by the
Great Lakes
Fishery
Commission

Monday
April 17th
5-7 PM

Beaverton Activity
Center
106 Tonkin Street
Beaverton, MI
48612

Live
Sea
Lampreys

Sea lampreys are parasitic fish invasive to the Great Lakes that feed on the blood and body fluids of fish like lake trout, salmon, and whitefish. Control measures are taken each year to keep the population in check. Learn more:
