development are conveyed under this clause (d) (7) in any calendar year.

At least forty-five days before conveying any interest in project lands under this paragraph (d), the Licensee must submit a letter to the Director, Office of Hydropower Licensing, stating its intent to convey the interest and briefly describing the type of interest and location of the lands to be conveyed (a marked exhibit G or K map may be used), the nature of the proposed use, the identity of any federal or state agency official consulted, and any federal or state approvals required for the proposed use. Unless the Director, within forty-five days from the filing date, requires the Licensee to file an application for prior approval, the Licensee may convey the intended interest at the end of that period.

(e) The following additional conditions apply to any intended conveyance under paragraph (c) or (d) of this article:

- (1) Before conveying the interest, the Licensee shall consult with federal and state fish and wildlife or recreation agencies, as appropriate, and the State Historic Preservation Officer.
- (2) Before conveying the interest, the Licensee shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved exhibit R or approved report on recreational resources of an exhibit E; or, if the project does not have an approved exhibit R or approved report on recreational resources, that the lands to be conveyed do not have recreational value.
- (3) The instrument of conveyance must include covenants running with the land adequate to ensure that: (i) the use of the land conveyed shall not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use; and (ii) the grantee shall take all reasonable precautions to insure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will

Project No. 10809-000

- 19 -

occur in a manner that will protect the scenic, recreational, and environmental values of the project.

- (4) The Commission reserves the right to require the Licensee to take reasonable remedial action to correct any violation of the terms and conditions of this article, for the protection and enhancement of the project's scenic, recreational, and other environmental values.

(f) The conveyance of an interest in project lands under this article does not in itself change the project boundaries. The project boundaries may be changed to exclude land conveyed under this article only upon approval of revised exhibit G or K drawings (project boundary maps) reflecting exclusion of that land. Lands conveyed under this article will be excluded from the project only upon a determination that the lands are not necessary for project purposes, such as operation and maintenance, flowage, recreation, public access, protection of environmental resources, and shoreline control, including shoreline aesthetic values. Absent extraordinary circumstances, proposals to exclude lands conveyed under this article from the project shall be consolidated for consideration when revised exhibit G or K drawings would be filed for approval for other purposes.

(g) The authority granted to the Licensee under this article shall not apply to any part of the public lands and reservations of the United States included within the project boundary.

(E) The Licensee shall serve copies of any Commission filing required by this order on any entity specified in this order to be consulted on matters related to that filing. Proof of service on these entities must accompany the filing with the Commission.

(F) This order is final unless a request for rehearing is filed within thirty days of the date of its issuance pursuant to Section 313 of the Federal Power Act. The filing of a request for rehearing does not operate as a stay of the effective date of this order or of any other date specified in this order, except

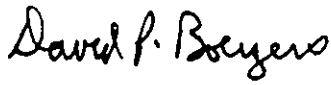

Project No. 10809-000

-20-

as specifically ordered by the Commission. The Licensee's failure to file a request for rehearing shall constitute acceptance of this order.

By the Commission.

David P. Boergers,
Secretary.

85 FERC ¶ 61,065

UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

Before Commissioners: James J. Hoecker, Chairman;
Vicky A. Bailey, William L. Massey,
Linda Breathitt, and Curt Hébert, Jr.

Wolverine Power Corporation) Project No. 10810-000

ORDER ISSUING MINOR LICENSE

(Issued October 16, 1998)

BACKGROUND

Wolverine Power Corporation (Wolverine) filed applications under Part I of the Federal Power Act (FPA) for original licenses for the continued operation and maintenance of four unlicensed hydroelectric projects located on the Tittabawassee River in Gladwin and Midland Counties, Michigan. Beginning furthest downstream, the projects are: the 3.3-megawatt (MW) Sanford Hydroelectric Project No. 2785, the 4.8-MW Edenville Project No. 10808, the 1.2-MW Smallwood Project No. 10810, and the 1.2-MW Secord Project No. 10809.

We issued a license for the Sanford Project No. 2785 in 1987. 1/ Rehearing requests of the license order have been held in abeyance while we analyzed all four projects together. 2/ We stayed parts of the license order for the same reason. In 1989, Wolverine filed license applications for its Edenville, Smallwood, and Secord Projects.

Notice of the applications was issued, and the State of Michigan Department of Natural Resources (Michigan DNR), the U.S. Department of the Interior (Interior), Donald J. Maladecki, and Terry Whittington filed timely motions to intervene in the three licensing proceedings. Maladecki and Whittington, local residents and recreational users of the project reservoirs, state that large fluctuations of reservoir levels adversely affect boaters and lake-front residences, and ask that any license issued limit such fluctuations.

The Commission staff prepared an Environmental Assessment (EA) that evaluates the impacts of all four projects on the

1/ 41 FERC ¶ 62,192.

2/ The four projects comprise a single unit of development. See Section 3(11) of the FPA, 16 U.S.C. § 796(11).

981020-0309-3

FERC-DOCKETED
OCT 16 1998

Project No. 10810-000

- 2 -

environmental resources of the area. 3/ We are concurrently issuing an order on rehearing of the Sanford Project license, and orders issuing licenses for the other three projects. This order issues the license for the Smallwood Project No. 10810.

Concurrently with this order, an Order Issuing Original License is being issued for the Edenville Project No. 10808 which addresses, among other matters, issues of pertinence to all four projects, notably including mode of operation, fluctuation of reservoir levels, and fish entrainment. The discussion in the Edenville licensing order is incorporated by reference herein.

PROJECT DESCRIPTION

The Smallwood Project, the third project as one travels upstream, of the four projects. The Smallwood Dam, which has three sections totaling about 1,095 feet in length and a maximum height of 38 feet, creates Smallwood Lake, a 500-acre reservoir with a gross storage of approximately 6,000 acre-feet and a 25-mile shoreline at normal pool elevation. There is a 25-foot-long intake leading to the powerhouse, which is located at the dam and has an installed capacity of 1.2 MW. The license application does not propose any new construction or redevelopment.

WATER QUALITY CERTIFICATION

The State of Michigan waived water quality certification for this project by its failure to act on Wolverine's certification request within one year. 4/

SECTION 18 FISHWAY PRESCRIPTION

As requested by Interior, we are including a condition in this license (Article 404) that reserves our authority to require such fishways as Interior may prescribe pursuant to Section 18 of the FPA. 5/

ENDANGERED SPECIES

Bald eagles (federally listed as threatened) are known to forage along the Tittabawassee River, Sanford Lake, and probably

3/ A draft EA was issued March 31, 1994; the final EA was issued August 14, 1998.

4/ See Order Issuing Original License for Project No. 10808.

5/ Id.

Project No. 10810-000

- 3 -

Smallwood Lake. As requested by FWS, Article 406 of the license requires Wolverine to prepare a bald eagle protection plan. 6/

RECOMMENDATIONS OF FEDERAL AND STATE FISH AND WILDLIFE AGENCIES

A. Section 10(j) Recommendations

Section 10(j)(1) of the FPA 7/ requires the Commission, when issuing a license, to include license conditions, based on recommendations of federal and state fish and wildlife agencies submitted pursuant to the Fish and Wildlife Coordination Act, for the protection of, mitigation of adverse impacts to, and enhancement of fish and wildlife resources (including related spawning grounds and habitat) affected by the project. 8/

Michigan DNR and Interior submitted ten recommendations that we have considered under Section 10(j): (1) run-of-river operation of the projects; (2) continued flow releases through the project during project shut-downs; (3) a gaging plan to monitor project operation; (4) establishment of target reservoir elevations and limitation on reservoir fluctuations to +/-0.2 feet; (5) maintenance of state water quality standards for temperature and dissolved oxygen (DO), and development of a monitoring plan; (6) a bald eagle protection plan; (7) a habitat protection plan for state-listed threatened or endangered species; (8) a nuisance flora monitoring and control plan; (9) a wildlife management and land use plan; and (10) an erosion control plan. 9/

6/ Id.

7/ 16 U.S.C. § 803(j)(1).

8/ If the Commission believes that any such recommendation may be inconsistent with the purposes and requirements of Part I of the FPA or applicable law, Section 10(j)(2) requires the Commission and the agencies to attempt to resolve any such inconsistency, giving due weight to the recommendations, expertise, and statutory responsibilities of such agencies. If the Commission then does not adopt a recommendation, it must explain how the recommendation is inconsistent with applicable law and how the conditions selected by the Commission adequately and equitably protect, mitigate damages to, and enhance fish and wildlife.

9/ The agencies submitted five other recommendations that we do not consider under Section 10(j), because they are not specific measures to protect, mitigate damages to, or enhance fish and wildlife. See, e.g., Mead Corp., 72 FERC
(continued...)

Project No. 10810-000

- 4 -

We have included conditions in the Smallwood license consistent with five of the recommendations and portions of two others: (1) a gaging plan to monitor project operation (Article 405); (2) establishment of target reservoir elevations (Article 403); (3) maintenance of state water quality standards for dissolved oxygen (DO) and temperature downstream of the project, and development of a related monitoring plan (Article 402); (4) a bald eagle protection plan (Article 406); (5) a nuisance flora monitoring and control plan (Article 407); (6) an erosion control plan (Article 401); and (7) a wildlife management and land use plan (Articles 403 and 406). 10/

As explained in the license order for Project No. 10808, we decline to adopt the Section 10(j) recommendations for (1) run-of-river operation, (2) continuous flows from the project during project shutdowns, (3) a temperature change standard, and (4) a habitat protection plan for listed species. 11/

B. Other Recommendations and Resource Issues

As discussed in the Project No. 10808 license order, we decline to include in the Smallwood license conditions requiring the licensee: (1) to study the costs of project retirement; (2) to perform additional entrainment and mortality studies, evaluate potential protection devices, and provide compensation for fish losses at the project; and (3) to modify project operations or facilities or to install fish passage facilities when so ordered by Michigan DNR. 12/

9/ (...continued)

¶ 61,027. These recommendations are: (1) a turbine entrainment and mortality study; (2) a reservation of authority to Michigan DNR to order changes in project operations and facilities; (3) a reservation of authority to Michigan DNR to order preparation of an upstream fish passage plan; (4) a plan for recreation facilities; and (5) a plan for studying the costs of decommissioning and partial or complete project removal. We instead consider these recommendations under Section 10(a) of the FPA.

10/ See Order Issuing Original License for Project No. 10808.

11/ Id.

12/ Id.

Project No. 10810-000

- 5 -

As proposed by both Wolverine and Michigan DNR, the license requires recreation facility improvements. 13/

In response to comments received, we are including a condition in the Smallwood Project license that requires Wolverine to draw down the projects' reservoirs in early-winter to no more than three feet below the target elevations. 14/

COMPREHENSIVE PLANS

Pursuant to Section 10(a)(2)(A) of the FPA 15/ we reviewed the comprehensive plans relevant to this project and found no conflicts. 16/

COMPREHENSIVE DEVELOPMENT

Sections 4(e) and 10(a)(1) of the FPA require the Commission, in acting on applications for license, to give equal consideration to the power and development purposes and to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of fish and wildlife, the protection of recreational opportunities, and the preservation of other aspects of environmental quality. Any license issued shall be best adapted to a comprehensive plan for improving or developing a waterway or waterways for all beneficial public uses. The decision to license this project, and the terms and conditions included herein, reflect such consideration.

The EA analyzed the effects associated with the issuance of an original license for the existing Secord Project. It recommends a number of measures to protect and mitigate environmental resources, which we adopt, as discussed herein and in the companion order issuing license for the Edenville Project No. 10808. These measures will establish target reservoir levels, limit reservoir fluctuations, and enhance recreational resources in the project area.

The electricity generated from renewable water power resources will be beneficial, because it will continue to offset the use of fossil-fueled, steam-electric generating plants,

13/ Id.; and EA at 60-70.

14/ See Order Issuing original License for Project No. 10808; and EA at 35-36, 48-51, 69-70, and 75.

15/ 16 U.S.C. § 803(a)(2)(A).

16/ See Order Issuing Original License for Project No. 10808.

Project No. 10810-000

- 6 -

thereby conserving nonrenewable resources and reducing atmospheric pollution.

One of the public interest factors the Commission considers is the economic benefits of project power. Under our approach to evaluating the economics of hydropower projects, as articulated in Mead Corp., 17/ we employ an analysis that uses current costs to compare the costs of the project and likely alternative power, with no forecasts beyond the license issuance date concerning potential future inflation, escalation, or deflation. The basic purpose of the analysis is to provide a general estimate of the potential power benefits and the costs of a project, and reasonable alternatives to project power. The estimate helps to support an informed decision concerning what is in the public interest with respect to a proposed license.

In making our decision, we consider the project power benefits both with the applicant's proposed mitigation measures and with the Commission's proposed recommendations to the applicant's proposal. In addition, certain economic factors related to project decommissioning impinge on the decision to issue original licenses for existing projects that are not present in the licensing of unconstructed projects. If an existing project is not issued a license, or if its licensee declines to accept the license, the project generally will have to be retired in one form or another. This could range from simply removing the generator at the powerhouse to major environmental restoration varying from minor measures to dam removal.

As licensed by the Commission, the Smallwood Project will produce an average of about 2.650 GWh of energy, at an annual cost of about \$89,000 (33.6 mills/kWh). The current annual value of the project's power would be \$116,000 (43.8 mills/kWh). 18/ To determine whether the project is currently economically beneficial, we subtract the project's cost from the value of the project's power. Thus, the project, as licensed by the Commission would have a net benefit of about \$27,000 (about 10.2 mills/kWh).

17/ 72 FERC ¶ 61,027 (1995).

18/ We base this value on the cost of alternative resources, which in this case is the cost of a new combined cycle and simple cycle combustion turbine plants, the regional cost of natural gas, and peak and off-peak energy values. The estimate of the value of project power is more completely described in the EA.

Project No. 10810-000

- 7 -

As explained in Mead, the economic analysis is by necessity inexact, and project economics is only one of many public interest factors considered in determining whether or not, and under what conditions, to issue a license. Wolverine is ultimately responsible and best able to determine whether continued operation of the existing project, with the conditions adopted herein, is a reasonable decision in these circumstances.

Based on our review of the comments on this project filed by agencies and the public, our review of the staff's evaluation of the environmental and economic effects of the project and its alternatives, and our analysis pursuant to Sections 4(e) and 10(a)(1), we find that the Smallwood Project, with our mitigative measures, will be best adapted to the comprehensive development of the Tittabawassee River for beneficial public uses.

LICENSE TERM AND ANNUAL CHARGES

The license for the Smallwood Project will be issued for a prospective 30-year term. 19/ In addition, the license will be conditioned upon payment of an additional amount equivalent to the charges that would have been collected, had Wolverine obtained a license for this project in a timely manner, to when it first was required, i.e., from April 1, 1962. 20/

The Commission orders:

(A) This license is issued to Wolverine Power Corporation (Licensee) for a period of 30 years, effective the first day of the month in which this order is issued, to operate and maintain the Smallwood Project. This license is subject to the terms and conditions of the Federal Power Act (FPA), which is incorporated by reference as part of this license, and subject to the regulations the Commission issues under the provisions of the FPA.

(B) The Smallwood Project consists of:

(1) All lands, to the extent of the Licensee's interest in those lands shown by exhibit G:

19/ See Order Issuing Original License for Project No. 10808.

20/ Id. As of October 1, 1994, the Commission is not assessing annual charges for projects, like the Secord, with less than 1.5-MW authorized installed capacity. Therefore, the Secord Project will be assessed annual charges for the period April 1, 1962, through September 30, 1994.

Project No. 10810-000

F-3	10810-3	Smallwood Spillway Section
F-4	10810-4	Smallwood Powerhouse Section
F-5	10810-5	Smallwood Embankment Section

(3) All of the structures, fixtures, equipment, or facilities used to operate or maintain the project, all portable property that may be employed in connection with the project, and all riparian or other rights that are necessary or appropriate in the operation or maintenance of the project.

(C) The Exhibits A, F, and G as designated in ordering paragraph (B) above are approved and made part of the license.

(D) The following sections of the FPA are waived and excluded from the license for this minor project:

4(b), except the second sentence; 4(e), insofar as it relates to approval of plans by the Chief of Engineers and the Secretary of the Army; 6, insofar as it relates to public notice

Project No. 10810-000

- 9 -

and to the acceptance and expression in the license of terms and conditions of the Act that are waived here; 10(c), insofar as it relates to depreciation reserves; 10(d); 10(f); 14, except insofar as the power of condemnation is reserved; 15; 16; 19; 20; and 22.

(E) This license is subject to the articles set forth in Form L-9 (October 1975), entitled, "Terms and Conditions of License for Constructed Minor Project Affecting Navigable Waters of the United States," and the following additional articles.

Article 201. The Licensee shall pay the United States the following annual charges:

- (1) From April 1, 1962, through September 30, 1994, for the purpose of reimbursing the United States for the cost of administration of Part I of the Federal Power Act (FPA), a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 1,200 kilowatts (kW).
- (2) From October 1, 1998, through August 31, 2028, for the purpose of reimbursing the United States for the cost of administration of Part I of the FPA, as determined by the Commission, a reasonable amount as determined in accordance with the provisions of the Commission's regulations in effect from time to time. The authorized installed capacity for that purpose is 1,200 kW. Under the regulations currently in effect, projects with authorized installed capacity of less than or equal to 1,500 kW will not be assessed an annual charge.

Article 401. Within six months of license issuance, the Licensee shall file for Commission approval a plan for erosion control in order to minimize shoreline erosion and bank instability occurring in the project reservoir and the river area downstream from the project dam and tailrace. Erosion control measures in the plan shall adhere to the most recent version of the Michigan Department of Transportation standards, and shall be designed to allow pedestrian access while providing long-term stability.

The plan shall include as a minimum:

- (1) a summary description of the existing erosion control program;
- (2) a description of measures to monitor shoreline erosion and bank instability caused by project operations;

Project No. 10810-000

-10-

- (3) descriptions, functional design drawings, and topographic map locations of proposed new and enhanced control measures;
- (4) a description of how the control measures will allow pedestrian access while providing long-term stability;
- (5) identification of the Michigan Department of Transportation standards used, and description of how the pertinent standards would be adhered to;
- (6) an implementation schedule;
- (7) provisions for the Licensee's periodic review and revision of the plan; and
- (8) provisions for provide the results of its monitoring program to the Michigan Department of Natural Resources, other agencies, and property owners upon request.

The Licensee shall prepare the plan after consultation with the Michigan Department of Natural Resources and the Natural Resources Conservation Service. The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan, and specific description of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of 30 days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. No land-disturbing or land-clearing activities shall begin until the Licensee is notified by the Commission that the plan is approved. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 402. The Licensee must implement all reasonable and prudent measures to ensure that the following water quality standards are met whenever inflows to the projects are greater than or equal to the 95-percent-exceedance inflow:

- (1) Dissolved oxygen (DO) concentrations in the project's tailwaters of not less than 5 milligrams per liter (mg/l) at all times; and
- (2) monthly average temperatures downstream from the project of no greater than:

Project No. 10810-000

- 11 -

January	-----	42°F
February	-----	41°F
March	-----	53°F
April	-----	67°F
May	-----	78°F
June	-----	85°F
July, August	-	86°F
September	----	80°F
October	-----	69°F
November	-----	56°F
December	-----	44°F

These monthly average temperatures may be exceeded for short periods when natural water temperatures measured upstream of the project exceed the 90th percentile occurrence of water temperatures (i.e., the monthly average temperatures cited in item No. 2 minus 5°F).

Within six months of license issuance, the Licensee shall file for Commission approval a plan to monitor, and mitigate if necessary, dissolved oxygen (DO) and temperature levels of the Tittabawassee River downstream from the Smallwood Project. The plan shall include provisions for: (1) monitoring of DO and temperature downstream from Smallwood Dam with the sensor locations and monitoring frequency determined in consultation with the Michigan Department of Natural Resources (Michigan DNR) and the U.S. Fish and Wildlife Service (FWS); and (2) description of operating procedures developed in consultation with Michigan DNR and FWS to alleviate water quality conditions which deviate from the above limits.

The Licensee shall prepare the plan after consultation with Michigan DNR and FWS. The monitoring plan shall include schedules for: (1) implementing the plan within 24 months of license issuance; (2) consulting with Michigan DNR and FWS on the results of monitoring; and (3) filing the results, agency comments, and Licensee's response to agency comments with the Commission.

The Licensee shall include with the plan documentation of consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

Project No. 10810-000

-12-

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 403. Within sixty days of the installation of reservoir level gages required by Article 405, the Licensee shall operate the Smallwood Project so that the project reservoir elevation does not fluctuate more than 0.4 foot below or 0.3 foot above the normal pool elevation of 704.8 feet National Geodetic Vertical Datum (NGVD) except during the winter drawdown. The Licensee shall begin the winter drawdown after December 15, and shall complete the winter drawdown by January 15 of each year. The Licensee shall complete the refill of the reservoir, thus ending the winter drawdown period, prior to the surface water temperature of the reservoir reaching 39°F. During the winter drawdown, the Licensee shall operate the Secord Project so that the reservoir level does not fall below 701.8 feet NGVD, and so that the daily fluctuation in reservoir elevation does not exceed 0.7 foot.

The required reservoir elevations may be temporarily modified if required by operating emergencies beyond the control of the Licensee, and for short periods for project maintenance purposes, upon mutual agreement between the Licensee and the Michigan Department of Natural Resources. If the reservoir level fluctuation is so modified, the Licensee shall notify the Commission as soon as possible, but no later than ten days after each such incident.

Article 404. The Commission reserves the authority to require the Licensee to construct, maintain, and operate or to provide for the construction, maintenance, and operation of such fishways as may be prescribed by the Secretary of the U.S. Department of the Interior.

Article 405. To ensure compliance with the reservoir elevation requirements of Article 403, the Licensee, within 180 days of license issuance, shall file for Commission approval a reservoir level gaging plan to monitor water surface elevations in Smallwood Lake at intervals of 15 minutes or less.

The plan shall include, but not be limited to, (1) details on the location, design, and calibration of the monitoring equipment; (2) the method of data collection; (3) provisions for compiling and storing the data; and (3) provisions for supplying the data to the U.S. Fish and Wildlife Service (FWS), the U.S. Geological Survey (USGS), and the Michigan Department of Natural Resources (Michigan DNR) within thirty days of the agency's request.

Project No. 10810-000

- 13 -

The monitoring plan shall also include a schedule for: (1) implementation of the monitoring program; (2) consultation with the appropriate federal and state agencies concerning the data from the monitoring; and (3) filing the data, agency comments, and the Licensee's response to agency comments with the Commission.

The Licensee shall prepare the plan after consultation with Michigan DNR, FWS, and USGS. The Licensee shall include with the plan, documentation of consultation, copies of comments and recommendations on the completed plan after it has been prepared and provided to the agencies, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations prior to filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 406. Within one year of license issuance, the Licensee shall file for Commission approval a Bald Eagle Management Plan to protect the federally listed as threatened bald eagle (Haliaeetus leucocephalus) and its habitat. The Commission reserves the right to require changes to the plan.

The plan shall be developed in consultation with the U.S. Fish and Wildlife Service (FWS) and the Michigan Department of Natural Resources (Michigan DNR), and include, but not be limited to the following:

- (1) The results of a winter and breeding season survey of bald eagles and a bald eagle habitat assessment of project lands and waters, including descriptive and mapped identification of any existing and potential future eagle perching, roosting, nesting, and foraging habitat areas;
- (2) A proposed protocol and an implementation schedule for an ongoing bald eagle monitoring program;
- (3) Specific measures to maintain and protect any existing and potential eagle habitat areas on project lands and waters, including an implementation schedule;
- (4) Specific measures to maintain and protect bald eagle perch and roost trees on project lands, including an implementation schedule; and

Project No. 10810-000

-14-

- (5) Procedures for notifying the Commission if potential adverse impacts to eagles or their habitats arise as a result of project operation or activities on project lands or waters.

The Licensee shall include in the plan documentation of consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

Article 407. Within six months of license issuance, the Licensee shall, in consultation with the Michigan Department of Natural Resources (Michigan DNR), file for Commission approval a plan to monitor purple loosestrife and Eurasian watermilfoil in project waters. The Commission reserves the right to require changes to the plan.

The plan shall include, but not be limited to: (1) a description of the monitoring method; (2) a monitoring schedule; and (3) a schedule for providing the monitoring results to Michigan DNR; (4) documentation of agency consultation, including copies of comments and recommendations on the completed plan; and (5) specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

If at any time during the period of license, Michigan DNR demonstrates that purple loosestrife or Eurasian watermilfoil is significantly affecting fish and wildlife populations at the project and that control measures are needed, and the Commission agrees with those determinations, the Commission may require the Licensee to cooperate with Michigan DNR and to undertake reasonable measures to control or eliminate the weeds in project waters.

Article 408. The Licensee, before starting any land-clearing or land-disturbing activities within the project boundary, including recreation developments at the project, shall consult with the State Historic Preservation Officer.

If the Licensee discovers previously unidentified archeological or historic properties during the course of

Project No. 10810-000

-15-

constructing or developing project works or other facilities at the project, the Licensee shall stop all land-clearing and land-disturbing activities in the vicinity of the properties and consult with the State Historic Preservation Officer.

In these instances, the Licensee shall file for Commission approval a cultural resource management plan prepared by a qualified cultural resource specialist after having consulted with the State Historic Preservation Officer. The plan shall include the following items: (1) a description of each discovered property indicating whether it is listed, or eligible to be listed, on the National Register of Historic Places; (2) a description of the potential effect on each discovered property; (3) proposed measures for avoiding or mitigating effects; (4) documentation of the nature and extent of consultation; and (5) a schedule for mitigating effects and conducting additional studies.

The Licensee shall include with the plan documentation of agency consultation, copies of agency comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment and to make recommendations before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on site-specific information.

The Commission reserves the right to require changes to the plan. Upon Commission approval, the Licensee shall implement the plan, including any changes required by the Commission.

Article 409. Within one year of license issuance, the Licensee shall file for Commission approval a recreation plan for the Smallwood Project. The Commission reserves the right to make changes to the plan.

The plan shall be prepared in consultation with the Michigan Department of Natural Resources (Michigan DNR) and shall include the following:

- (1) A fishing access site at the project dam that shall include (a) directional signs; (b) a barrier-free restroom; (c) access paths to the tailwater and dike areas, restrooms, canoe portage, and parking areas; (d) parking for 15 vehicles with designated barrier-free parking spaces; (e) improved railed shoreline fishing pier at the tailwater; and (f) improved railed barrier-free fishing pier located on the dike shoreline near the dam;

Project No. 10810-000

-16-

- (2) A canoe portage;
- (3) Installation of signs that identify the project's recreational facilities;
- (4) Functional design drawings, costs for the improvements to, or construction of, the required facilities; and
- (5) A schedule for completing construction of the required facilities within three years of license issuance.

The Licensee shall include with the plan documentation of agency consultation, copies of comments and recommendations on the completed plan, and specific descriptions of how the agencies' comments are accommodated by the plan. The Licensee shall allow a minimum of thirty days for the agencies to comment before filing the plan with the Commission. If the Licensee does not adopt a recommendation, the filing shall include the Licensee's reasons, based on project-specific information.

No land clearing or land-disturbing activities shall begin until the Licensee is notified by the Commission that the plan is approved.

Article 410. (a) In accordance with the provisions of this article, the Licensee shall have the authority to grant permission for certain types of use and occupancy of project lands and waters and to convey certain interests in project lands and waters for certain types of use and occupancy, without prior Commission approval. The Licensee may exercise the authority only if the proposed use and occupancy is consistent with the purposes of protecting and enhancing the scenic, recreational, and other environmental values of the projects. For those purposes, the Licensee shall also have continuing responsibility to supervise and control the use and occupancies for which it grants permission, and to monitor the use of, and ensure compliance with the covenants of the instrument of conveyance for, any interest that it has conveyed, under this article. If a permitted use and occupancy violates any condition of this article or any other condition imposed by the Licensee for protection and enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of this article is violated, the Licensee shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, canceling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

(b) The type of use and occupancy of project lands and waters for which the Licensee may grant permission without prior

Project No. 10810-000

-17-

Commission approval are: (1) landscape plantings; (2) non-commercial piers, landings, boat docks, or similar structures and facilities that can accommodate no more than 10 watercraft at a time and where said facility is intended to serve single-family type dwellings; and (3) embankments, bulkheads, retaining walls or similar structures for erosion control to protect the existing shoreline.

To the extent feasible and desirable to protect and enhance the project's scenic, recreational, and other environmental values, the Licensee shall require multiple use and occupancy of facilities for access to project lands or waters. The Licensee shall also ensure, to the satisfaction of the Commission's authorized representative, that the use and occupancies for which it grants permission are maintained in good repair and comply with applicable state and local health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, the Licensee shall: (1) inspect the site of the proposed construction; (2) consider whether the planting of vegetation or the use of riprap would be adequate to control erosion at the site; and (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline.

To implement this paragraph (b), the Licensee may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover the Licensee's costs of administering the permit program. The Commission reserves the right to require the Licensee to file a description of its standards, guidelines, and procedures for implementing this paragraph (b) and to require modification of those standards, guidelines, or procedures.

(c) The Licensee may convey easements or rights-of-way across, or leases of, project lands for: (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary state and federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas, and electric utility distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir.

No later than January 31 of each year, the Licensee shall file three copies of a report briefly describing for each

Project No. 10810-000

-18-

conveyance made under this paragraph (c) during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed.

(d) The Licensee may convey fee title to, easements or rights-of-way across, or leases or project lands for: (1) construction of new bridges or roads for which all necessary state and federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary federal and state water quality certification or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection of support structures within the project boundary, for which all necessary federal and state approvals have been obtained; (5) private or public marinas that can accommodate no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed for a particular use is five acres or less; (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation; and (iii) no more than 50 total acres of project lands for the project development are conveyed under this clause (d)(7) in any calendar year.

At least forty-five days before conveying any interest in project lands under this paragraph (d), the Licensee must submit a letter to the Director, Office of Hydropower Licensing, stating its intent to convey the interest and briefly describing the type of interest and location of the lands to be conveyed (a marked exhibit G or K map may be used), the nature of the proposed use, the identity of any federal or state agency official consulted, and any federal or state approvals required for the proposed use. Unless the Director, within forty-five days from the filing date, requires the Licensee to file an application for prior approval, the Licensee may convey the intended interest at the end of that period.

(e) The following additional conditions apply to any intended conveyance under paragraph (c) or (d) of this article:

- (1) Before conveying the interest, the Licensee shall consult with federal and state fish and wildlife or recreation agencies, as appropriate, and the State Historic Preservation Officer.

Project No. 10810-000

-19-

- (2) Before conveying the interest, the Licensee shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved exhibit R or approved report on recreational resources of an exhibit E; or, if the project does not have an approved exhibit R or approved report on recreational resources, that the lands to be conveyed do not have recreational value.
 - (3) The instrument of conveyance must include covenants running with the land adequate to ensure that: (i) the use of the land conveyed shall not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use; and (ii) the grantee shall take all reasonable precautions to insure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will occur in a manner that will protect the scenic, recreational, and environmental values of the project.
 - (4) The Commission reserves the right to require the Licensee to take reasonable remedial action to correct any violation of the terms and conditions of this article, for the protection and enhancement of the project's scenic, recreational, and other environmental values.
- (f) The conveyance of an interest in project lands under this article does not in itself change the project boundaries. The project boundaries may be changed to exclude land conveyed under this article only upon approval of revised exhibit G or K drawings (project boundary maps) reflecting exclusion of that land. Lands conveyed under this article will be excluded from the project only upon a determination that the lands are not necessary for project purposes, such as operation and maintenance, flowage, recreation, public access, protection of environmental resources, and shoreline control, including shoreline aesthetic values. Absent extraordinary circumstances, proposals to exclude lands conveyed under this article from the project shall be consolidated for consideration when revised exhibit G or K drawings would be filed for approval for other purposes.
- (g) The authority granted to the Licensee under this article shall not apply to any part of the public lands and reservations of the United States included within the project boundary.
- (E) The Licensee shall serve copies of any Commission filing required by this order on any entity specified in this order to be consulted on matters related to that filing. Proof

Project No. 10810-000

-20-

of service on these entities must accompany the filing with the Commission.

(F) This order is final unless a request for rehearing is filed within thirty days of the date of its issuance pursuant to Section 313 of the Federal Power Act. The filing of a request for rehearing does not operate as a stay of the effective date of this order or of any other date specified in this order, except as specifically ordered by the Commission. The Licensee's failure to file a request for rehearing shall constitute acceptance of this order.

By the Commission.

(S E A L)

David P. Boergers,
Secretary.
